**Keep It Simple** Ravonne A. Green,Vera Blair,2011-03-21 Simple, straightforward guidance for the practitioner who wants to use assistive technologies to extend library access. Keep it Simple: A Guide to Assistive Technologies provides a basic tutorial on common assistive computer applications and commonly available, inexpensive hardware and software to help librarians incorporate such aids into the library's current infrastructure. Focusing on applications commonly available on Microsoft Office and other low-cost technologies, this book offers guidance for the practitioner that can help every library move toward universal access. Librarians will find advice on planning accessible services, selecting appropriate assistive technologies, marketing disability services and assistive technology, and training staff in disability services issues and the use of assistive technology. Individual chapters cover print, hearing, speech, and mobility disabilities, offering resources and tutorials for each of these disability categories.

*Life Care Planning and Case Management Handbook* Roger O. Weed,Debra E. Berens,2018-09-03 Life care planning is an advanced collaborative case management specialty practice focused on assessing, evaluating, coordinating, consulting, planning for, and monitoring necessary services for individuals with complex medical care needs over their lifetime. This handbook provides a comprehensive resource for all people involved with catastrophic impairments and chronic medical care case management. The Life Care Planning and Case Management Handbook, Fourth Edition, begins by defining the roles played by each of the key team members working with the life care planner. It provides planners with insights critical to successful interactions with medical and health care-related professionals as well as the team members they are most likely to encounter as they work to build an accurate and reliable life care plan. Next, the text offers up-to-date information on the medical conditions most frequently encountered by the life care planner. The contributors, who are recognized experts in their disciplines, also address issues in forensic settings, ethics, standards, research, and credentials. The fourth edition includes numerous chapters on general issues, as well as updated standards of practice from the International Academy of Life Care Planners (IALCP), Life Care Planning Consensus Statements, and valuable step-by-step charts and checklists. Completely updated and expanded, this revised handbook now includes new chapters on multicultural

considerations in life care planning, admissibility of life care plans in U.S. courts, and Canadian life care planning practice. Additionally, infused in other chapters, is new information on medical coding and costing for life care planners, life care planning in non-litigated contexts, as well as research and education within life care planning.

*Off the Main Sequence* Tom Easton, 2006-10-01 Tom Easton has served as the monthly book review columnist for Analog Science Fiction for almost three decades, having contributed during that span many hundreds of columns and over a million words of penetrating criticism on the best literature that science fiction has to offer. His reviews have been celebrated for their wit, humor, readability, knowledge, and incisiveness. His love of literature, particularly fantastic literature, is everywhere evident in his essays. Easton has ever been willing to cover small presses, obscure authors, and unusual publications, being the only major critic in the field to do so on a regular basis. He seems to delight in finding the rare gem among the backwaters of the publishing field. A reviewer's job, he says, is not to judge books for the ages, but to tell readers enough about a book to give them some idea of whether they would enjoy it. And this he does admirably, whether he's discussing the works of the great writers in the field, or touching upon the least amongst them. This companion volume to Periodic Stars (Borgo/Wildside) collects another 250 of Easton's best reviews from the last fifteen years of The Reference Library. No one does it better, and no other guide provides such lengthy or discerning commentary on the best SF works of recent times. Complete with Introduction and detailed Index.

**Responsible Entrepreneurship Education: Emerging Research and Opportunities** Marzi, Giacomo, Caputo, Andrea, 2019-01-25 Entrepreneurship is always evolving, and while some view entrepreneurship as something one is born to do, entrepreneurs should continue their education to improve themselves professionally. Entrepreneurship does not end with the creation of a start-up or in pursuing an already consolidated economic reality; it manifests itself in everyday life. Responsible Entrepreneurship Education: Emerging Research and Opportunities provides innovative insights into educational strategies for the continued preparation of entrepreneurs. The content within this publication examines economic theory, lifelong learning, opportunistic and positive thinking, business creativity, and operations management. It is designed for entrepreneurs, students, business educators, academicians, managers, and researchers.

**Molecular Imaging Probes For Cancer Research** Chen Xiaoyuan (Shawn), 2012-07-31 This review volume integrates the advances in cancer biology, molecular imaging techniques and imaging probes for visualization and quantitative measurement of anatomical, functional, and molecular profiles of cancer. The volume also presents a comprehensive summary of the state-of-the-art technology in molecular imaging probe design and applications in radionuclide (PET and SPECT), magnetic resonance (MR), optical (fluorescence, Raman, photoacoustic), ultrasound, CT, and

multimodality imaging. Bringing together the fundamentals of molecular imaging, and the basic principles of each molecular imaging modality in this volume, readers' understanding in this field is further enhanced. With a strong emphasis on the chemistry of the design of appropriate molecular imaging probes for early cancer detection, therapy-response monitoring, and anti-cancer drug development, the process of translating novel cancer imaging probes from bench to bedside is extensively discussed.
