Management, Leadership and Entrepreneurship in Latin America. Dr. Librado Enrique

Gonzalez, 2014-03-25 Latin America, a region that is constantly recognized as one of the top economies in the world, is growing at an amazing rate. Although Latin America is doing very good, it is facing a severe problem—the local talent is not receiving the correct attention. Every time I talk to managers of large multinational corporations and professors about the talent and human resources in Latin America, I always seem to find a consensus: most of the local talent is not well trained. According to them, key positions inside mid and large-sized companies are rarely occupied by local talent. Corporations fill the hole with foreign talent which is more expensive and difficult to find. This could be Latin America's Achilles' heel. I personally understand that developing Leadership, Management skills and Entrepreneurship takes time, and that in some cases, that time will be wasted, but it amuses me how some companies complain about the talent and they don't take the time to develop it. They rely on employees from other companies to fill the empty spots. Companies in Latin America need to start working proactively and not reactively. Over the last 10 years, economic growth averaged 4.2%, and 70 million people escaped poverty. Macroeconomic stability, open-trade policies and pro-business investment climates have supported and will continue to support strong growth in the years to come. Crucially, economic gains are being broadly shared. Latin America grew by 50 million people between 2003 and 2009, an increase of 50%. For a region long riven by wealth inequality, this is a remarkable achievement. The importance of family and personal relationships also impacts the workplace. For example, it is more common in

Latin America to seek employment with family members, hire family members, and look to the family for help in times of need. In addition, many Latin Americans feel more comfortable doing business with people they know personally, and developing that relationship is often considered an essential first step. Americans who try to move things along more quickly and “get to the point” may become frustrated and/or offend Latin Americans. This means that establishing business contacts and closing deals are best done in person, and may take more time than is customary in the U.S.

Competition Law in Latin America Julián

Peña, Marcelo Calliari, 2022-06-06 In the past few years, Latin American countries have taken giant steps to reposition their competition authorities in the global antitrust arena, granting them much greater autonomy both domestically and internationally. This is an updated edition of the first book that offered an in-depth analysis of this complex scenario. The first part of the book includes more general chapters written by leading experts on a variety of relevant topics analyzed at a regional level such as the issues emerging with the digital economy and on the special field of the information and communications technology industry, as well as chapters on broad regional trends, on the working of competition law in countries with regulated markets and in the cluster of Central American countries, among others. At the heart of the presentation are nine chapters detailing the competition regimes of the most active national jurisdictions in the region—Argentina, Brazil, Chile, Colombia, Ecuador, Mexico, Paraguay, Peru, and Uruguay. Written by practicing experts with considerable hands-on experience in their respective countries, each of these chapters provides a comprehensive description and explanation of the evolution, current state,

and prospects for antitrust in the country. Topics addressed in the country analysis encompass the following and more: relevant institutions and legislation; cartel investigations; unilateral conduct policies; merger review; international coordination; enforcement; and remedies. Each chapter includes an analysis of relevant case law, allowing the reader to gauge the positions, views, and tendencies of each competition law regime. The contributors also pay attention to the specificities and idiosyncrasies that are so important for a correct understanding of the practical realities of competition policy and enforcement. With its wide-ranging and in-depth approach, this book provides an incomparable analysis of a challenging region poised to become increasingly important in the international recognition and enforcement of antitrust law. It is in this sense an essential guide for lawyers, economists, corporations, academics, and government officials interested in understanding where competition law is, and where it is going to, in Latin America.

Cinesonidos Jacqueline Avila,2019-09-16 During Mexico's silent (1896-1930) and early sound (1931-52) periods, cinema saw the development of five significant genres: the prostitute melodrama (including the cabaretera subgenre), the indigenista film (on indigenous themes or topics), the cine de añoranza porfiriana (films of Porfirian nostalgia), the Revolution film, and the comedia ranchera (ranch comedy). In this book, author Jacqueline Avila looks at examples from all genres, exploring the ways that the popular, regional, and orchestral music in these films contributed to the creation of tropes and archetypes now central to Mexican cultural nationalism. Integrating primary source material--including newspaper articles, advertisements, films--with film music studies, sound

studies, and Mexican film and cultural history, Avila examines how these tropes and archetypes mirrored changing perceptions of mexicanidad manufactured by the State and popular and transnational culture. As she shows, several social and political agencies were heavily invested in creating a unified national identity in an attempt to merge the previously fragmented populace as a result of the Revolution. The commercial medium of film became an important tool to acquaint a diverse urban audience with the nuances of Mexican national identity, and music played an essential and persuasive role in the process. In this heterogeneous environment, cinema and its music continuously reshaped the contested, fluctuating space of Mexican identity, functioning both as a sign and symptom of social and political change.

Guerra Contra las Drogas en Latinoamérica y en Oriente Medio la “Guerra contra el Terrorismo”. Así como para comprender la proliferación de fosas clandestinas, la desaparición forzada de personas, el aumento de trata de personas y demás actos achacados al crimen organizado, a lo largo y ancho de México. Siendo que, dentro de tales actos constantemente se han visto implicadas agrupaciones del Estado como policías y militares. Global Media Giants Benjamin Birkinbine, Rodrigo Gomez, Janet Wasko, 2016-07-01 Global Media Giants takes an in-depth look at how media corporate power works globally, regionally, and nationally, investigating the ways in which the largest and most powerful media corporations in the world wield power. Case studies examine not only some of the largest media corporations (News Corp., The Microsoft Corporation) in terms of revenues, but also media corporations that hold considerable power within national, regional, or geolinguistic contexts (Televisa, The Bertelsmann Group, Sony Corporation). Each chapter approaches a different corporation through the lens of economy, politics, and culture, giving students and scholars a thoughtful and data-driven guide with which to interrogate contemporary media industry power.

Foreign Investment in Latin America and the Caribbean 2006 United Nations: Economic Commission for

Latin America and the Caribbean,2007-09-21 This is the latest in a series of annual reports on recent trends and developments in relation to foreign direct investment (FDI) and investment strategies in Latin America and the Caribbean region. The main message of this year's report is that active and integrated FDI attraction policies linked to national development strategies are necessary to secure quality FDI. These lessons are drawn from policy practices in the more successful European and Asian countries which contrast with the more passive and disconnected FDI attraction policies evident in Latin America and the Caribbean. The 2006 report also contains chapters that analyse the experiences of two relatively small investor countries in Latin America and the Caribbean, the Republic of Korea and Portugal.
