[XSS Attacks](#) Seth Fogie, Jeremiah Grossman, Robert Hansen, Anton Rager, Petko D. Petkov, 2011-04-18 A cross site scripting attack is a very specific type of attack on a web application. It is used by hackers to mimic real sites and fool people into providing personal data. XSS Attacks starts by defining the terms and laying out the ground work. It assumes that the reader is familiar with basic web programming (HTML) and JavaScript. First it discusses the concepts, methodology, and technology that makes XSS a valid concern. It then moves into the various types of XSS attacks, how they are implemented, used, and abused. After XSS is thoroughly explored, the next part provides examples of XSS malware and demonstrates real cases where XSS is a dangerous risk that exposes internet users to remote access, sensitive data theft, and monetary losses. Finally, the book closes by examining the ways developers can avoid XSS vulnerabilities in their web applications, and how users can avoid becoming a victim. The audience is web developers, security practitioners, and managers. XSS Vulnerabilities exist in 8 out of 10 Web sites. The authors of this book are the undisputed industry leading authorities. Contains independent, bleeding edge research, code listings and exploits that can not be found anywhere else.

[Landscape and Power in Geographical Space as a Social-Aesthetic Construct](#) Olaf Kühne, 2018-02-13 This book examines the power definiteness of landscape from a social constructivist perspective with a particular focus on the importance of aesthetic concepts of landscape in development. It seeks to answer the question of how societal notions of landscape emerge, how they are individually updated and how these ideas affect the use and design of physical space. It also analyzes how physical manifestations of societal activity impact on understandings of individual and societal landscapes and addresses the essential aspect of the social construction of landscape, cultural specificity, which in turn is discussed in the context of the expansion of a western landscape concept. The book offers an unprecedented, comprehensive and detailed examination of societal power relations in the context of landscape development. The numerous case studies from the physical manifestation of modern spatial planning in the United States, the power discourses concerning the design of model railway landscapes, and the medial production of stereotypical landscape notions shed light on the complex and multilayered interactions of collective and individual landscape references. It is a valuable resource for geographers, sociologists, landscape architects, landscape planners and philosophers.

[Distinktion - Macht - Landschaft](#) Olaf Kühne, 2008-12-22 Die vorliegende Arbeit befasst sich mit dem Macht- und Distinktionsvermittelten Verhältnis der Gesellschaft zu Landschaften. Landschaften werden dabei in erster Linie nicht als physisch gegeben betrachtet, sondern als sozial konstruiert und in den physischen Raum projiziert. Dabei wird die Frage behandelt, mit welchen Macht- und Distinktionsmechanismen Landschaft definiert wird. Hierbei werden ästhetische Bezüge ebenso hergestellt wie naturschutzfachliche und planerische. Die theoretische Grundlage der Arbeit liegt insbesondere in der Soziologie von Pierre Bourdieu.
