Flavour Science Maria M.W. Etschmann, Sebastian Bormann, Jens Schrader, 2013-07-29 Nearly pure (2R) configured linalool oxides could be synthesized by biotransformation with *Corynespora cassiicola* DSM 62475 from (R)-(-)-linalool. In fed-batch shaking-flask cultures, product concentrations above 1g/L were obtained. Substrate limitation and product inhibition was shown to limit productivity, which was about 80mg/L per day. By means of a combined in situ substrate feeding and product removal (SFPR) approach with the polystyrene adsorber Lewatit VP OC 1163, substrate and product concentration could be kept below the respective inhibiting levels and productivity was increased by a factor of six.

Botanical Medicine in Clinical Practice Ronald Ross Watson, Victor R. Preedy, 2008 The potential benefits of plants and plant extracts in the treatment and possible prevention of many leading health concerns are historically well known and are becoming more widely studied and recognized within the medical community. It is these studies that led to the first compilation of new research developments, identifying new extracts and uses for plants in disease prevention and treatment. This major comprehensive reference work contains contributions from more than 150 clinical and academic experts covering topics such as treatments of cancer and cardiovascular diseases, as well as historical plant use by indigenous people supported by recent scientific studies. Authors review the safety and efficacy of botanical treatments while identifying the sources, historical supportive data and mechanisms of action for emerging treatments. Written by researchers currently carrying out identification and biomedical testing, this is the most up to date text on the latest research from all over the world. It is an essential resource for health care practitioners and herbalists, as well as researcher, students and professionals in botany and alternative medicine.

Pessoa, Jean-Luc Le Quéré, Jiwan S. Sidhu, Nirmal K. Sinha, Peggy Stanfield, 2010-12-01 HANDBOOK of Fruit and Vegetable Flavors A global PERSPECTIVE on the latest SCIENCE, TECHNOLOGY, and APPLICATIONS The demand for new flavors continues to rise. Today's consumers want interesting, healthy, pleasurable, and exciting taste experiences, creating new challenges for today's food and flavor scientists. Fortunately, they can turn to this comprehensive reference on the flavor science and technology of fruits, vegetables, spices, and oils for guidance on everything from basic science to new technologies to commercialization. Handbook of Fruit and Vegetable Flavors is divided into two sections. The first section, dedicated to fruit flavor, is organized into five parts: Part I: Biology, Chemistry, and Physiochemistry Part II: Biotechnology Part III: Analytic Methodology and Chemical Characterizations Part IV: Flavors for Fruit Commodities Part V: Flavors of Selected Dried Fruits The second section, dedicated to vegetable flavor, is divided into two parts, covering biology, chemistry, physiochemistry, and biotechnology in the first part and flavor

for vegetable commodities in the second part. Both the fruit flavor and vegetable flavor sections provide detailed coverage of such important topics as processing, extraction, flavor biosynthesis, and genetic engineering. Moreover, readers will find important details on regulations and requirements governing flavor additives as well as sanitation and safety in flavor manufacturing. Each of the chapters has been written by one or more leading experts in food and flavor science. The authors represent more than ten countries, giving food and flavor scientists a unique global perspective on the latest flavor science, technology, and applications.

Flavour Science Wender L.P. Bredie, Mikael Agerlin Petersen, 2006-05-10 The flavor of a food is often the most desirable quality characteristic for the consumer, yet the understanding of flavour is a fascinatingly complicated subject, which calls for interdisciplinary research efforts. This latest volume presents the proceedings of the 11th Weurman Flavour Research Symposium and describes the most recent and original research advances related to the flavour of foods and beverages with contributions of experts from 25 countries world-wide. * Efficiently summarises the current front line research within food flavor * Highlights the modern approaches to flavor production using biotechnology, enzymes and gene-technology * The dynamic effects of manipulation of food in the mouth during consumption influencing the release of flavour compounds is discussed in detail

Handbook of Essential Oils K. Husnu Can Baser, Gerhard Buchbauer, 2009-12-28 Egyptian hieroglyphs, Chinese scrolls, and Ayurvedic literature record physicians administering aromatic oils to their patients. Today society looks to science to document health choices and the oils do not disappoint. The growing body of evidence of their efficacy for more than just scenting a room underscores the need for production standards, quality control parameters for raw materials and finished products, and well-defined Good Manufacturing Practices. Edited by two renowned experts, the Handbook of Essential Oils covers all aspects of essential oils from chemistry, pharmacology, and biological activity, to production and trade, to uses and regulation. Bringing together significant research and market profiles, this comprehensive handbook provides a much-needed compilation of information related to the development, use, and marketing of essential oils, including their chemistry and biochemistry. A select group of authoritative experts explores the historical, biological, regulatory, and microbial aspects. This reference also covers sources, production, analysis, storage, and transport of oils as well as aromatherapy, pharmacology, toxicology, and metabolism. It includes discussions of biological activity testing, results of antimicrobial and antioxidant tests, and penetration-enhancing activities useful in drug delivery. New information on essential oils may lead to an increased understanding of their multidimensional uses and better, more ecologically friendly production methods. Reflecting the immense developments in scientific knowledge available on essential oils, this book brings multidisciplinary coverage of essential oils into one all-inclusive resource.

Natural Food Antimicrobial Systems A.S. Naidu, 2000-06-21 Consumer concerns play a critical role in dictating the direction of research and development in food protection. The rising demand for minimally processed foods, growing concerns about the use of synthetic preservatives, and suspected links between the overuse of antibiotics and multi-drug resistance in microbes has made food safety a global priority. *Natural Food Antimicrobial Systems* focuses on advances in the technology of food safety. Numerous antimicrobial agents exist in animals and plants where they evolved as defense mechanisms. For example, the antimicrobial components of milk have been unraveled in recent years. The book covers how these components - such as lactoferrin - can be used as multifunctional food additives such as antioxidants and immuno-modulating agents. The six sections cover lacto-antimicrobials, ovo-antimicrobials, phyto-antimicrobials, bacto-antimicrobials, acid-antimicrobials, and milieu-antimicrobials. Each chapter provides background and historical information, molecular properties, antimicrobial activity, biological advantage, applications, safety, tolerance, and efficacy, and biotechnology. To satisfy the rapidly changing consumption patterns of the global market, the food processing industry continuously searches for new technologies in food science. Designed as a reference for academia and corporate R & D, *Natural Food Antimicrobial Systems* fills this need, offering in-depth information on emerging biotechnology, efficacy, and applications of natural food antimicrobial systems.

Betaproteobakterium Castellaniella defragrans 65Phen Danny

Brodkorb, 2010-01-04 Monoterpene finden in der Volksmedizin seit langem Anwendung. Beispielsweise enthalten Hustenbonbons oft Menthol oder Eukalyptol. Die heilende Wirkung dieser Monoterpenoide, oft im Gemisch mit anderen Monoterpenen (ätherischen Ölen), wird den antibiotischen Eigenschaften dieser Naturstoffe zugeschrieben. Pflanzen synthetisieren Monoterpene in großer Menge: als Fraßschutz, als Botenstoff zwischen Pflanzen und als Verdunstungsschutz. Allein 127 Millionen Tonnen werden jährlich in die Atmosphäre abgegeben. Von dem Metabolismus der Monoterpene im Boden ist bislang nur wenig bekannt: So tragen Monoterpene im Nadelstreu zur schnellen Ausbreitung von Waldbränden bei (dort befinden sich mehr als ein Liter Monoterpene pro Quadratmeter). Seit einigen Jahren wird der Abbau von Monoterpenen durch anaerobe, Nitrat-atmende Bakterien und methanogene Anreicherungskulturen erforscht. Eines der denitrifizierenden Bakterien stellt *Castellaniella* (ex *Alcaligenes*) *defragrans* 65Phen dar. Dieser Organismus mineralisiert Monoterpene in der Abwesenheit von molekularem Sauerstoff. Unter Nitrat-reduzierenden Bedingungen werden diese Kohlenwasserstoffe komplett zu Kohlenstoffdioxid oxidiert. In dieser Arbeit wurden die Enzymaktivitäten der Geraniol-Isomerase und der Linalool-Dehydratase gereinigt und enzymatisch charakterisiert. In einem fünfstufigen Reinigungsprotokoll wurde die Linalool-Dehydratase zur Homogenität gereinigt. Das Protein katalysierte darüber hinaus die Isomerisierung von Geraniol zu Linalool. Auch die thermodynamisch nicht begünstigten Rückreaktionen von Myrcen zu Linalool und von Linalool zu Geraniol waren messbar. Als Name für das neue Enzym wird daher Linalool-Dehydratase-Isomerase vorgeschlagen. Es verfügt über ein natives Molekulargewicht von 160 kDa und ist ein Tetramer aus einem 40 kDa-Protein. Chirale Gaschromatographie-Analysen zeigten die enantiomeraselektive Isomerisierung von Geraniol über (S)-(+)-Linalool zu Myrcen, mit einem Enantiomerüberschuss von $\geq 99\%$. *Thaurea linaloolentis* 47Lo hatte eine Geraniol-Isomerase-Aktivität zu (R,S)-Linalool, *Thaurea terpenica* 58Eu eine Geraniol-Dehydratase-Aktivität zu Myrcen. Das Gen der Linalool-Dehydratase-Isomerase wurde mittels N-terminaler Proteinsequenzierung in einer vorhandenen Fosmidsequenz von *C. defragrans* identifiziert. Die

Gensequenz kodiert für ein Präprotein mit 397 Aminosäuren inklusive einem N-terminalen Signalpeptid für eine Sec-abhängige Translokation ins Periplasma. Die Linalool-Dehydratase-Isomerase ist das erste Protein einer neuen Proteinfamilie.

Essential Oil Safety Robert Tisserand, Rodney Young, 2013-12-02 The second edition of this book is virtually a new book. It is the only comprehensive text on the safety of essential oils and the first review of essential oil/drug interactions and provides detailed essential oil constituent data not found in any other text. Much of the existing text has been re-written, and 80% of the text is completely new. There are 400 comprehensive essential oil profiles and almost 4000 references. There are new chapters on the respiratory system, the cardiovascular system, the urinary system, the digestive system and the nervous system. For each essential oil there is a full breakdown of constituents, and a clear categorization of hazards and risks, with recommended maximum doses and concentrations. There are also 206 Constituent Profiles. There is considerable discussion of carcinogens, the human relevance of some of the animal data, the validity of treating an essential oil as if it was a single chemical, and the arbitrary nature of uncertainty factors. There is a critique of current regulations. The only comprehensive text on the safety of essential oils The first review of essential oil/drug interactions Detailed essential oil constituent data not found in any other text Essential oil safety guidelines 400 essential oil profiles Five new chapters 305 new essential oil profiles, including Cedarwood, Clary sage, Lavender, Rose, Sandalwood, Tea tree 79 new constituent profiles Five new chapters: the respiratory system, the cardiovascular system, the urinary system, the digestive system, the nervous system.
