**Understanding Contemporary Korea from a Russian Perspective** Anatoly Torkunov, Georgy Toloraya, Ilya Dyachkov, 2022-08-26 This book presents a comprehensive overview of political and economic developments as well as security issues in the Korean Peninsula during 2008–2020 from a Russian perspective. The authors offer a rich analysis of domestic affairs in both Korean states and the international situation they act in. The book's first section, Diverging Development Paths, analyzes the evolution of North and South Korea in the early twenty-first century. The next section, The Nuclear Challenge, assesses Seoul's and Pyongyang's foreign policy options within ever-changing domestic and international circumstances – under the looming nuclear shadow. The final section, Partnering with Russia, presents an unprecedented first-hand account of Seoul's and Pyongyang's dealings with Moscow. The book provides a unique account with expertise from Russia, one of the four states directly involved in Korean affairs, providing insights on domestic and diplomatic decision-making of the two Korean states and international efforts to resolve the nuclear issue.

**Proceedings of CECNet 2022** A.J. Tallón-Ballesteros, 2022-12-29 Electronics, communication and networks coexist, and it is not possible to conceive of our current society without them. Within the next decade we will probably see the consolidation of 6G-based technology, accompanied by many compatible devices, and fiber-optic is already an advanced technology with many applications. This book presents the proceedings of CECNet 2022, the 12th International Conference on Electronics, Communications and Networks, held as a virtual event with no face-to-face participation in Xiamen, China, from 4 to 7 November 2022. CECNet is held annually, and covers many interrelated groups of topics such as electronics technology, communication engineering and technology, wireless communications engineering and technology and computer engineering and technology. This year the conference committee received 313 submissions. All papers were carefully reviewed by program committee members, taking into consideration the breadth and depth of research topics falling within the scope of the conference, and after further discussion, 79 papers were selected for presentation at the conference and for publication in this book. This represents an acceptance rate of about 25%. The book offers an overview of the latest research and developments in these rapidly evolving fields, and will be of interest to all those working with electronics, communication and networks.

**The European Union and East Asia** Christopher M. Dent, 2013-01-11 The world economy continues to be dominated by the Triad regions: Europe, North America and East Asia. This text analyses the economic relationship that has evolved between two Triadic powers: The EU and East Asia, and its future prospects, especially in the wake of the recent financial crises that have shaken the East Asian region. This text argues that the EU must afford greater priority by promoting its economic relations with East Asia. By this remaining the weakest Triadic link, the EU risks future geopolitical marginalization as the transpacific axis strengthens into the 21st century.

*The Routledge Handbook of the Political Economy of Sanctions* Ksenia Kirkham, 2023-10-31 The Routledge Handbook of the Political Economy of Sanctions examines the core issues and debates surrounding this controversial topic, introducing readers to essential concepts and terms. It communicates the evolving character of international sanctions from diverse perspectives, with a particular emphasis on questions of efficacy, legality, and legitimacy of sanctions, as well as the mechanisms by which they are applied. This interdisciplinary book explores the international political economy of sanctions in the constantly changing context of geopolitical rivalry. The authors investigate various theoretical and historical approaches to sanctions and apply these to specific case studies, such as the African Union, China, Cuba, India, Russia, Turkey, and the United States. The book gives a voice to sanctioned states and considers the impact of secondary sanctions. It analyses sanctions with reference to wider political debates such as national security, state sovereignty, economic warfare, and sustainability. This handbook will be of immense interest to students,

researchers, and scholars in the fields of political economy, international sanctions, political science, international relations, and foreign policy. It will also be useful for all those employed by political institutions, businesses, and nongovernmental organisations when assessing current sanctions regimes.

**Recognition and Enforcement of Foreign Arbitral Awards in Russia and Former USSR States** Roman Zykov, 2021-04-22 The 15 sovereign states that emerged from the dissolution of the Union of Soviet Socialist Republics (USSR) in 1991, having all adopted the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards, today are drawing increasing attention from international law firms and global arbitral institutions. This book, compiled under the editorship of the Secretary General of the Russian Arbitration Association, is the first full-scale commentary in English on the application of the New York Convention in Russia and the other 14 former USSR states, with attention also to the various relevant national laws and procedures. A total of 71 contributors, all leading experts on arbitration and litigation in the covered jurisdictions, provide in-depth research encompassing the following approaches: article-by-article commentary on the New York Convention with emphasis on the practice of Russian state commercial (arbitrazh) courts; commentary on the relevant provisions of the Russian International Commercial Arbitration Law and the Code of Commercial Procedure; analysis of law and practice on setting aside, recognition, and enforcement of arbitral awards in all non-Russian former USSR states, state by state, written by experts in each jurisdiction; and a unique statistical study of all international commercial arbitration cases under the New York Convention conducted in Russia between 2008 and 2019, showing which grounds of the New York Convention are widely used by the Russian courts in different instances. With this detailed information, practitioners will be able to understand how judicial developments in the covered jurisdictions have impacted the enforceability of arbitral awards, and how parties can take steps to ensure that they secure enforceable awards. In addition, they will clearly discern the enforcement track record for arbitral awards in Russia and former USSR states and how each jurisdiction treats enforcement applications, greatly clarifying decisions on choices by parties and determination of seat of arbitration. Because this book makes arbitration law and procedure in Russia and the former USSR states accessible for the first time in English – thus assisting evaluation of prospects of enforcing foreign arbitral awards in that part of the world – it will be warmly welcomed by in-house counsel, arbitrators, arbitral institutes, judges, researchers, and academics focused on international arbitration.

**Managing Impressions with Information Technology** Jon W. Beard, 2004-10-30 The contributors to this volume demonstrate the evolving ways in which impression management is conducted through the use of information technology. Whether consciously or unconsciously, individuals create and manage impressions of themselves when they use or interact with IT or in an IT environment. How? By managing the symbolism embedded in the technology. For example, technology is often the primary medium in interactions between a client and a work team, or virtual team, dedicated to servicing the needs of that client. The team itself may be geographically dispersed, lending a deeper layer to the management of impressions among members of the team via their use of technology, including e-mail, groupware, videoconferencing, and Intranet development. Researchers in the behavioral effects and consequences of information technology will find much of value here. This book is also of interest to information technology practitioners and professors alike who work with or study the broader organizational and individual signals, perceptions, and effects of IT-related decisions. Graduate students will find it appropriate as supplemental reading for courses on the organizational implications of IT, the behavioral effects of IT, the impact of IT on corporate strategy, and the impact of organizational design decisions.

Cultural Translation of Management Philosophy in Asian Companies Izumi Mitsui, 2019-11-30 This book discusses management philosophy based on case studies in companies in Japan, Korea and

China. In an era of increasing globalization and the internet society, it is time for companies to re-examine their mission and existence. Repeated corporate scandals and global environmental issues have revealed the need for CSR (corporate social responsibility) and business ethics. At the same time, cross-cultural conflicts in the workplace highlight the necessity for management to integrate multiple values. In other words, the importance of value in a company has to be reconsidered. This timely book re-evaluates the issue of management philosophy in the context of the global society. It approaches the issue of management philosophy from the perspective of keiei-jinruigaku, the anthropology of business administration, presenting interdisciplinary research consisting of fields such as management studies, anthropology, religious studies and sociology. By focusing on the phenomena of transmission of management philosophy to other areas by cultural translation, the book reveals the dynamic process of the global transmission of management philosophy.

**Policing Northeast Asia** Se Hyun Ahn, 2020-06-02 This book explores the progress in and the obstacles surrounding developing comprehensive security cooperation between Russia and South Korea since diplomatic relations were established in 1991 within the framework of economic security. The book focuses on oil and natural gas projects, linking the Trans-Siberian and Trans-Korean

Railroads, industrial development in the Nakhodka Free Economic Zone, fishery cooperation, and the arms trade, and examines whether these five aspects of cooperation serve to contribute to building Russian-South Korean bilateral and regional economic security. The author argues that these five aspects of cooperation all have the potential to enhance comprehensive bilateral security and further regional economic security in Northeast Asia. However, Russian-South Korean economic cooperation has been hampered by a number of obstacles, including domestic factors as well as external factors, and prevented Russia and South Korea from fulfilling their potential for creating a cooperative comprehensive security relationship. The author concludes with an assessment on the utility of the concept of multi-dimensional security cooperation as a framework for studying and improving the prospects for Russian-South Korean bilateral relations.
