Winning the B2B Sale in China C J Ng,2021-10-23 Charlie knew if he were to give his client enough money, this could be the key differentiator in a highly competitive industry. He knew this customer was in the bag, so to speak. He had the guanxi. Unfortunately for Charlie the client eventually bought from someone else and not from Charlie. Thinking the competitor might have given more money than he did, Charlie tried to ask his client if his offer was too low. The client politely told Charlie the competitor did not offer any bribes at all. They won the bid because they paid more attention to the client's company's needs, not his financial situation. The client thanked Charlie for his thoughtfulness, and told Charlie to keep in touch. A few months later, a whistleblower exposed Charlie's under the table practices, and both Charlie and his distributor were arrested. Charlie's boss was not spared, either. He was fined, and promptly fired from his job for not safeguarding the reputation and integrity of the company... ..

Abie's Irish Rose Anne Nichols,1927 During World War I, Abie Levy, a soldier in the A. E. F., is wounded in combat. While recovering in a hospital, he meets Rosemary Murphy, an entertainer. They fall in love, return to the United States, and get married in an Episcopal church in Jersey City. Abie takes Rosemary to his home and introduces her as his sweetheart, Rosie Murpheski; they are then married by a rabbi. Mr. Murphy arrives with a priest and, amid discord and discontent, the young people are married again, this time by the priest. Disowned by both families, Rosemary and Abie are befriended only by the Cohens. On Christmas Eve, the Cohens and their rabbi persuade Solomon to see his son and his new grandchildren; the priest urges Mr. Murphy to do the same. This surprise visit begins in acrimony, but ends peacefully as Rosemary presents her newborn twins: Patrick Joseph, named for her father, and Rebecca, named for Abie's dead mother.

Serious Justice Jen Calleja,2016 Poetry. SERIOUS JUSTICE is the highly anticipated debut collection from writer, translator, editor and musician Jen Calleja. The collection captures the memories, fears and uncertainties of the millennial generation, attempting to define an unstable and disintegrating sense of belonging. The poems address issues of responsibility, injustice, sexism, revenge, misfortune, forgiveness and regret. They are the poems of an 'unfinished adult,' nostalgic for a comparatively carefree recent past, and apprehensive at the prospect of an unknown future.

Bury Me Standing Isabel Fonseca,2011-09-14 A masterful work of personal reportage, this volume is also a vibrant portrait of a mysterious people and an essential document of a disappearing culture. Fabled, feared, romanticized, and reviled, the Gypsies—or Roma—are among the least understood people on earth. Their culture remains largely obscure, but in Isabel Fonseca they have found an eloquent witness. In *Bury Me Standing*, alongside unforgettable portraits of individuals—the poet, the politician, the child prostitute—Fonseca offers sharp insights into the humor, language, wisdom, and taboos of the Roma. She traces their exodus out of India 1,000 years ago and their astonishing history of persecution: enslaved by the princes of medieval Romania; massacred by the Nazis; forcibly assimilated by the communist regimes; evicted from their settlements in Eastern Europe, and most recently, in Western Europe as well. Whether as handy scapegoats or figments of the romantic imagination, the Gypsies have always been with us—but never before have they been brought so vividly to life. Includes fifty black and white photos.

The Future of Creative Work Greg Hearn,2020-09-25 The Future of Creative Work provides a unique overview of the changing nature of creative work, examining how digital developments and the rise of intangible capital are causing an upheaval in the social institutions of work. It offers a profound insight into how this technological and social evolution will affect creative professions.

Digital Participation through Social Living Labs Michael Dezuanni, Marcus Foth, Kerry Mallan, Hilary Hughes,2017-08-16 Digital Participation through Social Living Labs connects two largely separate debates: On the one hand, high speed internet access and associated technologies are often heralded as a means to bring about not only connectivity, but also innovation, economic development, new jobs, and regional prosperity. On the other hand, community development research has established that access by itself is necessary but not sufficient to foster digital participation for the broadest possible range of individuals. Edited by leading scholars from the fields of education, youth studies, urban informatics, librarianship, communication technology, and digital media studies, this book is positioned as a link to connect these debates. It brings together an international collection of empirically grounded case studies by researchers and practitioners from diverse backgrounds. They advance knowledge that fosters digital participation by identifying the specific digital needs, issues and practices of different types of communities as they seek to take advantage of access to digital technologies. Collectively, these cases propose new ways for enabling residents to develop their digital confidence and skills both at home and in their local community, particularly through a 'social living labs' approach. The book is organised around key focus areas: digital skills enhancement, youth entrepreneurship, connected learning, community digital storytelling, community-led digital initiatives and policy development.

Design and Ethics Emma Felton,Oksana Zelenko,Suzi Vaughan,2013-06-19 The value of design for contributing to environmental solutions and a sustainable future is increasingly recognised. It spans many spheres of everyday life, and the ethical dimension of design practice that considers environmental, social and economic sustainability is compelling. Approaches to design recognise design as a practice that can transform human experience and understanding, expanding its role beyond stylistic enhancement. The traditional roles of design, designer and designed object are therefore redefined through new understanding of the relationship between the material and immaterial aspects of design where the design product and the design process are embodiments of ideas, values and beliefs. This multi-disciplinary approach considers how to create design which is at once aesthetically pleasing and also ethically considered, with contributions from fields as diverse as architecture, fashion, urban design and philosophy. The authors also address how to teach design based subjects while instilling a desire in the student to develop ethical work practices, both inside and outside the studio.

Transmedia Practice: A Collective Approach Debra Polson,Ann-Marie Cook,JT Velikovsky,Adam L. Brackin,2019-01-04

School Spaces for Student Wellbeing and Learning Hilary Hughes,Jill Franz,Jill Willis,2019-02-21 This book introduces a new wellbeing dimension to the theory and practice of learning space design for early childhood and school contexts. It highlights vital, yet generally overlooked relationships between the learning environment and student learning and wellbeing, and reveals the potential of participatory, values-based design approaches to create learning spaces that respond to contemporary learners' needs. Focusing on three main themes it explores conceptual understandings of learning spaces and wellbeing; students' lived experience and needs of learning spaces; and the development of a new theory and its practical application to the design of learning spaces that enhance student wellbeing. It examines these complex and interwoven topics through various theoretical lenses and provides an extensive, current literature review that connects learning environment design and learner wellbeing in a wide range of educational settings from early years to secondary school. Offering transferable approaches and a new theoretical model of wellbeing as flourishing to support the design of innovative learning environments, this book is of interest to researchers, tertiary educators and students in the education and design fields, as well as school administrators and facility managers, teachers, architects and designers.

Street Computing Marcus Foth,Markus Rittenbruch,Ricky Robinson,Stephen Viller,2016-04-08 This book develops tools and techniques that will help urban residents gain access to urban computing. Metaphorically speaking, it is taking computing to the street by giving the general public – rather than just researchers and professionals – the power to leverage available city infrastructure and create solutions tailored to their individual needs. It brings together five articles that are based on presentations given at the Street Computing Workshop held on 24 November 2009 in Melbourne in conjunction with the Australian Computer-Human Interaction conference (OZCHI 2009). This volume focuses on applying urban informatics, urban and community sensing and open application programming interfaces (APIs) to the public space through the delivery of online services, on demand and in real time. It then offers a case study of how the city of Singapore has harnessed the potential of an online infrastructure so that residents and visitors can access services electronically. This book was published as a special issue of the Journal of Urban Technology.

Civic Media Eric Gordon,Paul Mihailidis,2016-06-10 Examinations of civic engagement in digital culture—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Countless people around the world harness the affordances of digital media to enable democratic participation, coordinate disaster relief, campaign for policy change, and strengthen local advocacy groups. The world watched as activists used social media to organize protests during the Arab Spring, Occupy Wall Street, and Hong Kong's Umbrella Revolution. Many governmental and community organizations changed their mission and function as they adopted new digital tools and practices. This book examines the use of “civic media”—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Scholars from a range of disciplines and practitioners from a variety of organizations offer analyses and case studies that explore the theory and practice of civic media. The contributors set out the conceptual context for the intersection of civic and media; examine the pressure to innovate and the sustainability of innovation; explore play as a template for resistance; look at civic education; discuss media-enabled activism in communities; and consider methods and funding for civic media research. The case studies that round out each section range from a “debt resistance” movement to government service delivery ratings to the “It Gets Better” campaign aimed at combating suicide among lesbian, gay, bisexual, transgender, and queer youth. The book offers a valuable interdisciplinary dialogue on the challenges and opportunities of the increasingly influential space of civic media.

Creating Great Places Debra Flanders Cushing,Evonne Miller,2019-10-16 This book provides a bold vision and roadmap for creating great places. Imagining and designing urban environments where all people thrive is an extraordinary task, and in this compelling narrative, Cushing and Miller remind us that theory is a powerful starting point. Drawing on international research, illustrated case studies, personal experiences, as well as fascinating examples from history and pop culture, this practical book provides the reader with inspiration, guidance and tools. The first section outlines six critical theories for contemporary urban design - affordance, prospect-refuge, personal space, sense of place/genius loci, place attachment, and biophilic design. The second

section, using their innovative ‘theory-storming’ process, demonstrates how designers can create great places that are inclusive, sustainable, and salutogenic. Creating Great Places is an insightful, compelling, and evidence-based resource for readers who want to design urban environments that inspire, excite, and positively transform people’s lives.
