*International Migration, Immobility and Development* Tomas Hammar, Grete Brochmann, Kristof Tamas, Thomas Faist, 2021-01-08 The study of international migration and ethnic relations is rapidly expanding in the social sciences, in the humanities, and in law and medicine at universities around the world. Theories and methods are borrowed from many disciplines, but with little cross-fertilization, thereby leaving many core issues out. This authoritative book fills a gap by providing an expertly integrated overview of international migration from a wide range of disciplinary perspectives. Throughout the book, South to North migration is used as the main example. The authors, leading experts in their fields, ask provocative new questions such as the counterfactual, 'Why do people not migrate?' and address old questions in fresh ways in a language accessible for students in a range of disciplines. Does migration from less developed countries stimulate or obstruct development? Does development reduce or increase the flows of migration? What are the dynamics of a migration process? Geography, economics, political science, social anthropology and sociology all inform this book, which is certain to become an established text in migration studies.

Turks in Europe Nermin Abadan-Unat, 2011-05 One of the foremost scholars on Turkish migration, the author offers in this work the summary of her experiences and research on Turkish migration since 1963. During these forty years her aim has been threefold: to explain the journeys made by thousands of Turkish men and women to foreign lands out of choice, necessity, or invitation; to shed light on the difficulties they faced; and to elaborate on how their lives were affected by the legal, political, social, and economic measures in the countries where they settled. The extensive research done both in Turkey and in Europe into the lives of individuals directly and indirectly affected by the migration phenomenon and the examination of these research results further enhances the value of this wide-ranging study as a definitive reference work.

**The Age of Migration** Stephen Castles, Hein Gysbert de Haas, Hein de Haas, Mark J Miller, 2014 This leading text in the field provides a comprehensive assessment of the nature, extent and dimensions of international population movements and of their consequences. Thoroughly revised and updated, the 5th edition assesses the impact of the global economic crisis for migration and includes new material on climate change and migration.

**The Capital of Intelligence-the Intelligence of Capital** , 2009  
**The United Nations world water development report 2018** WWAP, 2018-03-26  
*Beyond Scarcity* World Bank, 2017-12-13 Water has always been a source of risks and opportunities in the Middle East and North Africa. Yet rapidly changing socioeconomic, political, and environmental conditions make water security a different, and more urgent, challenge than ever before. This report shows that achieving water security means much more than coping with water scarcity. It means managing water resources in a sustainable, efficient, and equitable way. It also involves delivering water services reliably and affordably, to reinforce relationships between service providers

and water users and contribute to a renewed social contract. Water security also entails mitigating water-related risks such as floods and droughts. Water security is an urgent target, but it is also a target within reach. A host of potential solutions to the region's water management challenges exist. To make these solutions work, clear incentives are needed to change the way water is managed, conserved, and allocated. To make these solutions work, countries in the region will also need to better engage water users, civil society, and youth. The failure of policies to address water challenges can have severe impacts on people's well-being and political stability. The strategic question for the region is whether countries will act with foresight and resolve to strengthen water security, or whether they will wait to react to the inevitable disruptions of water crises.

**World Food Situation** United States. Office of Foreign Agricultural Relations, 1946

*Essentials of migration management* Erica Usher, 2004

*Progress on drinking-water, sanitation and hygiene* World Health Organization, 2017-10-16 This report presents the first ever estimates of the population using 'safely managed' drinking water and sanitation services - meaning drinking water free from contamination that is available at home when needed, and toilets whereby excreta are treated and disposed of safely. It also documents progress towards ending open defecation and achieving universal access to basic services. The report identifies a number of critical data gaps that will need to be addressed in order to enable systematic monitoring of Sustainable Development Goal (SDG) targets and to realize the commitment to 'leave no one behind'.--Publisher's description.

**Water and Conflict** Peter H. Gleick, 1992

**Out of Water** Colin Chartres, Samyuktha Varma, 2010-07-14 From cities to biofuels, competition for water is accelerating. Climate change threatens to intensify the onset and severity of the water crisis in several regions of the developing world: this is already happening throughout much of Asia, the Mediterranean, southwestern Australia, and the southwestern US. Along with water shortages, unsafe water becomes an increasingly widespread problem, too. As water crises trigger food and health crises, billions may slip further into poverty, leading to greater social and political unrest, new wars, and worsening national security. *Out of Water* doesn't just illuminate the coming global water crisis: it presents innovative solutions in agriculture, engineering, governance, and beyond, including state-of-the-art techniques for integrated water management. This book will help raise the level of debate about water to the highest levels of government, and identify workable reforms and incentives to help water users utilize this crucial resource far more efficiently.
