Ghosts of War Franziska Exeler,2022-04-15 How do states and societies confront the legacies of war and occupation, and what do truth, guilt, and justice mean in that process? In *Ghosts of War*, Franziska Exeler examines people's wartime choices and their aftermath in Belarus, a war-ravaged Soviet republic that was under Nazi occupation during the Second World War. After the Red Army reestablished control over Belarus, one question shaped encounters between the returning Soviet authorities and those who had lived under Nazi rule, between soldiers and family members, reevacuees and colleagues, Holocaust survivors and their neighbors: What did you do during the war? *Ghosts of War* analyzes the prosecution and punishment of Soviet citizens accused of wartime collaboration with the Nazis and shows how individuals sought justice, revenge, or assistance from neighbors and courts. The book uncovers the many absences, silences, and conflicts that were never resolved, as well as the truths that could only be spoken in private, yet it also investigates the extent to which individuals accommodated, contested, and reshaped official Soviet war memory. The result is a gripping examination of how efforts at coming to terms with the past played out within, and at times through, a dictatorship.

Black Holes, Cosmology And Extra Dimensions (Second Edition) Kirill A Bronnikov,Sergey G Rubin,2021-06-29 Assuming basic knowledge of special and general relativity, this book guides the reader to problems under consideration in modern research, concerning black holes, wormholes, cosmology, and extra dimensions. Its first

part is devoted to local strong field configurations (black holes and wormholes) in general relativity and its most relevant extensions: scalar-tensor, $f(R)$, and multidimensional theories. The second part discusses cosmology, including inflation and problems of a unified description of the whole evolution of the universe. The third part concerns multidimensional theories of gravity and contains a number of original results obtained by the authors. Expository work is conducted for a mechanism of symmetries and fundamental constants formation. The original approach to nonlinear multidimensional gravity that is able to construct a unique perspective describing different phenomena is highlighted. Much of the content was previously presented only in journal publications and is new for book contents, e.g., on regular black holes, various scalar field solutions, wormholes and their stability, inflation, clusters of primordial black holes, and multidimensional gravity. The last two topics are added in this new edition of the book. The other chapters are also updated to include new discoveries like the detection of gravitational waves.

The End and the Beginning George Weigel, 2011-11-01 "As March gave way to April in the spring of 2005 and the world kept vigil outside the apostolic palace in Rome, the pontificate of Pope John Paul II, then drawing to a poignant end, was already being described as one of the most consequential in two millennia of Christian history." With these words, world-renowned author and NBC Vatican analyst George Weigel begins his long-awaited sequel to the international bestseller *Witness to Hope: The Biography of Pope John Paul II*. More than ten years in the making, *The End and the Beginning: Pope John Paul II—The Victory of Freedom, the Last Years, the Legacy* tells the dramatic story of the Pope's battle with communism in light of new and recently disclosed information and brings to a close Weigel's landmark portrait of a man who not only left an indelible mark on the Catholic Church, but also changed the course of world history. When he was elected pope in the fall of 1978, few people had ever heard of the charismatic Karol Wojty³a. But in a very short time he would ignite a revolution of conscience in his native Poland that would ultimately lead to the collapse of European communism and death of the Soviet Union. What even fewer people knew was that the KGB, the Polish Secret Police, and the East German Stasi had been waging a dangerous, decades-long war against Wojty³a and the Vatican itself. Weigel, with unprecedented access to many Soviet-era documents, chronicles John Paul's struggle against the dark forces of communism. Moreover, Weigel recounts the tumultuous last years of John Paul's life as he dealt with a crippling illness as well as the "new world disorder" and revelations about corruption within the Catholic Church. Weigel's thought-provoking biography of John Paul II concludes with a probing and passionate assessment of a man who lived his life as a witness to hope in service to the Christian ideals he embraced.

Communist Propaganda at School Joanna Wojdon, 2021-05-10 *Communist Propaganda at School* is based on an analysis of reading primers from the Soviet bloc and recreates the world as presented to the youngest schoolchildren who started their education between 1949 and 1989 across the nine Eastern European countries. The author argues that those first textbooks, from their first to last pages, were heavily laden with communist propaganda, and that they share similar concepts, techniques and even contents, even if some national specificities can be observed. This volume reconstructs the image of the world presented to schoolchildren in the first books they were required to read in their school life, and argues that the image was charged with communist propaganda. The book is based on the analysis of over sixty reading primers from nine countries of the Soviet bloc: Albania, Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland, Romania, the Soviet Union and Yugoslavia from the period. Written with simplicity and straightforwardness, this book will be a valuable resource, not only to international academics dealing with the issues of propaganda, censorship, education, childhood and

everyday life under communism in Eastern and Central Europe, but can also academics dealing with education under communism or with the content of primary education. It also brings educational experiences of the Soviet bloc to international researchers, in particular to researchers of education under totalitarian and authoritarian regimes.
