Algebraic Invariants Of Links (2nd Edition) Hillman Jonathan, 2012-06-15 This book serves as a reference on links and on the invariants derived via algebraic topology from covering spaces of link exteriors. It emphasizes the features of the multicomponent case not normally considered by knot-theorists, such as longitudes, the homological complexity of many-variable Laurent polynomial rings, the fact that links are not usually boundary links, free coverings of homology boundary links, the lower central series as a source of invariants, nilpotent completion and algebraic closure of the link group, and disc links. Invariants of the types considered here play an essential role in many applications of knot theory to other areas of topology. This second edition introduces two new chapters – twisted polynomial invariants and singularities of plane curves. Each replaces brief sketches in the first edition. Chapter 2 has been reorganized, and new material has been added to four other chapters.

The Art of Joaquín Torres-García Aarnoud Rommens, 2016-08-05 Intertwining art history, aesthetic theory, and Latin American studies, Aarnoud Rommens challenges contemporary Eurocentric revisions of the history of abstraction through this study of the Uruguayan artist Joaquín Torres-García. After studying and painting (for decades) in Europe, Torres-García returned in 1934 to his native home, Montevideo, with the dream of reawakening and revitalizing what he considered the true indigenous essence of Latin American art: Abstract Spirit. Rommens rigorously analyses the paradoxes of the painter's aesthetic-philosophical doctrine of Constructive Universalism as it sought to adapt European geometric abstraction to the Americas. Whereas previous scholarship has dismissed Torres-García's theories as self-contradictory, Rommens seeks to recover their creative potential as well as their role in tracing the transatlantic routes of the avant-garde. Through the highly original method of reading Torres-García's artworks as a critique on the artist's own writings, Rommens reveals how Torres-García appropriates the colonial language of primitivism to construct the artificial image of pure pre-Columbian abstraction. Torres-García thereby inverts the history of art: this book teases out the important lessons of this gesture and the implications for our understanding of abstraction today.

Women Singers in Global Contexts Ruth Hellier, 2013-02-05 Exploring and celebrating individual lives in diverse situations, Women Singers in Global Contexts is a new departure in the study of women's worldwide music-making. Ten unique women constitute the heart of this volume: each one has engaged her singing voice as a central element in her life, experiencing various opportunities, tensions, and choices through her vocality. These biographical and poetic narratives demonstrate how the act of vocalizing embodies dynamics of representation, power, agency, activism, and risk-taking. Engaging with performance practice, politics, and constructions of gender through vocality and vocal aesthetics, this collection offers valuable insights into the experiences of specific women singers in a range of sociocultural contexts.

Contributors trace themes and threads that include childhood, families, motherhood, migration, fame, training, transmission, technology, and the interface of private lives and public identities.

Musical Islands Katelyn Barney,Brydie-Leigh Bartleet,Klisala Harrison,Elizabeth Mackinlay,2009-05-05 The island is a powerful metaphor in everyday speech which extends almost naturally into several academic disciplines, including musicology. Islands are imagined as isolated and unique places where strange, exotic, different and unexpected treasures can be found by daring adventurers. The magic inherent within this positioning of islands as places of discovery is an aspect which permeates the theoretical, methodological and analytical boundaries of this edited book. Showcasing the breadth of current musicological research in Australia and New Zealand, this edited collection offers a range of subtle and innovative reflections on this concept both in established and well-charted territories of music research.

Low-Dimensional Topology R. Brown,T. L. Thickstun,1982-05-20 This volume consists of the proceedings of a conference held at the University College of North Wales (Bangor) in July of 1979. It assembles research papers which reflect diverse currents in low-dimensional topology. The topology of 3-manifolds, hyperbolic geometry and knot theory emerge as major themes. The inclusion of surveys of work in these areas should make the book very useful to students as well as researchers.

Aboriginal Peoples, Colonialism and International Law Irene Watson,2014-10-17 This work is the first to assess the legality and impact of colonisation from the viewpoint of Aboriginal law, rather than from that of the dominant Western legal tradition. It begins by outlining the Aboriginal legal system as it is embedded in Aboriginal people’s complex relationship with their ancestral lands. This is Raw Law: a natural system of obligations and benefits, flowing from an Aboriginal ontology. This book places Raw Law at the centre of an analysis of colonisation – thereby decentring the usual analytical tendency to privilege the dominant structures and concepts of Western law. From the perspective of Aboriginal law, colonisation was a violation of the code of political and social conduct embodied in Raw Law. Its effects were damaging. It forced Aboriginal peoples to violate their own principles of natural responsibility to self, community, country and future existence. But this book is not simply a work of mourning. Most profoundly, it is a celebration of the resilience of Aboriginal ways, and a call for these to be recognised as central in discussions of colonial and postcolonial legality. Written by an experienced legal practitioner, scholar and political activist, AboriginalPeoples, Colonialism and International Law: Raw Law will be of interest to students and researchers of Indigenous Peoples Rights, International Law and Critical Legal Theory.

Film Music in 'Minor' National Cinemas Germán Gil-Curiel,2017-08-24 Taking its cue from Deleuze's definition of minor cinema as one which engages in a creative act of becoming, this collection explores the multifarious ways that music has been used in the cinemas of various countries in Australasia, Africa, Latin America and even in Europe that have hitherto received little attention. The authors consider such film music with a focus on the role it has played creating, problematizing, and sometimes contesting, the nation. Film Music in 'Minor' National Cinemas addresses the relationships between film music and the national cinemas beyond Hollywood and the European countries that comprise most of the literature in the field. Broad in scope, it includes chapters that analyze the contribution of specific composers and songwriters to their national cinemas, and the way music works in films dealing with national narratives or issues; the role of music in the shaping of national stars and specific use of genres; audience reception of films on national music traditions; and the use of music in emerging digital video industries.
