A Great Secret - Did The USA Lose The War In Vietnam On Purpose Quy Ky Vu, 2023-10-31 The relationship between Saigon and Washington had been under strain in view of differences that existed in many key aspects of policy, and strategy, manifested at many levels of human interaction. The alliance had been in trial and error mode, in view of embarrassing gaffes and diplomatic bumps on the learning curve of both sides. The alliance had in fact been founded on the assumption that both sides share the same vital interest, an assumption correct on an abstract, conceptual level. In implementing the policy on a human level, however, the cultural complexity of various geographical areas in Vietnam proved overwhelming for State Department officials, especially at upper levels. On the other side, their Vietnamese counterparts encountered similar frustrations in dealing with their American partners. With great effort to overcome these obstacles, both sides in the alliance tried to smooth out differences and ameliorate the troubled relationship. Unfortunately, as will be shown in Chapter 1, political distractions in diplomatic relations caused multifaceted frictions, and eventual degeneration into a disastrous crisis, one that ruptured the first Republic and led to the death of President Ngô Đình Diệm and two of his brothers...

Optimal Discrete Control Theory Ky M. Vu, 2007-08

Fundamental Mathematical Modeling of Additive Manufacturing Juha Jeronen, Tero Tuovinen, Matti Kurki, 2024-01-08

This book elucidates the fundamental thermomechanical behaviour inherent in the 3D printing process within a laser-based powder bed fusion (L-PBF) system. It presents foundational concepts and provides in-depth derivations of the governing equations. The analysis encompasses arbitrary anisotropic linear viscoelastic materials, accounting for thermal effects. The authors leverage the theory of axially moving materials, a framework previously employed in the analysis of production processes within the process industry. They introduce a coordinate frame that moves in tandem with the printing laser, adopting an Eulerian perspective towards the in-motion solid. Designed for graduate students and researchers, this book is poised to foster a profound comprehension and spur innovative technological advancements in the realm of additive manufacturing.

Vietnam David G. Marr, 2013-04-15 Amidst the revolutionary euphoria of August 1945, most Vietnamese believed that colonialism and war were being left behind in favor of independence and modernization. The late-September British-French coup de force in Saigon cast a pall over such assumptions. Ho Chi Minh tried to negotiate a mutually advantageous relationship with France, but meanwhile told his lieutenants to plan for a war in which the nascent state might have to survive without allies. In this landmark study, David Marr evokes the uncertainty and contingency as well as coherence and momentum of fast-paced events. Mining recently accessible sources in Aix-en-Provence and Hanoi, Marr explains what became the largest, most intense mobilization of human resources ever seen in Vietnam.

Quasi-One-Dimensional Organic Superconductors Zhang Wei, De Melo Carlos A R Sa, 2018-06-22 The book includes a thorough description of a wide range of physical properties of organic superconductors of reduced dimensionality. The authors start with an overview of the field followed by a background discussion and selected experimental topics. A critical discussion of theoretical proposals is presented under the constraints of experimental observations and exciting possibilities for the symmetry of the order parameter are presented, including the cases of inhomogeneous superconducting states and triplet superconductivity. The possible origins of Cooper pairing are explored and tests to detect experimentally the pairing symmetry are described in detail. The book ends with a discussion of important open questions, where the search for their answers will keep the field alive for the next

decade.

The Nature of the Cairngorms Philip Shaw, Des B.A. Thompson, 2006-06-12 The Cairngorms area is arguably the most significant for nature conservation in the British Isles and contains its largest National Park. In this book, 35 authors, drawing on published and unpublished sources, present an up-to-date review of the area's natural features, including plants, animals, habitats, geology and landforms. The review falls into three parts. The first and largest part describes the area's rich diversity of nature, with each chapter summarising recent research findings, trends and conservation issues for a different landform, habitat or species group. The second part considers deer management, recreation and projected climate change impacts. Part three focuses on rare and threatened species, and identifies areas and habitats rich in species for which the Cairngorms are nationally and internationally important.

Romancing Vietnam Justin Wintle,2006 When the Vietnam War finally ended in April 1975 with the communist capture of Saigon, Vietnam itself became a closed country, out of bounds to western travellers and journalists. By 1989, however, such was Vietnams economic plight that the government decided the time had come to open its doors again, albeit most gingerly. By a stroke of good fortune Justin Wintle became the first writer from the West to be allowed to journey around the whole of Vietnam. This is Justin Wintles classic account of what he found in postwar Vietnam, and how, for three months, he played cat and mouse with those charged with keeping him in line, while developing a profound love for more ordinary Vietnamese and the astonishing landscapes they inhabit.

Yin Yang Ky M. Vu,2017-11-30 In this book, the author unravels the mysterious science, yin and yang, of the Far East and discusses its practical applications to common but important topics of our daily life: food, nutrition, health and medicine. For questions that have boggled the mind of scientists like the mystery of the powers of a pyramid or the incomprehensible movements of Tai Chi or the disappearing of some diseases or the warm weather of Siberia millennia ago and also the biblical question: Did Eve eat an apple or a pomegranate?, the author provides clear explanations with a conviction, through the yin and yang spectacles. The most important question of mankind is the world peace formula: It has been found thousands of years ago, and it is also presented in this book.
