Engineering Human Computer Interaction and Interactive Systems Rémi Bastide,Philippe Palanque,Jörg Roth,2005-07-11 As its name suggests, the EHCI-DSVIS conference has been a special event, merging two different, although overlapping, research communities: EHCI (Engineering for Human-Computer Interaction) is a conference organized by the IFIP 2.7/13.4 working group, started in 1974 and held every three years since 1989. The group's activity is the scientific investigation of the relationships among the human factors in computing and software engineering. DSVIS (Design, Specification and Verification of Interactive Systems) is an annual conference started in 1994, and dedicated to the use of formal methods for the design of interactive systems. Of course these two research domains have a lot in common, and are informed by each other's results. The year 2004 was a good opportunity to bring closer these two research communities for an event, the 11th edition of DSVIS and the 9th edition of EHCI. EHCI-DSVIS was set up as a working conference bringing together researchers and practitioners interested in strengthening the scientific foundations of user interface design, specification and verification, and in examining the relationships between software engineering and human-computer interaction. The call for papers attracted a lot of attention, and we received a record number of submissions: out of the 65 submissions, 23 full papers were accepted, which gives an acceptance rate of approximately 34%. Three short papers were also included. The contributions were categorized in 8 chapters: Chapter 1 (Usability and Software Architecture) contains three contributions which advance the state of the art in usability approaches for modern software engineering.

Plug-In Electric Vehicles David B. Sandalow,2009-09-01 Plug-in electric vehicles are coming. Major automakers plan to commercialize their first models soon, while Israel and Denmark have ambitious plans to electrify large portions of their vehicle fleets. No technology has greater potential to end the United States' crippling dependence on oil, which leaves the nation vulnerable to price shocks, supply disruptions, environmental degradation, and national security threats including terrorism. What does the future hold for this critical technology, and what should the U.S. government do to promote it? Hybrid vehicles now number more than one million on America's roads, and they are in high demand from consumers. The next major technological step is the plug-in electric vehicle. It combines an internal combustion engine and electric motor, just as hybrids do. But unlike their precursors, PEVs can be recharged from standard electric outlets, meaning the vehicles would no longer be dependent on oil. Widespread growth in the use of PEVs would dramatically reduce oil dependence, cut driving costs and reduce pollution from vehicles. National security would be enhanced, as reduced oil dependence decreases the leverage and resources of petroleum exporters. Brookings fellow David Sandalow heads up an authoritative team of experts including former government officials, private-sector analysts, academic experts, and nongovernmental advocates. Together they explain the current landscape for PEVs: the technology, the economics, and the implications for national security and the environment. They examine how the national interest could be served by federal promotion and investment in PEVs. For example, can tax or procurement policy advance the cause of PEVs? Should the public sector contribute to greater research and development? Should the government insist on PEVs to replenish its huge fleet of official vehicles? Plug-in electric

vehicles are coming. But how soon, in what numbers, and to what effect? Federal policies in the years ahead will go a long way toward answering those questions. David Sandalow and his colleagues examine what could be done in that regard, as well as what should be done.

The Art of Entrepreneurship Jim Stovall,Dr. Kevin Schneider,2022-05-17 The comprehensive guide to starting and growing your dream business. In this groundbreaking book, bestselling author Jim Stovall shares the practical wisdom gained from his forty-year career as an award-winning entrepreneur alongside the time-tested strategies compiled by Dr. Kevin Schneider through his experience as the Director of the Stovall Center for Entrepreneurship at Oral Roberts University. Few books have offered both pragmatic, real-world examples and proven academic principles, as readers will find in The Art of Entrepreneurship. Transform your natural aptitudes, interests, and resources into a lucrative business as you discover: The key characteristics of an entrepreneur—and whether you possess them. Myths and misconceptions about entrepreneurship—it's not a get-rich-quick scheme, nor is it simply for people who want to work less and not have a boss. How to get started as an entrepreneur—keeping your current job as you turn your side hustle or creative idea into an empire. Why some entrepreneurs succeed when others struggle—it's not about trading time for money; it's about creating a money machine. The values of entrepreneurship—first and foremost, service rendered to other people. The path of entrepreneurship from start to finish—learning when to pull the trigger and when to pull the plug. How to build the dream

entreprener team that will support you in your journey. Entrepreneurship is both a science and an art. This book teaches both dimensions—the hard skills and the soft skills, the action steps and the mindset—so that you can seize the opportunities for entrepreneurship in your midst and turn your business idea into a successful start-up that adds value to you, your family, your community, and the larger world.

Using and Managing PPP Andrew Sun,1999 Covering all aspects of PPP, including setting up dial-in servers, debugging, and PPP options, this book also contains overviews of related areas like serial communications, DNS setup, and routing. Also covered are several different software packages on both clients and servers, including the PPP support built into Solaris.

The papers included in the HCII-HIMI volume set were organized in topical sections as follows: Part I: Information design and user experience; data visualization and big data; multimodal interaction; interacting with AI and intelligent systems; Part II: Service design; knowledge in eLearning and eEducation; supporting work and collaboration.

The Eye of the Sandpiper Brandon Keim,2017-06-20 In The Eye of the Sandpiper, Brandon Keim pairs cutting-edge science with a deep love of nature, conveying his insights in prose that is both accessible and beautiful. In an elegant, thoughtful tour of nature in the twenty-first century, Keim continues in the tradition of Lewis Thomas, Stephen Jay Gould, and David Quammen, reporting from the frontiers of science while celebrating the natural world's wonders and posing new questions about our relationship to the rest of life on Earth. The stories in The Eye of the Sandpiper are arranged in four thematic sections. Each addresses nature through a different lens. The first is evolutionary and ecological dynamics, from how patterns form on butterfly wings to the ecological importance of oft-reviled lampreys. The second section explores the inner lives of animals, which science has only recently embraced: empathy in rats, emotions in honeybees, spirituality in chimpanzees. The third section contains stories of people acting on insights both ecological and ethological: nourishing blighted rivers, but also caring for injured pigeons at a hospital for wild birds and demanding

legal rights for primates. The fourth section unites ecology and ethology in discussions of ethics: how we should think about and behave toward nature, and the place of wildness in a world in which space for wilderness is shrinking. By appreciating the nonhuman world more fully, Keim writes, I hope people will also act in ways that nourish rather than impoverish its life—which is, ultimately, the problem that needs to be solved at this Anthropocene moment, with a sixth mass extinction looming, once-common animals becoming rare, and Earth straining to support 7.5 billion people. The solution will come from a love of nature rather than chastisement or lamentation.

Advocates for Animals Lori B. Girshick,2017-09-15 In Advocates for Animals Girshick focuses on the volunteers and organizations that fill the gap in what laws, policies, practices, and services do not address for animal rights and protection. 204 personal reflections teach about their paths to involvement, what they do and hope to achieve, and how this has impacted their lives.

The Gift of Giving Jim Stovall,2020-07-14 Why leave a legacy when you can live one right now? When you realize that your success journey is really a journey of giving, you will unlock the potential for profound riches. The world's top entrepreneurs and leaders derive their success and fulfillment from the alignment of their professional endeavors with their search for meaning and impact. Rather than waiting until they feel they have something to offer, they consistently share their resources to better the lives of others. Now is the time for you to discover your unique gifts and create a giving plan so that you can begin to live your legacy. The Gift of Giving traces the ultimate giving journeys of Jim Stovall and Don Green, who have implemented Napoleon Hill's timeless achievement principles to live a legacy of generosity. When Jim Stovall committed to finding a driving passion and giving away $1 million to it, he was a broke college student whose dreams of playing in the NFL had been sidelined by a rare condition causing progressive blindness. With the guidance of the successful businessman Lee Braxton and a worn copy of Think and Grow Rich, Jim brought himself from poverty to prosperity and became an award-winning entrepreneur and philanthropist. His journey connected him with Don Green, the executive director of the Napoleon Hill Foundation, who lives out his calling and continues Hill's work through the Foundation's many philanthropic efforts. Together, their stories reveal that you can render service and charity at every stage of your giving journey; you simply have to identify opportunities for generosity and take action on them. You have everything you need to create your legacy. The time has come to live it now, while you can enjoy the gift of giving.

Smart Grid Handbook, 3 Volume Set ,2016-08-01 Comprehensive, cross-disciplinary coverage of Smart Grid issues from global expert researchers and practitioners. This definitive reference meets the need for a large scale, high quality work reference in Smart Grid engineering which is pivotal in the development of a low-carbon energy infrastructure. Including a total of 83 articles across 3 volumes The Smart Grid Handbook is organized in to 6 sections: Vision and Drivers, Transmission, Distribution, Smart Meters and Customers, Information and Communications Technology, and Socio-Economic Issues. Key features: Written by a team representing smart grid R&D, technology deployment, standards, industry practice, and socio-economic aspects. Vision and Drivers covers the vision, definitions, evolution, and

global development of the smart grid as well as new technologies and standards. The Transmission section discusses industry practice, operational experience, standards, cyber security, and grid codes. The Distribution section introduces distribution systems and the system configurations in different countries and different load areas served by the grid. The Smart Meters and Customers section assesses how smart meters enable the customers to interact with the power grid. Socio-economic issues and information and communications technology requirements are covered in dedicated articles.The Smart Grid Handbook will meet the need for a high quality reference work to support advanced study and research in the field of electrical power generation, transmission and distribution. It will be an essential reference for regulators and government officials, testing laboratories and certification organizations, and engineers and researchers in Smart Grid-related industries.
