Not Just in Time Mark Ain, Jim Floyd, 2022 This engaging book relays how Mark Ain followed his grandmother's advice and forsook a plodding, mulish existence in the corporate world for the riskier and ultimately much more rewarding life of an entrepreneurial thoroughbred. Mark's role in the creation and growth of Kronos, a human capital management firm that now generates over \$3 billion in annual revenue and, as the Ultimate Kronos Group (UKG), has over 12,000 employees, provides many valuable lessons. For those seeking to either follow in Mark's entrepreneurial footsteps or foster an entrepreneurial culture within more established organizations, the principles behind his success are instructive--

Kronos Guy Adams, 2011-10-06 'What manner of monster can wreak such damage? I only hope you know how it can be stopped.' The peace of an English village is shattered when a young girl withers before her friend's eyes, becoming but dust and bones. Witnessing this terrifying transformation, local physician Dr Marcus fears the village has been cursed by the presence of evil. He immediately summons his old army friend, the mysterious but powerful vampire hunter, Kronos. Together with the help of his assistant Professor Grost, Kronos has dedicated his whole life to destroying vampires. He knows that there is nothing so varied and deadly. With a vampire nothing is certain, especially how one might be able to kill it. As more and more villagers fall prey to this deadly curse, time is against him. And when it comes dangerously close to home, Kronos is faced with a terrible choice...

The Cabinet of Wonders Marie Rutkoski, 2008-08-05 Marie Rutkoski's startling debut novel, the first book in the Kronos Chronicles, about the risks we take to protect those we love, brims with magic, political intrigue, and heroism. Petra Kronos has a simple, happy life. But it's never been ordinary. She has a pet tin spider named Astrophil who likes to hide in her snarled hair and give her advice. Her best friend can trap lightning inside a glass sphere. Petra also has a father in faraway Prague who is able to move metal with his mind. He has been commissioned by the prince of Bohemia to build the world's finest astronomical clock. Petra's life is forever changed when, one day, her father returns home - blind. The prince has stolen his eyes, enchanted them, and now wears them. But why? Petra doesn't know, but she knows this: she will go to Prague, sneak into Salamander Castle, and steal her father's eyes back. Joining forces with Neel, whose fingers extend into invisible ghosts that pick locks and pockets, Petra finds that many people in the castle are not what they seem, and that her father's clock has powers capable of destroying their world. *The Cabinet of Wonders* is a 2009 Bank Street - Best Children's Book of the Year.

Quantitative Problem Solving Methods in the Airline Industry Cynthia Barnhart, Barry Smith, 2011-12-22 This book reviews Operations Research theory, applications and practice in seven major areas of airline planning and operations. In each area, a team of academic and industry experts provides an overview of the business and technical landscape, a view of current best practices, a summary of open research questions and suggestions for relevant future research. There are several common themes in current airline Operations Research efforts. First is a growing focus on the customer in terms of: 1) what they want; 2) what they are willing to pay for services; and 3) how they are impacted by planning, marketing and operational decisions. Second, as algorithms improve and computing power increases, the scope of modeling applications expands, often re-integrating processes that had been broken into smaller parts in order to solve them in the past. Finally, there is a growing awareness of the uncertainty in many airline planning and operational processes and decisions. Airlines now recognize the need to develop 'robust' solutions that effectively cover many possible outcomes, not just the best case, "blue sky" scenario. Individual chapters cover: Customer Modeling methodologies, including current and emerging applications. Airline Planning and Schedule Development, with a look at many remaining open research questions. Revenue Management, including a view of current business and technical landscapes, as well as suggested areas for future research. Airline Distribution -- a comprehensive overview of this newly emerging area. Crew Management Information Systems, including a review of recent algorithmic advances, as well as the development of information systems that facilitate the integration of crew management modeling with airline planning and operations. Airline Operations, with consideration of recent advances and successes in solving the airline operations problem. Air Traffic Flow Management, including the modeling environment and opportunities for both Air Traffic Flow Management and the airlines.
