The Great Dictionary Finnish - English Benjamin Maximilian Eisenhauer, This dictionary contains around 100,000 Finnish terms with their English translations, making it one of the most comprehensive books of its kind. It offers a wide vocabulary from all areas as well as numerous idioms. The terms are translated from Finnish to English. If you need translations from English to Finnish, then the companion volume The Great Dictionary English - Finnish is recommended.

Agrammatic Aphasia Lise Menn, Loraine K. Obler, Gabriele Miceli, 1990 This major reference work fills a need long recognized in neurolinguistics: a source for analyzable speech transcripts from agrammatic aphasic patients that provides detailed grammatical descriptions and distributional analyses. This 3-volume set is unique in that it presents narrative speech from carefully selected clinically comparable patients, speakers of 14 languages, and parallel narratives by normal speakers. For each of the 14 languages there is a case presentation chapter analyzing and discussing the language of agrammatic patients, followed by primary data, which are organized as follows: running text of speech by two patients; interlinear morphemic translations of those texts; running text of speech elicited from two normal control subjects (plus interlinear translations); tables and figures analyzing distributional properties of the patients' speech; results of comprehension tests of the patients; transcriptions of patients' oral reading and writing samples. Neurological information is included with the case presentations, and a short grammatical sketch of each language is added to make the work on all languages accessible even to those who only read English. Language findings are presented for English, Dutch, German, Icelandic,

Swedish, French, Italian, Polish, Serbo-Croatian, Hindi, Finnish, Hebrew, Chinese and Japanese. The book is an indispensable reference work for all linguists, psycholinguists and neurolinguists who wish to test their theories against a massive body of data.
