Intellectual Property and Financing Strategies for Technology Startups Gerald B. Halt, Jr., John C. Donch, Jr., Amber R. Stiles, Robert

Fesnak, 2016-11-30 This book offers a comprehensive, easy to understand guide for startup entities and developing companies, providing insight on the various sources of funding that are available, how these funding sources are useful at each stage of a company's development, and offers a comprehensive intellectual property strategy that parallels each stage of development. The IP strategies offered in this book take into consideration the goals that most startups and companies have at each stage of development, as well as the limitations that exist at each stage (i.e., limited available resources earmarked for intellectual property asset development), and provides solutions that startups and companies can implement to maximize their return on intellectual property investments. This book also includes a number of descriptive examples, case studies and scenarios to illustrate the topics discussed, and is intended for use by startups and companies across all industries. Readers will garner an appreciation for the value that intellectual property rights provide to a startup entity or company and will gain an understanding of the types of intellectual property rights that are available to companies and how to procure, utilize and monetize those intellectual property rights to help their company grow.

Antitrust in Pharmaceutical Markets & Geographical Rules of Origin Pierre Kobel, Pranvera Këllezi, Bruce Kilpatrick, 2017-09-20 This book gathers international and national reports from across the globe on key questions in the field of antitrust and intellectual property. The first part discusses the application of competition law in the pharmaceutical sector, which continues to be a focus for anti-trust authorities around the world. A detailed international report explores the extent to which the application of the competition rules in the pharmaceutical sector should be affected by the specific characteristics of those products and markets (including consumer protection rules, the need to promote innovation, the need to protect public budgets, and other public interest considerations). It provides an excellent comparative study of this complex subject, which lies at the interface between

competition law and intellectual property law. The second part of the book gathers contributions from various jurisdictions on the topic of “What rules should govern claims by suppliers about the national or geographic origin of their goods or services?” This section presents an international report, which offers an unparalleled comparative analysis of this topic, bringing together common themes and contrasting the various national provisions dealing with indications of origin, amongst other things. The book also includes the resolutions passed by the General Assembly of the International League of Competition Law (LIDC) following a debate on each of these topics, which include proposed solutions and recommendations. The LIDC is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

Globalization of Discovery Lucas V.M. Bento, 2019-11-21 Dispute resolution is ultimately a quest for curiosity and discovery. However, many jurisdictions do not afford an adequate level of discovery—the process of obtaining information to prepare for trial. Fortunately, pretrial discovery is firmly entrenched in both state and federal laws in the United States, and international litigants increasingly look to the U.S.’s generous discovery tools, particularly 28 U.S.C. § 1782 (“Section 1782”), which provides an avenue to access information from a person or entity residing or found in the United

States for use in a foreign proceeding. This book is the first to provide a comprehensive overview of the law and practice of this globally indispensable statute. The author pursues Section 1782's interpretation through U.S. federal courts, synthesizes all major decisions in this area of law, notes tensions and conflicts where applicable and provides practitioners and adjudicators worldwide with strategic and practical insights into the opportunities and constraints of Section 1782 applications. Among the questions likely to be asked while considering a Section 1782 application, the author offers detailed answers to the following and more: Under what circumstances can Section 1782 be invoked? What goes into an application? How can a respondent or intervenor challenge it? When is a person "found" in the district, pursuant to Section 1782? Who qualifies as an "interested person?" What is a "foreign or international tribunal?" Can Section 1782 be used in aid of foreign arbitrations? Can it be used before a foreign proceeding is filed? Can discovery be obtained over documents located abroad? How can the discretionary factors defined in Intel—jurisdictional reach, receptivity, circumvention and burden—be satisfied or challenged? What circumstances have led courts to deny Section 1782 applications? The author provides an introduction to U.S. discovery concepts and terminology, with comparison to other tools of international discovery such as the Hague Evidence Convention. In addition to providing extensive analysis of judicial decisions interpreting the Section 1782 statutory test and the Intel factors, the book also surveys and synthesizes additional factors considered by the courts, such as the role of good faith and the importance of timing. With this invaluable book, practitioners will be able to confidently invoke or defend a Section 1782 application in any U.S. District and maximize chances of success. Adjudicators, global law firms, companies doing transnational business and international arbitration practitioners will approach any Section 1782 application with full awareness of applicable rules of procedure, statutory and judicial tests, and best practices.
