McAfee County Mark Steadman, 1998-03-01 Welcome to McAfee County, home to a large gathering of characters whose stories are as intertwined as kudzu. From Brother Fisco, who vows to part the waters of Kallisaw Sound, to Maggie Poat, proprietor of the local roadhouse, all have a compassionate, good-humored champion in author Mark Steadman, who gently prods us to recognize the flawed humanity we share with McAfee's misfits, rounders, and otherwise lost souls. Moving in and out of each other's lives in profound, often shocking, ways, the men and women in these stories form a vibrant community not soon forgotten. Blend Yoknapatawpha and Lake Wobegon, add a twist of southern gothic, and you will have some idea of what is waiting for you right across the McAfee County line.

Hidden Valley Al Hooper, 2010-12-30 Maxwell Harper knows what he likes, and what he likes are dinosaurs. But where can a sharp-eyed kid like Maxwell spot a genuine dinosaur these days? Make that dinosaurs plural! Tracking monsters was not even on the radar when Maxwell and his two sisters, Patty and Lee Jay, arrived at the Lazy L dude ranch in the Yakima Valley that hot

August afternoon. In fact their young host at the Lazy L, Marty Lawrence, had heard all he wanted to hear about the prehistoric creatures. Dinosaurs! They were giving the Lazy L a bad name. But could these reports be true? Did real-life dinosaurs really exist? Maxwell was about to find out. Meanwhile there were other sinister forces gathering in the valley. The Lazy L was under siege. Some big-city bad guys wanted to take it over, and they had the firepower to do it. And now, under a moonlit sky, two silent figures are seen moving among the valleys ghostly shadows

A Process-Centric View on Predictive Maintenance and Fleet Prognostics. Development of a Process Reference Model and a Development Method for Fleet Prognostics to Guide Predictive Maintenance Projects Carolin

Wagner,2022-08-12 In the age of digitalization and the fourth industrial revolution, predictive maintenance is becoming increasingly important as a proactive maintenance type. Despite the economic benefits that predictive maintenance generates for companies, its practical application is still in its early stages. This is often due to two prevailing challenges. First, there is a deficiency of knowledge about predictive maintenance and its concrete realization. Second, there is a lack of high quality and rich data of historical machine failures. To increase the representativeness of data, data from several similar machines (i.e. a fleet) should be considered. To foster the effective implementation of predictive maintenance, supportive guidance in the realization of a predictive maintenance project is needed. For this reason, this dissertation presents a process reference model and a development method for fleet prognostics. The process reference model describes a comprehensive and application-independent view of the complete predictive maintenance process. The model is supplemented by the fleet prognostic development method. To address the specific characteristics of the fleet, a systematic process is depicted which provides a means to assess the heterogeneity of the fleet from a

data-driven perspective and simplifies the design of an algorithm considering fleet data. Finally, the applicability and value of the research results are demonstrated with three industrial cases

A Star Trek: The Next Generation: Time #8: A Time to Heal

David Mack,2004-09-17 On the cusp of their epic battle with Shinzon, many of Captain Jean-Luc Picard's long-time crew were heading for new assignments and new challenges. Among the changes were William Riker's promotion to captain and his new command, Riker's marriage to Counselor Deanna Troi, and Dr. Beverly Crusher's new career at Starfleet Medical. But the story of what set them on a path away from the Starship Enterprise™ has never been told. UNTIL NOW. A cataclysmic war between the Federation and the Klingon Empire has been miraculously averted, and a new government is finally in place on the planet Tezwa. But deadly secrets still threaten the fragile peace accord. Rebels still loyal to the old Tezwa regime have captured Commander Riker and are willing to kill to achieve their goals...the Orion Syndicate is interfering in the rebuilding -- and may also be involved in much more than that. But the most devastating revelation of all threatens the very foundations of the Federation itself -- leaving Captain Picard to possibly face the very conflict that he labored so hard to prevent....

Focus of Attention in Video Conferencing Carnegie Mellon University. Computer Science Department, Jie Yang, Lee Jay Wu, Alex Waibel, 1996 Abstract: In this report we present an approach to low bitrate video teleconferencing by focusing attention on important information. We show that by selectively degrading the quality of less important regions, more important regions can be sent without loss of quality but with greatly reduced bandwidth requirements. Low bitrate transmission for real-time video delivery over a dynamic network is achieved by region blurring and cropping. A prototype system has been developed to demonstrate the concept. We assume that a human facial area is the most interesting area in the system. The system can automatically focus its attention on a given face and its adjustable surrounding area. The selected area is then fed to the coding system and sent to the receiver. The selection function of the system is fulfilled by a real-time face tracker. The face being tracked can be selected by a mouse or finger pointing if a touch screen is used. It can track a person's face while the person moves freely (e.g., walking, jumping, sitting and rising) in a room. Based on the information provided by the face tracker and the network traffic, a window surrounding the face can be determined. The window size can reflect the network traffic. The image outside of the window will be either cropped or blurred. The preprocessed image is then fed to a tele-conferencing software package-vic, a real-time multimedia application for video conferencing over the Internet. The experimental results show significant savings of required bandwidth for video subjected to the changes.

Demanding Devaluation David Steinberg, 2015-06-05
Exchange rate policy has profound consequences for economic development, financial crises, and international political conflict. Some governments in the developing world maintain excessively weak and undervalued exchange rates, a policy that promotes export-led development but often heightens tensions with foreign

governments. Many other developing countries overvalue their exchange rates, which increases consumers' purchasing power but often reduces economic growth. In *Demanding Devaluation*, David Steinberg argues that the demands of powerful interest groups often dictate government decisions about the level of the exchange rate. Combining rich qualitative case studies of China, Argentina, South Korea, Mexico, and Iran with cross-national statistical analyses, Steinberg reveals that exchange rate policy is heavily influenced by a country's domestic political arrangements. Interest group demands influence exchange rate policy, and national institutional structures shape whether interest groups lobby for an undervalued or an overvalued rate. A country's domestic political system helps determine whether it undervalues its exchange rate and experiences explosive economic growth or if it overvalues its exchange rate and sees its economy stagnate as a result.

The two conferences were held on September 22-26, 2003 in Cavtat, a small tourist town in the vicinity of Dubrovnik, Croatia. As machine learning and knowledge discovery are two highly related ?elds, theco-locationofbothconferencesisbene?cialforbothresearchcommunities .In Cavtat, ECML and PKDD were co-located for the third time in a row, following the successful co-location of the two European conferences in Freiburg (2001) and Helsinki (2002). The co-location of ECML2003 and PKDD2003 resulted in a joint program

for the two conferences, including paper presentations, invited talks, tutorials, and workshops. Out of 332 submitted papers, 40 were accepted for publication in the ECML2003 proceedings, and 40 were accepted for publication in the PKDD2003 proceedings. All the submitted papers were reviewed by three referees. In addition to submitted papers, the conference program consisted of four invited talks, four tutorials, seven workshops, two tutorials combined with a workshop, and a discovery challenge.
