*Investing for Development* Great Britain. Parliament. House of Commons. Committee of Public Accounts,2009 CDC Group Plc, formerly the Commonwealth Development Corporation, is the United Kingdom's Development Finance Institution. Wholly owned by the Department for International Development (DFID), it aims to help reduce poverty by supporting private sector development. CDC invests equity in private enterprises in developing countries in order to demonstrate to other investors that it is possible to make money in such countries, while at the same time creating sustainable jobs, paying taxes and following good social and environmental policies. DFID restructured CDC in 2004 in order to invest indirectly, through private fund managers. CDC invests largely in sub-Saharan Africa and South Asian enterprises in sectors as diverse as retail, financial, agricultural and manufacturing. Since 2004, CDC has grown rapidly, more than doubling the value of its assets to £2.7 billion by mid-2008. DFID's oversight of certain elements of business efficiency needs to be improved. CDC invests over 70 per cent of its resources in poor countries, but has limited influence where its fund managers invest. Only 4 per cent of its resources are invested in small and medium enterprises, which suffer a shortage of finance. For DFID, financial performance is the principal indicator of CDC's development impact, but this information is not sufficient to assess CDC's effect on poverty reduction and not enough is done to measure compliance with ethical investment principles. The level and nature of CDC executive remuneration are also relevant to business efficiency and management incentives. The Chief Executive's remuneration increased from £383,000 in 2003 to £970,000 in 2007, reflecting in part CDC's exceptional financial performance but pay arrangements place too much emphasis on financial performance and too little on success in

reducing poverty.

**Corporate Governance** Sankatha Singh,2005 The subject Corporate Governance:Global Concepts and Practices has occupied centre- stage, particularly since the early 1990s in U.K., USA, rest of Europe, Canada, Japan, India and many other developing countries of the world. The present

volume is essentially a comprehensive textbook, focusing on both concepts and corporate governance practices. Even before the Enron collapse and several other kingsize scandals, there has been a steadily mounting volume of complaints regarding the dismal state of governance in most large corporates across the globe, mostly relating to accounting irregularities and top dressing of financial results, almost universally perpetrated at the behest of the Company Chairman & CEO himself. Keeping the above ground realities in view, the present volume is intended to be a standard reference as well as textbook on the varied facets of corporate governance. The book has six distinct parts, containing in all as many as twenty-eight interrelated chapters. The first part deals with subjects like business environment, business ethics and social responsibilities, management of a firm, etc., while the second part is concerned with the theory of firm, its objectives, accounting standards and creative accounting practices. Part Three of the book dwells at length on the working of the company board, board committees, need for whistle blowing, corporate governance rating and need for separation of the positions of Chairman and CEO. Part Four presents summary recommendations of five Indian Committees on corporate governance in chronological order. These are (i) CII Committee (1998), (ii) Ist SEBI Committee (1999), (iii) Ganguly Committee-RBI (2002); (iv) Naresh Chandra Committee (2002) and (v) 2nd SEBI Committee (2003). Part Five contains six chapters comprising as many live cases on accounting scams. The sixth part of the book contains governance reports of three world class companies from India, viz., Infosys Technologies Ltd., Wipro, and Reliance Industries Ltd.
