The Innovation Delusion Lee Vinsel, Andrew L. Russell, 2020-09-08 “Innovation” is the hottest buzzword in business. But what if our obsession with finding the next big thing has distracted us from the work that matters most? “The most important book I've read in a long time . . . It explains so much about what is wrong with our technology, our economy, and the world, and gives a simple recipe for how to fix it: Focus on understanding what it takes for your products and services to last.”—Tim O'Reilly, founder of O'Reilly Media It's hard to avoid innovation these days. Nearly every product gets marketed as being disruptive, whether it's genuinely a new invention or just a new toothbrush. But in this manifesto on the state of American work, historians of technology Lee Vinsel and Andrew L. Russell argue that our way of thinking about and pursuing innovation has made us poorer, less safe, and—ironically—less innovative. Drawing on years of original research and reporting, *The Innovation Delusion* shows how the ideology of change for its own sake has proved a disaster. Corporations have spent millions hiring chief innovation officers while their core businesses tank.

Computer science programs have drilled their students on programming and design, even though the overwhelming majority of jobs are in IT and maintenance. In countless cities, suburban sprawl has left local governments with loads of deferred repairs that they can't afford to fix. And sometimes innovation even kills—like in 2018 when a Miami bridge hailed for its innovative design collapsed onto a highway and killed six people. In this provocative, deeply researched book, Vinsel and Russell tell the story of how we devalued the work that underpins modern life—and, in doing so, wrecked our economy and public infrastructure while lining the pockets of consultants who combine the ego of Silicon Valley with the worst of Wall Street's greed. The authors offer a compelling plan for how we can shift our focus away from the pursuit of growth at all costs, and back toward neglected activities like maintenance, care, and upkeep. For anyone concerned by the crumbling state of our roads and bridges or the direction our economy is headed, *The Innovation Delusion* is a deeply necessary reevaluation of a trend we can still disrupt.

Meat Planet Benjamin Aldes Wurgaft, 2020-10-13 In 2013, a Dutch scientist unveiled the world's first laboratory-created hamburger. Since then, the idea of producing meat, not from live animals but from carefully cultured tissues, has spread like wildfire through the media. Meanwhile, cultured meat researchers race against population growth and climate change in an effort to make sustainable protein. *Meat Planet* explores the quest to generate meat in the lab—a substance sometimes called “cultured meat”—and asks what it means to imagine that this is the future of food. Neither an advocate nor a critic of cultured meat, Benjamin Aldes Wurgaft spent five years researching the phenomenon. In *Meat Planet*, he reveals how debates about lab-grown meat reach beyond debates about food, examining the links between appetite, growth, and capitalism. Could satiating the growing appetite for meat actually lead to our undoing? Are we simply using one technology to undo the damage caused by another? Like all problems in our food system, the meat problem is not merely a problem of production. It is intrinsically social and political, and it demands that we examine questions of justice and desirable modes of living in a shared and finite world. Benjamin Wurgaft tells a story that could utterly transform the way we think of animals, the way we relate to farmland, the way we use water, and the way we think about population and our fragile ecosystem's capacity to sustain life. He argues that even if cultured meat does not “succeed,” it functions—much like science fiction—as a crucial mirror that we can hold up to our contemporary fleshy dysfunctions.

Tail of the Blue Bird Nii Ayikwei Parkes, 2010 'Tail of the Blue Bird' is a story of the mythical heart of Africa, of the clash and clasp between old and new worlds. Lyrically beautiful, at once uncanny and heart-warmingly human, this is a story that tells us that at the heart of modern man there remains the capacity to know the unknowable.

Histories of Violence Brad Evans,Terrell Carver,2017-01-15 While there is a tacit appreciation that freedom from violence will lead to more prosperous relations among peoples, violence continues to be deployed for various political and social ends. Yet the problem of violence still defies neat description, subject to many competing interpretations. *Histories of Violence* offers an accessible yet compelling examination of the problem of violence as it appears in the corpus of canonical figures – from Hannah Arendt to Frantz Fanon, Michel Foucault to Slavoj Žižek – who continue to influence and inform contemporary political, philosophical, sociological, cultural, and anthropological study. Written by a team of internationally renowned experts, this is an essential interrogation of post-war critical thought as it relates to violence.

Isolation of Lactic Acid Related Bacteria from the Pig Mucosal Proximal Gastrointestinal Tract, Including Olsenella Umbonata Sp. Nov. and Veillonella Magna Sp. Nov Mareike Kraatz,2011 Whose habitat is this? What are their geno-, pheno- and ecotypes? These fervent questions in gastrointestinal microbiology are still, for the most part, unanswered when it comes to what decisively influences pig host nutrition and health: the individual bacterial species of the porcine mucosal gastric and small intestinal microbiota. Lactic acid-producing bacteria in syntrophism with lactic acid-fermenting bacteria, i.e. communities of 'lactic acid-related bacteria' (LARB), constitute the predominant and generally most beneficial part of this microbiota. The present book gives answers to the aforesaid questions. Outlined in six major chapters, the book starts off by reviewing the microecology of the pig proximal gastrointestinal tract as well as the different groups of LARB (chapter II). This leads over to the methodological chapters III and IV which explain the application of two newly developed culture-based approaches for isolation of novel species of manganese catalase-positive lactobacilli and mucin-fermenting LARB. Chapters V and VI contain the valid taxonomic descriptions of two novel LARB species, namely *Olsenella umbonata* Kraatz et al. 2011 and *Veillonella magna* Kraatz and Taras 2008 from porcine mucosal jejunum. Chapter VIII ends the book with a discussion of the ecological status, niches and host relationship of *O. umbonata* and *V. magna*, thus taking the reader back to the microecology of chapter II.

Quantum Legacies David Kaiser,2022-06-16 Physicists have grappled with quantum theory for over a century. They have learned to wring precise answers from the theory's governing equations, and no experiment to date has found compelling evidence to contradict it. Even so, the conceptual apparatus remains stubbornly, famously bizarre. Physicists have tackled these conceptual uncertainties while navigating still larger ones: the rise of fascism, cataclysmic world wars and a new nuclear age, an unsteady Cold War stand-off and its unexpected end. *Quantum Legacies* introduces readers to physics' still-unfolding quest by treating iconic moments of discovery and debate among well-known figures like Albert Einstein, Erwin Schrödinger, and Stephen Hawking, and many others whose contributions have indelibly shaped our understanding of nature--

Exile Belén Fernández, 2019-06-27 Che Guevara left Argentina at 22. At 21, Belén Fernández left the U.S. and didn't look back. Alone, far off the beaten path in places like Syria and Tajikistan, she reflects on what it means to be an American in a largely American-made mess of a world. After growing up in Washington, D.C. and Texas, and then attending Columbia University in New York, Belén Fernández ended up in a state of self-imposed exile from the United States. From trekking—through Europe, the Middle East, Morocco, and Latin America—to packing avocados in southern Spain, to close encounters with a variety of unpredictable men, to witnessing the violent aftermath of the 2009 coup in Honduras, the international travel allowed her by an American passport has, ironically, given her a direct view of the devastating consequences of U.S. machinations worldwide. For some years Fernández survived thanks to the generosity of strangers who picked her up hitchhiking, fed her, and offered accommodations; then she discovered people would pay her for her powerful, unfiltered journalism, enabling—as of the present moment—continued survival. In just a few short years of publishing her observations on world politics and writing from places as varied as Lebanon, Italy, Uzbekistan, Syria, Mexico, Turkey, Honduras, and Iran, Belén Fernández has established herself as a one of the most trenchant observers of America's interventions around the world, following in the footsteps of great foreign correspondents such as Martha Gellhorn and Susan Sontag.

Peninsula. A major meth-related crime confounds Inspector Hal Challis, while Sergeant Ellen Destry hunts down an elusive serial rapist. A pair of hit men have a very bad day, and the resulting bushfire draws attention to a meth lab and two burned bodies in a Mercedes. As Inspector Hal Challis of the Crime Investigation Unit struggles to link these events to major meth suppliers flooding the Peninsula with drugs, he also finds himself spending valuable time fending off jurisdictional challenges from Melbourne's Major Drug Investigative Division. Meanwhile, Sgt. Ellen Destry, of CIU's sex crimes unit, is hunting for a serial rapist who is extremely adept at not leaving clues. A tense, human, and at times darkly funny entry into Disher's celebrated Ned Kelly Award-winning series.

The Descent of Alette Alice Notley, 1996-04-01 The Decent Of Alette is a rich odyssey of transformation in the tradition of The Inferno. Alice Notley presents a feminist epic: a bold journey into the deeper realms. Alette, the narrator, finds herself underground, deep beneath the city, where spirits and people ride endlessly on subways, not allowed to live in the world above. Traveling deeper and deeper, she is on a journey of continual transformation, encountering a series of figures and undergoing fragmentations and metamorphoses as she seeks to confront the Tyrant and heal the world. Using a new measure, with rhythmic units indicated by quotations marks, Notley has created a spoken text, a rich and mesmerizing work of imagination, mystery, and power.
