Teacher Professional Learning through Lesson Study in Virtual and Hybrid Environments Rongjin Huang,Nina Helgevold,Jean Lang,Heng Jiang,2023-08-18 Offering a rich, critical investigation of how technology can be used to strengthen and promote lesson study in both virtual and hybrid environments, this edited book presents insights into the numerous challenges as well as opportunities for supporting teachers' and teacher educators' professional learning in such a novel setting. Providing an international perspective, research in this book highlights on the one hand the necessity of exploring how the known theoretical perspectives and methodological approaches for researching on

lesson study and effective characteristics of conducting lesson study can be adapted to the new environments. On the other hand, further analysis reveals the benefits of using various advanced technologies in lesson study, the new practice of professional development of teachers and teacher educators, and also documents related issues of conducting lesson study in such complex contexts. The chapters focus on online cross-cultural lesson study; the key aspects of conducting online lesson study and the effectiveness of it. Features of facilitation and the development of facilitators for online lesson study are explored, alongside the ways in which online lesson study can help address various problems of practice such as implementing equitable teaching, facilitating student interaction in virtual environments, and migration to remote teaching in STEM. This resourceful text provides needed support to both researchers and practitioners, from primary to higher education, with special attention to both teacher and student learning.

The Sinitic Civilization Book II Hong Yuan, 2018-11-14 The Sinitic Civilization A Factual History through the Lens of Archaeology, Bronzeware, Astronomy, Divination, Calendar and the Annals The book covered the time span of history of the Sinitic

civilization from antiquity, to the 3rd millennium B.C. to A.D. 85. A comprehensive review of history related to the Sinitic cosmological, astronomical, astrological, historical, divinatory, and geographical developments was given. All ancient Chinese calendars had been examined, with the ancient thearchs' dates examined from the perspective how they were forged or made up. The book provides the indisputable evidence regarding the fingerprint of the forger for the 3rd century A.D. book Shang-shu (remotely ancient history), and close to 50 fingerprints of the forger of the contemporary version of The Bamboo Annals. Using the watershed line of Qin Emperor Shihuangdi's book burning of 213 B.C., the book rectified what was the original history before the book burning, filtered out what was forged after the book burning, sorted out the sophistry and fables that were rampant just prior to the book burning, and validated the history against the records in the oracle bones, bronzeware, and bamboo slips. The book covers 95-98% and more of the contents in the two ancient history annals of The Spring Autumn Annals and The Bamboo Annals. There are dedicated chapters devoted to interpreting Qu Yuan's poem Asking Heaven (Tian Wen), the mythical book The Legends of Mountains & Seas (Shan Hai Jing), geography book Lord Yu's Tributes (Yu Gong),

and Zhou King Muwang's Travelogue (Mu-tian-zi Zhuan). The book has appendices of two calendars: the first anterior quarter remainder calendar (247 B.C.-104 B.C./247 B.C.-85 A.D.) of the Qin Empire, as well as a conversion table of the sexagenary years of the virtual Yin-li (Shang dynasty) quarter remainder calendar versus the Gregorian calendar, that covers the years 2698 B.C. to 2018 A.D. Book I stops about the midpoint of the 242 years covered in Confucius' abridged book The Spring & Autumn Annals (722-481 B.C.). Book II stops at Han Emperor Zhangdi (Liu Da, reign A.D. 76-88; actual reign Aug of A.D. 75-Feb of A.D. 88), with the A.D. 85 adoption of the Sifen-li posterior quarter remainder calendar premised on reverting to the sexagenary years of the virtual Yin-li (Shang dynasty) quarter remainder calendar, a calendar disconnected from the Jupiter's chronogram, that was purportedly invented by the Confucians on basis of Confucius' identifying the 'qi-lin' divine giraffe animal and wrapping up the masterpiece The Spring & Autumn Annals two years prior to death.

China William A. Callahan,2009-11-19 The rise of China presents a long-term challenge to the world not only economically, but politically and culturally. Callahan meets this challenge in China: The Pessoptimist Nation by using new Chinese sources and innovative analysis to see how Chinese people understand their new place in the world. To chart the trajectory of its rise, the book shifts from examining China's national interests to exploring its national aesthetic. Rather than answering the standard social science question what is China? with statistics of economic and military power, this book asks when, where, and who is China? to explore the soft power dynamics of China's identity politics. China: The Pessoptimist Nation shows how the heart of Chinese foreign

policy is not a security dilemma, but an identity dilemma. Through careful analysis, Callahan charts how Chinese identity emerges through the interplay of positive and negative feelings in a dynamic that intertwines China's domestic and international politics. China thus is the pessoptimist nation where national security is closely linked to nationalist insecurities. Callahan concludes that this interactive view of China's pessoptimist identity means that we need to rethink the role of the state and public opinion in Beijing's foreign policy-making.

Warfare in Chinese History Hans van de Ven, 2021-07-26 Our understanding of Chinese warfare has suffered from misconstrued contrasts between Chinese and Western ways in warfare. This is one of the arguments convincingly set forth in this important volume on an important subject. It also discusses the essentialising

interpretations of Chinese culture focussing on the avoidance of warfare and the civil ethic of its officials. Based on original sources, and dealing with the subject from the earliest dynasty up to modernity, it uniquely combines chapters on strategy and tactics. Both scope and approach make it a must for historians of China. And, with a view to its conclusions on the place of China in the context of global military history, it also provides essential reading for historians of (comparative) warfare in general. The book's primary goal – to provide a fuller interpretation of the role of the military in Chinese history – has been achieved with ease.

The Chinese Sky during the Han Xiaochun Sun,Jacob

Kistemaker,2021-09-13 A reconstruction of the Chinese sky of two thousand years ago, based on analysis of the first star catalogue in China and other sources. Presented in six well-sized star maps for 100 BC, it is especially important for the history of astronomy. The Han sky, with five times more constellations than Ptolemy knew, reflects diverse human activities. The way in which constellations were grouped discloses a systematic cosmology, uniting universe and the state. The work of the three Han schools is comparable to Ptolemy's Almagest. With three detailed Appendices on the

constellations of the three schools, well illustrated to demonstrate the relation between sky and human society, this book is valuable not only for astronomy historians and sinologists, but in general for scholars interested in the ancient cultures of Asia.

Marionette Plays from Northern China Fan Pen Li Chen,2017-04-05 English-language translations of traditional plays

from the marionette puppet theater of northern China. Marionette puppet theater has a rich and ancient history in China, extending back to the Han dynasty and reaching its heyday in the Qing dynasty. While this art form is nearly extinct in northern China today, a handful of troupes in Heyang County in Shaanxi Province, which claims to be the birthplace of marionette theater, continue to perform skits and scenes from Heyang’s earlier, broader marionette theater repertoire. In this book, Fan Pen Li Chen has collected and translated rare transcriptions of some of the most popular of these plays. Her insightful translations include a rich variety of genres and highlight memorable characters that range from manipulative aristocrats, poor Confucian scholars, and a woman warrior to Baldy Guo, the iconic clown of puppet theater. As the only work in English about the puppet theater of northern China, these translations provide valuable information about the history, religion, social roles, and popular culture of that region. Detailed introductions and annotations for each play, as well as an extensive bibliography, are also included.
