Living Proof Kevin May, 2013-04 CIA since the age of twenty-one, by no choice of his own, Agent Jake Lander had long dreamed of the day he would finally be free from the life they had provided him in their finely-tuned world of deception. After a twenty-five year career with the Agency, Jake knew far too much to simply walk away. Escape was his only option. Once that day arrived, he was designated a national security risk--his Protocol: Capture or Kill. Jake chose the quaint and quirky island of Key West to begin his new life of peaceful anonymity. However, his serenity would be short-lived as he discovered that his island paradise was too small to get away with anything. Faced with that reality, Jake knew his escape could easily end up costing him his life, yet it was the only way get it back.

Eden Kevin May, 2008-05 In a world divided, a new revolution is our only hope. Eden is about each one of us, exposed through the spiritual wanderings of the multi-dimensional Daniel, a successful businessman seeking to escape the tragic realities of our post-9/11 world. Having just completed an extended international business tour, Daniel's long awaited reward was only a matter of hours away - a pleasure-filled weekend in paradise. However, his journey took an unexpected detour and headed straight to hell. Turns out, Daniel's pleasure-filled weekend was precisely that, and so much more. Eden takes a psychologically raw and often irreverent look at our current state of affairs, while weaving a tantalizing tale filled with seduction, suspense and conflict. Shamefully honest, riotously self-deprecating and seriously intriguing, Eden leads you through Daniel's vivid world of diverse cultures, faraway places, prophetic perspectives and extraordinary encounters. If you believe there are no coincidences, Eden promises to be a life-changing, even revolutionary experience.

Please Come Off-Book Kevin Kantor, 2021-03-23 Please Come Off-Book queers the theatrical canon we all grew up with. Kantor critiques the treatment of queer figures and imagines a braver and bolder future that allows queer voices the agency over their own stories. Drawing upon elements of the Aristotelian dramatic structure and the Hero's Journey, Please Come Off-Book is both a love letter to and a scathing critique of American culture and the lenses we choose to see ourselves through.

Halo Kevin May, David McElroy, 2022-09-29 Eventually selling 7.5 million copies, 'Violator' gave British band Depeche Mode the critical acclaim they finally deserved and spawned classic tracks such as 'Personal Jesus', 'Enjoy The Silence', 'Policy Of Truth', 'World In My Eyes', 'Halo' and 'Waiting For The Night'. 'Halo' goes behind the scenes of Depeche Mode's 'Violator' era – a biography and oral history from those who were there in the studio, working behind the cameras, producing sleeves, appearing in the videos, support acts, tour managers, publicists and, of course, the fans.

Religious Belief and Emotional Transformation Paul Lauritzen, 1992 Even a cursory reading of contemporary moral philosophy and theological ethics reveals that discussions in these disciplines are often far removed from the actual experiences of individuals struggling to live morally. One reason for this is the general silence in most modern ethical theory about the place of emotions in the moral life. In this study of the possibility of emotional/moral transformation through religious belief and practice, Paul Lauritzen breaks this silence and attempts to explain both why emotions have been ignored and why they must be reclaimed. Drawing on work in philosophical psychology, cultural anthropology, and religious studies, Lauritzen develops an account of emotions and of the self that allows us to see how a system of religious belief and practice may dramatically transform the emotional life of the believer. He argues that emotions are not biologically basic experiences, invariant from culture to culture, but rather are culturally mediated artifacts that are inescapably tied to communities of belief and practice that sustain particular understandings of the self and its world. To

this end, Lauritzen sketches a social-constructivist account of human emotions and analyzes the emotion of anger in detail. By comparing anger as it is found in our culture with accounts of anger in certain non-Western societies, the author demonstrates that emotions are crucially shaped in communities of belief and practice and are thus open to transformation with a change in belief and practice. This possibility is explored at length by examining the way in which a framework of retributive justice structures the experience of anger in our culture. According to Lauritzen, this framework presupposes that the human condition is characterized by limited resources, on the one hand, and by limited generosity, on the other. Against this background, anger will appear to be a natural retributive response to violations of individuals' rights. The author concludes the study by showing how, given particular religious views about human life and history, the framework of retributive justice may be transformed or transcended in ways that dramatically affect the emotional life of the believer.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Dinosaurs under the Aurora Roland A. Gangloff, 2012-07-10 In 1961, while mapping rock exposures along the Colville River in Alaska, an oil company geologist would unknowingly find the evidence for a startling discovery. Long before the North Slope of Alaska was being exploited for its petroleum resources it was a place where dinosaurs roamed. *Dinosaurs under the Aurora* immerses readers in the challenges, stark beauty, and hard-earned rewards of conducting paleontological field work in the Arctic. Roland A. Gangloff recounts the significant discoveries of field and museum research on Arctic dinosaurs, most notably of the last 25 years when the remarkable record of dinosaurs from Alaska was compiled. This research has changed the way we think about dinosaurs and their world. Examining long-standing controversies, such as the end-Cretaceous extinction of dinosaurs and whether dinosaurs were residents or just seasonal visitors to polar latitudes, Gangloff takes readers on a delightful and instructive journey into the world of paleontology as it is conducted in the land under the aurora.
