Landscape Ecological Applications in Man-Influenced Areas Sun-Kee Hong,Nobukazu Nakagoshi,Bojie Fu,Yukihiro Morimoto,2007-06-02 Landscape Ecological Applications in Man-Influenced Areas not only expands the concept of landscape ecology, but also applies its principles to man-influenced ecosystems. New dimensions of landscape ecological research in a global change such as urbanization, biodiversity, and land transformation are explored in this book. The book also includes case studies concerning landscape analysis and evaluation using spatial analysis and landscape modelling for establishing sustainable management strategy in urban and agricultural landscapes.

Intelligent Control and Automation De-Shuang Huang,George William Irwin,2006-09-08 Results of the International Conference on Intelligent Computing, ICIC 2006: Lecture Notes in Computer Science (LNCS), Lecture Notes in Artificial Intelligence (LNAI), Lecture Notes in Bioinformatics (LNBI), Lecture Notes in Control and Information Sciences (LNCIS). 142 revised full papers are organized in topical sections: Blind Source Separation; Intelligent Sensor Networks; Intelligent Control and Automation; and Data Fusion, Knowledge Discovery, and Data Mining. Includes a Special Session on Smart and Intelligent Home Technology.

  Out of the Lab and On the Market Tetsu Natsume,Mario Tokoro,2017-07-14 Tetsu Natsume of Sony Computer Science Labs (Sony CSL) has been pioneering technology promotion for a decade. As he seeks marketplace opportunities for ground-breaking research, he plays the role of a Technology Producer -- a role that will be increasingly important as organizations seek optimally efficient and effective applications of basic research. Natsume's task has been greatly facilitated by his association with Sony CSL, a research lab founded by co-author Mario Tokoro. While CSL is owned by SONY, it nevertheless operates almost entirely independently. At CSL, a diverse, cosmopolitan group of talented researchers are free to explore any idea that might one day change the world. Natsume's task is to optimise that process by identifying the best path to the market for the new insights that pour out of CSL. Functioning somewhat like a movie producer, Natsume has blazed a trail for technology promoters the world over. He explains his techniques for overcoming challenges and embracing opportunities. His 10 core principles of technology promotion, which offer the reader an especially valuable framework for moving between the very different worlds of the lab and the marketplace, cover the importance of appropriate timing, speed, commitment and mindset,

while being rigorously simple and boldly ambitious. This book is an eye-opening primer for anyone interested in realising and optimising the commercial value of basic research.

  WordPerfect for Windows Steve Dyson,Daniel J. Fingerman,Stephen Cobb,1992 This superlative desktop resource provides all the answers to questions posed by users of WordPerfect for Windows at every skill level. Dyson provides simple tutorials to get beginners started, and then follows up with an extensive alphabetical listing of commands, keystrokes, and features. (Word Processing)

  Changes in Repeated DNA Sequences Among Alfalfa Variants Regenerated from Tissue Culture Kimberlee Kae Kidwell,1989

  Aspirational Chinese in Competitive Social Repositionings Jia Gao,2023-08-08 In the past four or so decades, a significant amount of research efforts has been made to examine the rapid and constant social changes in China. However, most of the literature has focused on either macro- or micro-level issues, and what has not been adequately analysed is how the majority of ordinary people has reacted to and influenced the changes. This inadequacy has affected our understanding of Chinese society, its dynamics and the changing trends. Drawing upon a new perspective of competitive social repositioning, and the evidence recorded in numerous recent publications and interview data, this book seeks to re-examine the ever-changing, but under-researched, societal dynamics driving social

transformations in China from 1964, when the communist heir narrative was rebranded and utilised, to 2000, when Jiang Zemin formulated the Three-Represents theory to modify the ideological political thinking of China's ruling elites. This analysis focuses on how a high proportion of aspirational citizens have kept repositioning themselves in China's changing distributions of social resources and social structure, how their attitudes and behaviours have been shaped over time, what characteristics of their choices are at different stages, and how their preferences have resulted in the zig-zag patterns of China's recent social change.

Natural Language Processing and Chinese Computing Fei Liu,Nan Duan,Qingting Xu,Yu Hong,2023-11-08 This three-volume set constitutes the refereed proceedings of the 12th National CCF Conference on Natural Language Processing and Chinese Computing, NLPCC 2023, held in Foshan, China, during October 12–15, 2023. The ____ regular papers included in these proceedings were carefully reviewed and selected from 478 submissions. They were organized in topical sections as follows: dialogue systems; fundamentals of NLP; information extraction and knowledge graph; machine learning for NLP; machine translation and multilinguality; multimodality and explainability; NLP applications and text mining; question answering; large language models; summarization and generation; student workshop; and evaluation workshop.

Advancing Commercialization of Digital Products from Federal Laboratories

National Academies of Sciences Engineering and Medicine,Policy and Global Affairs,Board on Science Technology and Economic Policy,Committee on Advancing Commercialization from the Federal Laboratories,2021-03-25 Federal laboratories play a unique role in the U.S. economy. Research and development conducted at these labs has contributed to the advancement or improvement of such key general-purpose technologies as nuclear energy, computers, the Internet, genomics, satellite navigation, the Global Positioning System, artificial intelligence, and virtual reality. Digital output from federal laboratories includes data, metadata, images, software, code, tools, databases, algorithms, and statistical models. Importantly, these digital products are nonrivalrous, meaning that unlike physical products, they can be copied at little or no cost and used by many without limit or additional cost. Advancing Commercialization of Digital Products from Federal Laboratories explores opportunities to add economic value to U.S. industry through enhanced utilization of intellectual property around digital products created at federal laboratories. This report examines the current state of commercialization of digital products developed at the federal labs and, to a limited extent, by extramural awardees, to help identify barriers to commercialization and technology transfer, taking into account differences between government-owned, contractor-operated (GOCO) and government-owned, government-operated (GOGO) federal labs.

  <u>Essentials of Clinical Psychopharmacology</u> Alan F. Schatzberg,Charles B. Nemeroff,2013 This third edition of Essentials of Psychopharmacology is, like its predecessors, based on the premier textbook in the field, The American Psychiatric Publishing Textbook of Psychopharmacology, now in its fourth edition. The Essentials format is designed to deliver core knowledge to the busy trainee or practitioner in a succinct and accessible manner. Essentials of Psychopharmacology provides a complete overview of clinically focused pharmacotherapeutic principles of vital interest to psychiatry residents, primary care physicians, and other health care professionals. Updated with the latest research findings since the publishing of the fourth edition, Essentials features new chapters on recently introduced medications and updated chapters on others. The book is divided into two parts: Classes of Psychiatric Treatments, which systematically reviews psychotropic medications within each drug class (e.g., antidepressants and anxiolytics, antipsychotics), and Psychopharmacological Treatment, which outlines current pharmacotherapeutic approaches in the major psychiatric disorders as well as in specific patient populations. Although the latter part has been streamlined in this new edition, coverage of critical information such as approved indications, drug interactions, side effects, and other prescribing factors remains comprehensive. Clinicians seeking a reliable reference and

guide to the core knowledge base and practice of clinical psychopharmacology can do no better than this new edition of Essentials of Psychopharmacology.

  Computer Vision – ECCV 2022 Workshops Leonid Karlinsky,Tomer Michaeli,Ko Nishino,2023-02-17 The 8-volume set, comprising the LNCS books 13801 until 13809, constitutes the refereed proceedings of 38 out of the 60 workshops held at the 17th European Conference on Computer Vision, ECCV 2022. The conference took place in Tel Aviv, Israel, during October 23-27, 2022; the workshops were held hybrid or online. The 367 full papers included in this volume set were carefully reviewed and selected for inclusion in the ECCV 2022 workshop proceedings. They were organized in individual parts as follows: Part I: W01 - AI for Space; W02 - Vision for Art; W03 - Adversarial Robustness in the Real World; W04 - Autonomous Vehicle Vision Part II: W05 - Learning With Limited and Imperfect Data; W06 - Advances in Image Manipulation; Part III: W07 - Medical Computer Vision; W08 - Computer Vision for Metaverse; W09 - Self-Supervised Learning: What Is Next?; Part IV: W10 - Self-Supervised Learning for Next-Generation Industry-Level Autonomous Driving; W11 - ISIC Skin Image Analysis; W12 - Cross-Modal Human-Robot Interaction; W13 - Text in Everything; W14 - BioImage Computing; W15 - Visual Object-Oriented Learning Meets Interaction: Discovery, Representations, and Applications; W16 - AI for Creative Video Editing and Understanding; W17 - Visual Inductive Priors for Data-Efficient Deep Learning; W18 - Mobile Intelligent Photography and Imaging; Part V: W19 - People Analysis: From

Face, Body and Fashion to 3D Virtual Avatars; W20 - Safe Artificial Intelligence for Automated Driving; W21 - Real-World Surveillance: Applications and Challenges; W22 - Affective Behavior Analysis In-the-Wild; Part VI: W23 - Visual Perception for Navigation in Human Environments: The JackRabbot Human Body Pose Dataset and Benchmark; W24 - Distributed Smart Cameras; W25 - Causality in Vision; W26 - In-Vehicle Sensing and Monitorization; W27 - Assistive Computer Vision and Robotics; W28 - Computational Aspects of Deep Learning; Part VII: W29 - Computer Vision for Civil and Infrastructure Engineering; W30 - AI-Enabled Medical Image Analysis: Digital Pathology and Radiology/COVID19; W31 - Compositional and Multimodal Perception; Part VIII: W32 - Uncertainty Quantification for Computer Vision; W33 - Recovering 6D Object Pose; W34 - Drawings and Abstract Imagery: Representation and Analysis; W35 - Sign Language Understanding; W36 - A Challenge for Out-of-Distribution Generalization in Computer Vision; W37 - Vision With Biased or Scarce Data; W38 - Visual Object Tracking Challenge.
