The Defective Copy Theory of Movement Nélia Alexandre, 2012 Within the framework of Chomsky's Principles and Parameters Theory and the Minimalist Program, this work presents a detailed discussion of the different types of wh-question formation and relativization strategies in Cape Verdean Creole (Santiago variety), especially focusing on wh-movement of PPs. The book explores the Copy Theory of Movement, discussing a defective copy construction involving wh-movement of PPs which poses interesting theoretical questions as to how the defective copy is to be generated and form a chain with the relevant displaced wh-constituent. It is also shown that the defective copy strategy ([wh[PL] el[3SG]]) is distinct from resumption ([wh[PL] es[3PL]]) due to some properties of PPs in Cape Verdean Creole and to the nature of the pronominal element that occurs at the foot of the wh-chain. This book relates well with those on Cape Verdean Creole and highlights the need to look more closely at deeper syntactic issues in more creole languages, inspiring further comparative work amongst creole linguists.

Introduction to Protein Structure Prediction Huzefa Rangwala, George Karypis, 2011-03-16 A look at the methods and algorithms used to predict protein structure. A thorough knowledge of the function and structure of proteins is critical for the advancement of biology and the life sciences as well as the development of better drugs, higher-yield crops, and even synthetic bio-fuels. To that end, this reference sheds light on the methods used for protein structure prediction and reveals the key applications of modeled structures. This indispensable book covers the applications of modeled protein structures and unravels the relationship between pure sequence information and three-dimensional structure, which continues to be one of the greatest challenges in molecular biology. With this resource, readers will find an all-encompassing examination of the problems, methods, tools, servers, databases, and applications of protein structure prediction and they will acquire unique insight into the future applications of the modeled protein structures. The book begins with a thorough introduction to the protein structure prediction problem and is divided into four themes: a background on structure prediction, the prediction of structural elements, tertiary structure prediction, and functional insights. Within those four sections, the following topics are covered: Databases and resources that are commonly used for protein structure prediction The structure prediction flagship assessment (CASP) and the protein structure initiative (PSI) Definitions of recurring substructures and the computational approaches used for solving sequence problems Difficulties with contact map prediction and how sophisticated machine learning methods can solve those problems Structure prediction methods that rely on homology modeling, threading, and fragment assembly Hybrid methods that achieve high-resolution protein structures Parts of the protein structure that may be conserved and used to interact with other biomolecules How the loop prediction problem can be used for refinement of the modeled structures The computational model that detects the differences between protein structure and its modeled mutant Whether working in the field of bioinformatics or molecular biology research or taking courses in protein modeling, readers will find the content in this book invaluable.

Odessa Peter van Olmen,2012-02-08 ¿No sería fascinante que existiera una ciudad habitada por famosos escritores y en la que el mundo que encierran los libros cobrara vida? La joven Odessa viaja a Scribópolis, la ciudad donde viven Shakespeare, Kafka, Dostoievski, Hamlet o el Minotauro, esperando encontrar en ella a su padre, al cual no conoce. Allí se verá amenazada por Mabarak, un siniestro escritor que fue desterrado y que quiere apoderarse a toda costa de Librus, un libro mágico donde todo lo que se escribe sucede en la realidad. En esta fascinante aventura, Odessa se enfrentará a grandes peligros e irá descubriendo los secretos que encierra esta misteriosa ciudad de los libros. «Escrita con vitalidad y con una fantasía desbordante, esta novela juega magistralmente con los diferentes géneros de la literatura.»ekz Bibliotheksservice

Scriptoria in Medieval Saxony Aliza Cohen-Mushlin,2004 This book examines for the first time the scriptorium of the Augustinian Monastery of St. Pancras in Hamersleben. In the last quarter of the 12th century six wellknown manuscripts were produced there. Of the fourteen scribeartists involved, one in particular stands out as responsible for the correct text and illustrations. The bold innovations of this master scribeartist are expressed especially in the decoration programmes of a Psalter and two Gospel books. The manuscripts produced in the Hamersleben Scriptorium, as well as its notable library, were dispersed throughout the world or thought to be lost. In this book six known manuscripts are brought home, to Hamersleben. Each manuscript is minutely analysed for its codicology, palaeography, text and illuminations. The style of script as well as the style and iconography of the illustrations are discussed in relation to those from other monasteries in Saxony, in order to examine the evolution of the regional style.

Tavse verdener (3) Det lysende hjerte Boris Hansen,2024-01-25 I tredje bind af Tavse Verdener kæmper tre forskellige parter om at løse mysteriet om 'mareridtsbogen' - en fiktion, der snart vil åbne sig i Strømmen, og som potentielt kan give uanet magt til den, der finder den først. Både Olivias hold af fiktionsagenter og seriemorderen Victor deltager i det skæbnesvangre kapløb om at regne ud, hvilken slags bog, der er tale om, og hvad forklaringen er på det lysende spøgelse, der tilsyneladende kalder på hjælp inde fra fiktionen. En episk fantasy-sci-fi-fortælling om fysiske rejser ind i bøgernes verden. Andre bøger i serien 'Tavse Verdener': Den usynlige krig (1) De falske liv (2)

The Syntax of Cape Verdean Creole Marlyse Baptista,2002 This book offers an in-depth treatment of a variety of morpho-syntactic issues in Cape Verdean Creole (CVC) both from a descriptive and theoretical perspective. The

investigated topics include the determiner system, Tense, Mood, Aspect markers and pronominal paradigms. The study of TMA markers reveals morpho-syntactic configurations with interesting ramifications for syntactic theory and parametric variation. This book targets creolists, theoretical linguists, and the Cape Verdean community. Given the diversified targeted audience, the descriptive chapters are purposefully kept separate from their theoretical counterparts, presenting issues that are later revisited in the Minimalist framework. The data used in this study are primarily drawn from 83 transcribed interviews from a pool of 187 speakers. The interviews were collected during fieldwork conducted in 1997, 2000 and 2001 in the Cape Verdean Sotavento (leeward) islands representing the more basilectal varieties of the creole. As all natural languages, CVC displays syntactic similarities and differences with other creoles and noncreoles. Hence, in the spirit of comparative syntax, this volume compares CVC to other creoles like Guinea-Bissau Creole and to noncreoles like Portuguese, French, Icelandic and Italian dialects.

Discourse Configurational Languages Katalin 'E. Kiss, 1995-01-05 Comprising eleven studies on languages with designated structural topic and focus positions, this volume includes an introduction surveying the empirical and theoretical problems involved in the description of this language type. Focusing on languages outside the traditional Indo-European group, the essays look at Chadic, Somali, Basque, Catalan, Old Romance, Greek, Hungarian, Finnish, Korean, and Quechua. The papers provide interesting new empirical data, as well as a variety of means and alternatives of representing them structurally. At the same time, they address important theoretical questions in the framework of generative theory. This is the first study to apply methods of comparative syntax to the study of topic and focus.
