Cowan, 2009-06-30 Neither minimizing the difficulty of the choices that modern genetics has created for us nor fearing them, Cowan argues that we can improve the quality of our own lives and the lives of our children by using the modern science and technology of genetic screening responsibly.

**The Social Life of Coffee** Brian Cowan, 2008-10-01 What

induced the British to adopt foreign coffee-drinking customs in the seventeenth century? Why did an entirely new social institution, the coffeehouse, emerge as the primary place for consumption of this new drink? In this lively book, Brian Cowan locates the answers to these questions in the particularly British combination of curiosity, commerce, and civil society. Cowan provides the definitive account

of the origins of coffee drinking and coffeehouse society, and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century. Britain's virtuosi, gentlemanly patrons of the arts and sciences, were profoundly interested in things strange and exotic. Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses. As the coffeehouse evolved, rising to take a central role in British commercial and civil society, the virtuosi were also transformed by their own invention.

**Digital Roots** Gabriele Balbi, Nelson Ribeiro, Valérie Schafer, Christian Schwarzenegger, 2021-09-07 As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, Technologies and Connections,

historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

*Neuropeptide Y and Drug Development* Lars

Grundemar, Stephen R. Bloom, 1996-11-15 Neuropeptide Y (NPY) is a ubiquitous and important messenger in the nervous system, with a wide range of physiological roles. It is involved in the body energy balance and is one of the most potent stimuli of food intake known. NPY also acts to regulate central and peripheral autonomic functions. This book, written by academic and industrial experts in the field, links the most recent basic experimental knowledge about NPY and its receptors with areas of clinical importance. This book

will be of interest to those working in all areas of research affected by NPY, such as food intake and energy homeostasis, cardiovascular regulation and G-protein-coupled receptors, as well as those interested in the development of drugs as NPY targets. The hypothalamic role of NPY and its relationship with eating disorders and diabetes The sympathetic nervous system role of NPY and its involvement in cardiovascular disorders Characterization of NPY receptor types and their brain distribution, molecular biology and pharmacology Development of peptide and non-peptide receptor antagonists

### **The Third Option Miles McPherson, 2020-02-25 Miles**

McPherson, founder of The Rock Church in San Diego, presents “a discussion about race that we desperately need...a must read” (Bishop T.D. Jakes, Senior Pastor, The Potter’s House) and argues that we must learn to see people not by the color of their skin, but as God sees them—humans created in the image of God. Pastor Miles McPherson, senior pastor of The Rock Church in San Diego, addresses racial division, a topic many have shied away from, for fear of asking the wrong question or saying the wrong thing. Some are oblivious to the impact racism has, while others pretend it doesn’t exist. Even the church has been affected by racial division,

with Sunday now being the most segregated day of each week. Christians, who are called to love and honor their neighbors, have fallen into culture's trap by siding with one group against another: us vs. them. Cops vs. protestors. Blacks vs. whites. Racists vs. the "woke." The lure of choosing one option over another threatens God's plan for unity among His people. Instead of going along with the culture, Pastor Miles directs us to choose the Third Option: honoring the priceless value of God's image in every person we meet. He exposes common misconceptions that keep people from engaging with those of different racial and ethnic backgrounds, and identifies the privileges and pitfalls that we all face. The Third Option challenges us to fully embrace God's creativity and beauty, as expressed in the diversity of His people. By following the steps and praying the prayers outlined in his book, Pastor Miles teaches us how we can all become leaders in unifying our communities, our churches, and the nation.

Human Factors Considerations of Undergrounds in Insurgencies Us Army Special Operations Command,2017-08-31  
From the preface: The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in

Southeast Asia, and also drew extensively on World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushtia Çlirimtare e Kosovës (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent movements like Hizbollah and Harakat al-Muqawamah al'Isলামiyyah (Islamic Resistance Movement, or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in

numerous ways. Insurgencies, enabled by low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to contain an insurgency in a region. Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude more academic research available relevant to this study's topics. We were able to draw on more recent work in psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines.

*Byzantium and the Arabs in the Fourth Century* Irfan

Shahîd, 1984 This book elucidates the birth of the new relationship between the Roman Empire and the Arabs and the rise of its institutional forms. Shahîd discusses the participation of the Arab foederati in Byzantium's wars with her neighbors--the Persians and the Goths--during which those Arab allies contributed to the welfare of the imperium and the ecclesia.

### **Bursting the Bubble: Rationality in a Seemingly Irrational**

**Market David F. DeRosa,2021-04-02** The presence of speculative bubbles in capital markets (an important area of interest in financial history) is widely accepted across many circles. Talk of them is pervasive in the media and especially in the popular financial press. Bubbles are thought to be found primarily in the stock market, which is our main interest, although bubbles are said to occur in other markets. Bubbles go hand in hand with the notion that markets can be irrational. The academic community has a great interest in bubbles, and it has produced scholarly literature that is voluminous. For some economists, doing bubble research is like joining the vanguard of a Kuhnian paradigm shift in economic thinking. Not so fast. If bubbles did exist, they would pose a serious challenge to neoclassical finance. Bubbles would contradict the ideas that markets are rational or work in an informationally efficient manner. That's what makes the topic of bubbles interesting. This book reviews and evaluates the academic literature as well as some popular investment books on the possible existence of speculative bubbles in the stock market. The main question is whether there is convincing empirical evidence

that bubbles exist. A second question is whether the theoretical concepts that have been advanced for bubbles make them plausible. The reader will discover that I am skeptical that bubbles actually exist. But I do not think I or anyone else will ever be able to conclusively prove that there has never been a bubble. From studying the literature and from reading history, I find that many famous purported bubbles reflect inaccurate history or mistakes in analysis or simply cannot be shown to have existed. In other instances, bubbles might have existed. But in each of those cases, there are credible rational explanations. And good evidence exists for the idea that even if bubbles do exist, they are not of great importance to understanding the stock market.

Medicine: Preserving the Passion Phil R. Manning,Lois DeBakey,2013-03-14 In *Medicine: Preserving the Passion*, Phil R. Manning, a pioneer and recognized authority in continuing medical

education, and Lois DeBakey, a passionate advocate of critical reasoning and leading scholar in scientific communication, endeavor to shift the focus in lifelong learning from group exercises in a lecture hall to self-directed, practice-related activities. Although most experts have applauded this new concept, few publications have addressed methods for implementation. The Manning-DeBakey book describes such methods as devised by outstanding clinicians and academicians to obtain educational benefit from their clinical experience. Some techniques inspired by quality assurance, for example, these master clinicians have used successfully to improve their knowledge, skills, and patient care. This book not only identifies the primary concerns in continuing medical education, but also offers sound recommendations and effective solutions and suggests future directions and approaches. The authors have analyzed the continuing educational practices of physicians in a wide range of environments, from small communities to the most acclaimed medical centers, and have extracted additional advice from the writings of past authorities like Osler. The resulting concepts will undoubtedly attract wide public attention. Office practice audit, self-directed learning, case indexing, patient education, computer-assisted education, and

collegial networks, as well as regular reading, writing, and teaching, are among the successful methods described by physicians and surgeons who exemplify the highest standards of medical practice.

**The Golden Frontier** Herman Francis Reinhart,1962-01-01 The gold rush was Herman Francis Reinhart's life for almost twenty years. From the summer of 1851 when, as a boy in his late teens, he traveled the Oregon trail to California, until a January day in 1869 when he climbed aboard an eastbound train at Evanston, Wyoming, he was a part of every gold discovery that stirred the West. Reinhart dipped his pan in the streams of northern California and western Oregon—in Humbug Creek, Indian Creek, Rogue River, and Sucker Creek. He made the arduous and dangerous overland journey through Indian-occupied western Washington and British Columbia to find the Fraser River gold even more elusive than that farther south. With his teams and wagons he traversed all of the inland mine areas from Walla Walla to Fort Benton, from Boise Basin to South Pass City. Reinhart's German common sense soon turned him from actual mining to other sources of income, but

whatever his labor was, the mines were always the focal point of his activities. When he operated a bakery and saloon it was a business whose customers were miners, whose transactions were more likely to involve gold dust than legal tender, and whose gambling tables saw the exchange of mining fortunes. When he operated a whipsaw mill the timbers cut there were used by miners for sluices and cradles. For a while Reinhart farmed, but planting and harvesting suffered from interruption by frequent expeditions to the mines. And when he prospered as a teamster it was to and from the mining towns that he hauled passengers, supplies, and equipment. The men who, like Herman Francis Reinhart, hopefully followed the golden frontier were not an articulate group, and the written records of their lives are few and fragmentary. But Reinhart, in his later years, recorded his experiences in five long, narrow, hardback ledgers. Many years after he died his daughter gave the ledgers to a friend in Chanute, Kansas—Nora Cunningham—who read the narrative, became fascinated by it, and typed it for publication. Reinhart's account, written in a grammar and language all his own, is not a record of the historian's West, but of the West of the individual miner. The pages are filled with the details of day-to-day life of the miners—the subjects that interested them, the

problems that plagued them, their fun and feuding, their frustrations and hopes. Edited by an authority of the history of the West, it is a book that will offer exciting reading to casual readers and scholars alike.
