Structures Of Thinking V10 Karl Mannheim,2013-08-21 First published in 1982. This is Volume X of Mannheim's collected works. The texts to be presented in this edition had been in the possession of the late Dr Paul Kecskemeti, who was a close associate of Karl Mannheim and a distinguished social scientist in his own right. The published version rests upon a photocopy of the typescripts, which Dr Kecskemeti allowed to be made some years ago.

Physical Acoustics V10 Warren P. Mason,2012-12-02 Physical Acoustics: Principles and Methods, Volume X, is a five-chapter text that covers the principles and methods of generation of physical acoustics. The first chapter provides the essential results obtained concerning acoustic surface waves on curved surfaces and relates them to the corresponding plane surface waves. This chapter also presents a classification of surface and lateral waves on flat surfaces along with their properties. The second chapter describes a group of acoustic wave problems that are particularly suitable for study by means of Schlieren visualization. The third chapter deals with the production of ultrasonic waves by direct electromagnetic generation, while type II superconductors, which are useful for superconducting magnets with strong magnetic fields and with high current densities, are investigated in the fourth chapter. The fifth chapter discusses the principles of hologram and its application to very short length electromagnetic waves known as microwaves and to acoustic waves of various wavelengths.

Biochemical Actions of Hormones Gerald Litwack,2012-12-02 Biochemical Actions of Hormones, Volume X explores the important fields of recombinant DNA technology and nuclear matrix and their impact on biochemical endocrinology. This volume is organized into 12 chapters and begins with a presentation of an excellent model for determining the role of various receptors operating at the genetic level using cells in culture derived from the anterior pituitary. These topics are followed by a summary of conceptual advances in understanding nerve growth factor and related hormones, as well as the polypeptide hormones, which are recognized as growth factors for cells in culture. A chapter provides some insights into the pineal hormone, melatonin. The remaining chapters discuss the Ah carcinogen receptor, which seems to be analogous in many respects to a steroid receptor. These chapters also survey the various aspects of steroid receptors, including the specific acceptor sites in genes and their flanking sequences, the synthetic oligonucloetide acceptors for steroid receptor complexes, and the mechanisms of glucocorticoid resistance in leukemia. Biochemists, biologists, and research workers who are interested in biochemical aspects of endocrinology will find this book invaluable.

Integrated Pest Management (IPM) Farmer Field School (FFS) Food and Agriculture Organization of the United Nations,Directorate of Plant Protection Quarantine and Storage, Government of India,2021-10-20 Maize is most important food crop after rice and wheat contributing towards national food security with an annual production of 28.7 million metric tonnes. The major maize producing states are Karnataka, Madhya Pradesh, Rajasthan Maharashtra and Andhra Pradesh. Maize is a relatively less water demanding crop and gives higher yield /hectare as compared to other cereals. Due to development of newer varieties which are tolerant to extreme temperatures, the area under maize cultivation is increasing in northern parts of India. In India about 15 million farmers are engaged in farming and processing of maize. The recent invasion of Fall Armyworm (FAW) is causing wide economic damage to maize farmers. The pest is new to India. Hence, it is important to understand its behaviour in the agro ecosystem and its interactions with predators, parasitiods and entomo-pathogens in diverse agro ecosystem. Thus, this illustrative guide on IPM-FFS has been developed by FAO and Directorate of Plant protection Quarantine & Storage (DPPQS), MoAFW for promoting IPM in maize cultivation with special emphasis on FAW management. This is an output of FAO's project titled, "Time critical measures to support early warning and monitoring for sustainable management of Fall Armyworm in India".

The locomotion, respiration and energetics; the senses; and the cuticular properties, appearance, color and luminosity are also considered. The book further tackles the adult and larval behavior; the development and life-cycles; and the cytology and genetics. The text also looks into water beetles; special habitats; predation

and defence; and symbiotic and parasitic relations. The ecological triangle: beetles, fungi and trees; and herbivorous beetles are also looked into. The book also discusses the role of beetles as ecological indicators; and the evolutionary history of beetles. Entomologists, ecologists, and biologists will find the book useful.
