**Radiation Research** Oddvar F. Nygaard,Howard I. Adler,Warren K. Sinclair,2016-10-27  
Radiation Research: Biomedical, Chemical and Physical Perspectives documents the proceedings of the Fifth International Congress of Radiation Research held in Seattle, Washington, 14-20 July 1974. While the focus of the Congress was on fundamental research, there were several well-attended sessions on the practical aspects of radiation research as it relates to radiotherapy, central station power generation by both nuclear fission and fusion, and the environment. This volume contains 126 papers organized into 31 parts. Beginning with a keynote address and a lecture on the time scale in radiobiology, the subsequent contributions cover a wide range of topics presented over several sessions. Topics discussed during these sessions include energy needs, nuclear power, and the environment; prospects for fusion power; technological applications of radiation; human radiobiology; hazards of radiation exposure relative to other environmental agents; the basic physics of the interactions of radiation with matter; particle penetration phenomena; and radiation effects in frozen media.

*Metadiscursive Nouns* Feng (Kevin) Jiang,2022-06-23 Based on a 1.7-million-word corpus of 160 research articles from both soft and hard knowledge fields, this book sets out to explore how a particular type of noun – namely, the metadiscursive noun – is rhetorically used to mediate writer-reader interaction in disciplinary writing. Analysts of academic discourse have come to regard

hedges, reporting verbs, directives and so on as forming part of a wide repertoire of interactive features available to authors, suggesting a variety of terms, including evaluation, stance, appraisal, and metadiscourse. One aspect which has been less fully explored, however, is the rhetorical role nouns play in achieving writers' persuasive goals. This book fills the gap by proposing a particular type of nouns as metadiscursive nouns (as in "this supports our hypotheses that youth are more likely to co-offend when neighbourhoods are less disadvantaged"). The author aims to find out how writers employ metadiscursive nouns to engage and interact with readers in academic prose, raising theoretical and pedagogical implications and how they can be applied in the teaching of academic writing. This book will be of particular interest to students and scholars working in the areas of English for academic purposes, corpus studies, academic writing, and linguistics in general.

**Communicating with the Multicultural Consumer** Barbara Mueller, 2008 *Communicating with the Multicultural Consumer* highlights demographic changes impacting the consumer marketplace in the United States. Growing multiculturalism creates both new opportunities for marketers as well as new challenges. With a balance of theoretical and practical perspectives, this text explores how to develop successful campaigns targeting Hispanic Americans, African Americans, and Asian Americans. Complete with current examples and case studies, it addresses the key issues that must be kept in mind when creating effective communications programs for ethnic consumers - from marketing mix elements to cultural norms and values. *Communicating with the Multicultural Consumer* is an ideal text for advanced undergraduate and graduate students in specialized courses dealing with ethnic advertising or marketing. It is also an effective supplementary text for introductory advertising, marketing or mass communication courses, and would be useful to advertising practitioners - whether on the client side or within the advertising

agency.

*Radio in the Movies* Laurence Etling,,Frank Barnas,Marie Barnas,2023-10-27 This richly detailed examination of two forms of American entertainment focuses on the various ways that radio stations and air personalities have been depicted in motion pictures, from 1926's *The Radio Detective* to more recent films like 2022's *Halloween Ends*. Newly updated and revised chapters cover the cinematic portrayals of various aspects of radio, including disc jockeys, sports broadcasts, religious programs and abnormal personalities on the air. Such films as *The Big Broadcast* (1932), *Reveille with Beverly* (1943), *Mister Rock and Roll* (1957), *WUSA* (1970), *Radio Days* (1987), *Private Parts* (1997), *We Are Marshall* (2006) and *Straight Outta Compton* (2015) provide fascinating insights into not only their own times but also the historical eras that some of these films have attempted to recreate.

**Blockchain: Capabilities, Economic Viability, and the Socio-Technical Environment** Nils Braun-Dubler,Hans-Peter Gier,Tetiana Bulatnikova,Manuel Langhart,Manuela Merki,Florian Roth,Antoine Burret,Simon Perdrisat ,2020-06-16 Blockchain is widely considered a new key technology. The Foundation for Technology Assessment (TA-SWISS) has proposed a comprehensive assessment of blockchain technologies. With this publication, TA-SWISS provides the much-needed social contextualisation of blockchain. The first, more technical part of the study takes an in-depth look at how blockchain functions and examines the economic potential of this technology. By

analysing multiple real-world applications, the study sheds light on where the blockchain has advantages over traditional applications and where existing technologies continue to be the better solution. The second part of the study examines how blockchain became mainstream. It explores the origins of blockchain in the early history of information technology and computer networks. The study also reveals the impact blockchain has on industrial and public spaces. Finally, it discusses the social implications and challenges of blockchain against the background of a new socio-technical environment.

*Iterative Learning Control* David H. Owens, 2015-10-31 This book develops a coherent and quite general theoretical approach to algorithm design for iterative learning control based on the use of operator representations and quadratic optimization concepts including the related ideas of inverse model control and gradient-based design. Using detailed examples taken from linear, discrete and continuous-time systems, the author gives the reader access to theories based on either signal or parameter optimization. Although the two approaches are shown to be related in a formal mathematical sense, the text presents them separately as their relevant algorithm design issues are distinct and give rise to different performance capabilities. Together with algorithm design, the text demonstrates the underlying robustness of the paradigm and also includes new control laws that are capable of incorporating input and output constraints, enable the algorithm to reconfigure systematically in order to meet the requirements of different reference and auxiliary signals and also to support new properties such as spectral annihilation. *Iterative Learning Control* will interest academics and graduate students working in control who will find it a useful reference to the current status of a powerful and increasingly popular method of control. The depth of background theory and links to practical systems will be of use to engineers responsible for precision repetitive

processes.

Encyclopedia of Chinese History Michael Dillon, 2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty. The number of westerners travelling to China to study, for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture, society and economy and increasing coverage of contemporary China in the media. Our understanding of China's history has also been evolving. The study of history in the People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers, there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang and Tibet that have played such an important role in the history of China Proper and will also include material on Taiwan, and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics and culture.

**Pharmaceutical Test Data Exclusivity** John C. Todaro, Martin Bensadon, Brigitte Carion-Taravella, 2022-08-12 Data exclusivity gives pharmaceutical companies a limited period of time in

which clinical test data are exclusive to the innovator. Internationally, however, aside from prohibition against unfair commercial use, there are no specifics as to how these data are protected; exclusivity is available on a jurisdiction-by-jurisdiction basis. This book, the only one of its kind, provides expert guidance, chapter by chapter, on test data exclusivity rights for pharmaceutical products in twenty-two major markets worldwide. For each jurisdiction, in addition to explaining the available regulatory data protection – including both substantive and formal requirements for approvals and testing, protection of undisclosed data, confidentiality, and enforcement in practice – local experts provide detailed information and guidance on the degree to which test data exclusivity may be achieved in such areas of pharmaceutical research as the following: infectious disease products; paediatrics products; chemical and biological products; agricultural products; animal health products; orphan drugs; and new chemical entities. This book originated from a project conducted by the Pharma Committee of the International Association for the Protection of Intellectual Property (AIPPI), the world’s leading non-profit association dedicated to the development, expansion, and improvement of international and regional treaties and agreements and national laws relating to intellectual property. Many committee members and observers are authors of chapters in this book. An unmatched starting point for innovator pharmaceutical companies and their advisers to evaluate data exclusivity rules and opportunities around the world, this book will be an invaluable resource for IP professionals, governments, non-governmental organizations, and international organizations to promote and share IP laws and practices.
