This book addresses the way in which Saudi Arabia is moving to develop a quality university system that balances the need for students to gain the knowledge, skills and 'ways of doing' necessary to operate effectively on the world stage while simultaneously maintaining and demonstrating the fundamental values of the Islamic religion and culture. The book provides a description and critical analysis of the key components of the Saudi Higher Education system, and of system-level responses to the challenges and opportunities facing Saudi universities. It is written by a team of Saudi academics and authors of international standing from non-Saudi universities so as to provide both internal and external perspectives on all issues and to place information and ideas in the context of the international Higher Education scene.
