*Krzysztof Gołuch : co siódmy* Krzysztof Gołuch,2017

**First march of gentlemen** Rafał Milach,2017 The First March of Gentlemen is a fictitious narrative composed of authentic stories. Historical events related to the town of Września came to be the starting point for reflection on the protest and disciplinary mechanisms. In the series of collages, the reality of the 1950s Poland ruled by the communists blends with the memory of the Września children strike from the beginning of the 20th century. This shift in time is not just a coincidence, as the problems which the project touches upon are universal, and may be seen as a metaphor for the contemporary social tensions.

**A new polyphony of art and history** Ewa Chojecka,2016

**Alchemization of the Mind** Zbigniew Białyas,Krzysztof Kowalczyk-Twarowski,2003 Map a wide range of cultural and literary discourses, from Reformation theology to reader-response criticism to modern fiction.

**Nearly Every Rose on the Barriers in Front of the Parliament** ,2018\* The pictures in the book were taken in Warsaw in July 2017 during public protests against the controversial judicial reform proposed by the ruling right-wing Law and Justice party. Initiated at the time, the makeover of the judiciary was finally completed by the Polish government in July 2018, strongly undermining the separation of powers in Poland. The photographic collection of the white roses that the protesters attached as symbols of non-violent resistance to the crowd-control barriers in front of the Parliament is banal and accidental. It echoes the simple, non-heroic gestures made during the series of demonstrations in the summer of 2017.--Sleeve.

**Ravishing interiors, frontiers of light on the novels of J. M. Coetzee** Krzysztof Kowalczyk-Twarowski,2002

**Ebony, Ivory, & Tea** Zbigniew Białyas,Krzysztof Kowalczyk-Twarowski,2004

**Glebae Adscripti** Krzysztof Kowalczyk-Twarowski,2005 The experience of place forms the backbone of American literary culture. The present book studies the kind of character to which this process gave rise as well as two specific discourses: West Coast Orientalism and the rhetoric of New York dynamism. Syncretistic readings engage with both American life and letters.

*Democratic Elections in Poland, 1991-2007* Frances Millard,2009-10-16 This book is a political history of democratic elections in Poland from the first fully competitive parliamentary elections in 1991 to the unexpected, most recent election in 2007. Until now, there has been no equivalent study covering similar developments in this, or any other, post-communist country; this book fills the gap and provides a detailed electoral perspective on the trajectory of political development in the context of post-authoritarian change. It also provides an invaluable account of the evolution of electoral processes and institution-building in the context of democratic regime development. The major themes of the book centre on the complex, problematic development of Poland's political parties and the parties' failure to gain public support and win the confidence of the electorate. Frances Millard examines the failure of Polish elites; the lack of a stable party system and how elections have had a destabilizing effect, and she argues that the interaction of leadership volatility, party volatility, and electoral volatility have created uncertainty and undermined political parties as effective vehicles of representation. Poland is a large and important country, worthy of study in its own right, but equally many of the problems experienced are not unique to Poland; so this book also constitutes a comparative benchmark for analysis of democratic developments elsewhere.

**Embodying Pragmatism** Wojciech Małecki,2010 Embodying Pragmatism is the first monograph in English devoted to Richard Shusterman, an internationally renowned philosopher and one of today's most innovative thinkers in pragmatism and aesthetics. The book presents a comprehensive account of Shusterman's principal philosophical ideas concerning pragmatism, aesthetics, and literary theory (including such themes as interpretation, aesthetic experience, popular art, and human embodiment - culminating in his proposal of a new discipline called «somaesthetics»). As Shusterman's philosophical writings involve a dialogue with both analytic and continental traditions, this monograph not only offers a critical vision of contemporary pragmatist thought but also situates Shusterman and pragmatism within the current state of theory.

**Transgressing Boundaries in Jeanette Winterson's Fiction** Sonia Front,2009 The subsequent chapters of the book deal with selected questions from Jeanette Winterson's fiction, such as gender issues, love and eroticism, language and time, constituting areas within which Winterson's characters seek their identity. As they contest and repudiate clichés, stereotypes and patterns, their journey of self-discovery is accomplished through transgression. The book analyzes how the subversion of phallogocentric narrative and scenarios entails the reenvisioning of relations between the genders and reconceptualization of female desire. The author attempts to determine the consequences of Winterson's manipulations with gender, sexuality and time, and her disruption of the binary system.

**The Rhetoric of the City** Paweł Marcinkiewicz,2009 Originally presented as the author's thesis (doctoral--University of Opole)

**Triticale: Today and Tomorrow** Henrique Guedes-Pinto,Norman Darvey,Valdemar P. Carnide,2012-12-06 Triticale's days as a scientific curiosity are definitely over. Its wide acceptance as a feed, grain or forage crop, or for baking and malting, plus its high yields under marginal or stress conditions have made it an economically important crop in countries such as Poland, Germany, Australia, Portugal, Brazil, Morocco and China. This publication contains selected, reviewed, and up-to-date papers presented at the Third International Triticale Symposium held in Lisbon, Portugal, by the International Triticale Association and EUCARPIA. Among the broad spectrum of subjects addressed in these presentations are cytogenetics, biotechnology, genetic resources, breeding, agronomic practices and diseases. Also included are triticale's food, feed and forage uses, as well as its marketing processes. In a world of increasing population and decreasing agricultural resources, triticale offers a genuine solution for increasing land utilization and grain production.

*"This Isthmus of a Middle State"* Krzysztof Kowalczyk-Twarowski,2009

**Post-Communist Democracies and Party Organization** Margit Tavits,2013-06-24 Scholars of post-communist politics often argue that parties in new democracies lack strong organizations - sizable membership, local presence, and professional management - because they do not need them to win elections and they may hinder a party's flexibility and efficiency in office. Post-Communist Democracies and Party Organization explains why some political parties are better able than others to establish themselves in new democracies and why some excel at staying unified in parliament, whereas others remain dominated by individuals. Focusing on the democratic transitions in post-communist Europe from 1990 to 2010, Margit Tavits demonstrates that the successful establishment of a political party in a new democracy crucially depends on the strength of its organization. Yet not all parties invest in organization development. This book uses data from ten post-communist democracies, including detailed analysis of parties in the Czech Republic, Estonia, Hungary, and Poland.

The Olsztyn Group in the Early Medieval Archaeology of the Baltic Region Mirosław Rudnicki,2018-11-26 This volume deals with the neglected problem of the Olsztyn Group. The prosperity and long-distance contact revealed by this cemetery shows that the West Baltic tribes had considerable influence in early medieval Europe, much more than scholars had been ready to admit until now.

*Civic and Uncivic Values in Poland* Sabrina P. Ramet,Kristen Ringdal,Katarzyna Dołpia-Borysiak,2019-07-18 Poland, like many societies across the world, is becoming more polarized in diverse areas of life, as contending forces seek to advance incompatible agendas. The polarization over values in Polish politics was evident already before communism collapsed but became more obvious in the following years and reached a crescendo after the October 2015 parliamentary elections, which brought a right-wing party into power. This volume focuses on the years since 1989, looking at the clash between civic values (the rule of law, individual rights, tolerance, respect for the harm principle, equality, and neutrality of the state in matters of religion) and uncivic values (the rule of a dictator or dictatorial party, contempt for individual rights, bigotry, disrespect for the harm principle, unequal treatment of people whether through discrimination or through exploitation, and state favoritism of one religion over others). The authors address voting behavior, political parties, anti-Semitism, homophobia, the role of the Catholic Church, and reflections in history textbooks, film, and even rock music. This volume makes clear that for the foreseeable future the conflict in Poland between traditional, conservative values and liberal, civic values is likely to continue, provoking tensions and protests.

**The Self Industry** Jarosław Szurman,Agnieszka Woźniakowska,Krzysztof Kowalczyk-Twarowski,2015

**About Polska** ,2015

Transforming the Transformation? Michael Minkenberg,2015-03-24 Transforming the transformation? The East European Radical Right in the Political Process examines the significance of radical right parties, along with other organizations, in terms of their involvement in the political process of new democracies. This groundbreaking study highlights firstly the radical right's interaction with other political actors, such as parties, governments and interest groups, in their respective countries. Secondly, the contributors analyze the effects of such interaction with regard to agenda setting and policies in loaded policy fields, namely minorities and immigration, law and order, religion, territorial issues and democratization. Through an examination of the role of radical right actors in political processes and an assessment of the resulting measurable outcomes, this book shows how policies, election results and regime changes indicate shifts away from the liberal-democratic order institutionalized in the course of post-Communist transformation. Offering a unique cross-national comparison of particular facets and themes, as well as in-depth analysis of country cases, this book will be of interest to undergraduate and postgraduate students, as well as scholars, of European politics and far right studies.
