[Learning by Playing](#) Fran C. Blumberg PhD,2014-03-10 There is a growing recognition in the learning sciences that video games can no longer be seen as impediments to education, but rather, they can be developed to enhance learning. Educational and developmental psychologists, education researchers, media psychologists, and cognitive psychologists are now joining game designers and developers in seeking out new ways to use video game play in the classroom. In Learning by Playing, a diverse group of contributors provide perspectives on the most current thinking concerning the ramifications of leisure video game play for academic classroom learning. The first section of the text provides foundational understanding of the cognitive skills and content knowledge that children and adolescents acquire and refine during video game play. The second section explores game features that captivate and promote skills development among game players. The subsequent sections discuss children and adolescents' learning in the context of different types of games and the factors that contribute to transfer of learning from video game play to the classroom. These chapters then form the basis for the concluding section of the text: a specification of the most appropriate research agenda to investigate the academic potential of video game play, particularly using those games that child and adolescent players find most compelling. Contributors include researchers in education, learning sciences, and cognitive and developmental psychology, as well as instructional design researchers.

[The Design of Learning Experience](#) Brad Hokanson,Gregory Clinton,Monica W. Tracey,2015-07-03 This book delves into two divergent, yet parallel themes; first is an examination of how educators can design the experiences of learning, with a focus on the learner and the end results of education; and second, how educators learn to design educational products, processes and experiences. The book seeks to understand how to design how learning occurs, both in the instructional design studio and as learning occurs throughout the world. This will change the area's semantics; at a deeper level, it will change its orientation from instructors and information to learners; and it will change how educators take advantage of new and old technologies. This book is the result of a research symposium sponsored by the Association for Educational Communications and Technology [AECT].

[Assessing Computational Thinking](#) David Weintrop,Daisy W. Rutstein,Marie Bienkowski,Steven McGee,2023-09-12 This book presents different approaches for answering the question: How do we assess computational thinking? The result is a snapshot of the current state of the field for assessing computational thinking. The last decade has seen rapid growth in the presence of computational thinking (CT) in educational contexts. Those working to advance CT argue that the concepts and skills associated with CT are essential to succeed in an increasingly computational world. As a result of these efforts, there has been tremendous growth in curricula, learning environments, and innovations around CT education in K-12 classrooms and beyond. As CT grows in prominence, so too does the need to be able to effectively and equitably assess learners CT abilities. This volume is a collection of chapters pursuing different approaches for answering the question: How do we assess computational thinking? The answers provided span age ranges, formal and informal contexts, conceptual aspects of CT, and varying methodological and evaluative strategies. Collectively, the volume captures the current state of the field for assessing computational thinking and lays the groundwork for future CT assessment innovation. Assessing Computational Thinking will be a key resource for academics, researchers, and advanced students of Education, Educational Assessment, Educational Research, Psychology and Research Methods. The chapters included in this book were originally published as a special issue of Computer Science Education.

[AI and education](#) Miao, Fengchun,Holmes, Wayne,Ronghuai Huang,Hui Zhang,UNESCO,2021-04-08 Artificial Intelligence (AI) has the potential

to address some of the biggest challenges in education today, innovate teaching and learning practices, and ultimately accelerate the progress towards SDG 4. However, these rapid technological developments inevitably bring multiple risks and challenges, which have so far outpaced policy debates and regulatory frameworks. This publication offers guidance for policy-makers on how best to leverage the opportunities and address the risks, presented by the growing connection between AI and education. It starts with the essentials of AI: definitions, techniques and technologies. It continues with a detailed analysis of the emerging trends and implications of AI for teaching and learning, including how we can ensure the ethical, inclusive and equitable use of AI in education, how education can prepare humans to live and work with AI, and how AI can be applied to enhance education. It finally introduces the challenges of harnessing AI to achieve SDG 4 and offers concrete actionable recommendations for policy-makers to plan policies and programmes for local contexts. Green Technological Innovation for Sustainable Smart Societies Chinmay Chakraborty,2021-09-13 This book discusses the innovative and efficient technological solutions for sustainable smart societies in terms of alteration in industrial pollution levels, the effect of reduced carbon emissions, green power management, ecology, and biodiversity, the impact of minimal noise levels and air quality influences on human health. The book is focused on the smart society development using innovative low-cost advanced technology in different areas where the growth in employment and income are driven by public and private investment into such economic activities, infrastructure and assets that allow reduced carbon emissions and pollution, enhanced energy, and resource efficiency and prevention of the loss of biodiversity and ecosystem services. The book also covers the paradigm shift in the sustainable development for the green environment in the post-pandemic era. It emphasizes and facilitates a greater understanding of existing available research i.e., theoretical, methodological, well-established and validated empirical work, associated with the environmental and climate change aspects.

The "Perfect" Parent Roma Khetarpal,2014-10-01 Get ready for a parenting makeover! If you're a parent today, you face extreme pressure to get everything exactly "right"—a pursuit of perfection that probably makes parenting feel hard. It encourages you to worry about whether you're doing a good enough job, and to wonder if your kids will turn out okay. In The "Perfect" Parent, Roma Khetarpal puts all of that agony to rest. She explains that the key to a fulfilling parenting experience is to stop chasing an ideal and instead use your inner perfection to nurture a strong, communicative connection with your children—which will lead them to be happy, think positive, and do good. Drawing from the fields of personal growth and emotional intelligence and distilling cutting-edge scientific research, Khetarpal leads you through five communication tools designed to help parents strengthen their bond with their kids and handle the doubt, guilt, worry, and fear that often accompany the challenges of raising children. Along the way, she shares helpful, humorous real-life stories taken from the popular parenting classes she's taught for years, as well as easy-to-remember exercises—such as "Dealing with the Feeling" and "Take Five"—for use in common family situations. With this short, useful, and enjoyable guide, you will be equipped with the simple tools you need to build a relationship with your kids that lasts a lifetime. Includes a "Perfect" parent toolbox!

Academic Films for the Classroom Geoff Alexander, 2014-01-10 Exploring a realm of film often dismissed as campy or contrived, this book traces the history of classroom educational films from the silent era through the 1980s, when film finally began to lose ground to video-based and digital media. It profiles 35 individual academic filmmakers who played a role in bringing these roughly 100,000 16mm films to classrooms across North America, paying particular attention to auteur John Barnes and his largely neglected body of work. Other topics include the production companies contributing to the growth and development of the academic film genre; the complex history of post-Sputnik, federally-funded educational initiatives which influenced the growth of the academic film genre; and the denouement of the genre in classrooms and its resurgence on the Internet.

Auténtico, Second Edition Robert Rodriguez, Andrés T. Tapia, 2021-07-06 America has an urgent need for Latino and Latina executives. This book identifies a path to uplift and amplify their representation in leadership. Latinos and Latinas will account for a third of our workforce by 2050—yet they make up only 5 percent of senior roles in corporate America. Dr. Robert Rodriguez and Andrés T. Tapia call this low percentage of Latino and Latina corporate executives today the “5 percent Shame.” Inspired by Price M. Cobbs’s seminal work on the secrets of successful Black leaders, this book seeks to understand the impact on Latinos and Latinas of the external forces of conscious and unconscious biases and of the internal forces of whether to assimilate or double down on their cultural identities in their quest to get ahead. The second edition features a new foreword by Henry Cisneros, former secretary of the Department of Housing and Urban Development, as well as updated statistics and graphs to represent how America’s career landscape for Latinos has and has not changed and how to ensure Latinos can rise to their fullest potential. Using insights from in-depth interviews with twenty highly successful boomer Latino and Latina executives and focus groups with dozens of Gen X and millennial leaders, the authors have captured lessons about how these individuals chose their career paths, addressed challenges, and seized opportunities. The discussions are interpreted through the lenses of the authors’ different personal experiences as Latino leaders in corporate America and synthesized as a guide for future leaders.

Participatory Design for Learning Betsy DiSalvo, Jason Yip, Elizabeth Bonsignore, Carl DiSalvo, 2017-05-25 Participatory Design is a field of research and design that actively engages stakeholders in the processes of design in order to better conceptualize and create tools, environments, and systems that serve those stakeholders. In *Participatory Design for Learning: Perspectives from Practice and Research*, contributors from across the fields of the learning sciences and design articulate an inclusive practice and begin the process of shaping guidelines for such collaborative involvement. Drawing from a wide range of examples and perspectives, this book explores how participatory design can contribute to the development, implementation, and sustainability of learning innovations. Written for scholars and students, *Participatory Design for Learning: Perspectives from Practice and Research* develops and draws attention to practices that are relevant to the facilitation of effective educational environments and learning technologies.

[Manage Your Own Learning Analytics](#) Elspeth McKay, 2021-12-04 This book sheds light on the practice of learning analytics, illuminating how others approach their data analysis. At the beginning of the book, a 'prescriptive learning analytics planning model' gives straightforward

instructions for people to follow. This book is organized into ten chapters, falling into four topical sections: Managing Learning Analytics (overview, instructional systems design (ISD), instructional design, and planning data analysis); Cognitive Performance Measurement Practices (classical test theory (CTT), Rasch measurement theory (RMT), Item response theory(IRT), Rasch Modeling Tools (research design, setting methodology); and Case Studies (corporate training settings, healthcare industry, and educational courseware design). This book is an important reference for: educational research community and instructional systems designers; corporate training developers; postgraduate course developers; and doctoral students.

Artificial Intelligence and Policy in India Various Contributors,2021-01-10 The Indian Strategy on AI & Law Programme is a policy research programme started by the Indian Society of Artificial Intelligence and Law in December 2019. The purpose of the programme is to emphasize on the policy gaps and considerations behind AI-centric governance and policymaking in India, wherein the focus of the field has been more on government affairs at Indian, Global and comparative levels, based on diplomatic and digital ties between India and other D9 countries. The book presents the Works produced in the research programme since July 2020, which encumbers preliminary and some advanced analysis on the recent developments in the arena of AI Policy and Governance. This book also includes the initial publications in the Civilized AI Project which was started in October 2020.

Makeology Kylie Peppler,Erica Rosenfeld Halverson,Yasmin B. Kafai,2016-05-20 Makeology introduces the emerging landscape of the Maker Movement and its connection to interest-driven learning. While the movement is fueled in part by new tools, technologies, and online communities available to today's makers, its simultaneous emphasis on engaging the world through design and sharing with others harkens back to early educational predecessors including Froebel, Dewey, Montessori, and Papert. Makers as Learners (Volume 2) highlights leading researchers and practitioners as they discuss and share current perspectives on the Maker movement and research on educational outcomes in makerspaces. Each chapter closes with a set of practical takeaways for educators, researchers, and parents.

Music and Youth Culture Daniel Laughey,2006-01-05 Music and Youth Culture offers a groundbreaking account of how music interacts with young people's everyday lives. Drawing on interviews with and observations of youth groups together with archival research, it explores young people's enactment of music tastes and performances, and how these are articulated through narratives and literacies. An extensive review of the field reveals an unhealthy emphasis on committed, fanatical, spectacular youth music cultures such as rock or punk. On the contrary, this book argues that ideas about youth subcultures and club cultures no longer apply to today's young generation. Rather, archival findings show that the music and dance cultures of youth in 1930s and 1940s Britain share more in common with youth today than the countercultures and subcultures of the 1960s and 1970s. By focusing on the relationship between music and social interactions, the book addresses questions that are scarcely considered by studies stuck in the youth cultural worlds of subcultures, club cultures and post-subcultures: What are the main influences on young people's music tastes? How do young people use music to express identities and emotions? To what extent can today's youth and their music seem radical and progressive? And how is the 'special relationship' between music and youth culture played out in everyday leisure, education and work places?
