**The Philosopher's Plant** Michael Marder, 2014-11-04 Despite their conceptual allergy to vegetal life, philosophers have used germination, growth, blossoming, fruition, reproduction, and decay as illustrations of abstract concepts; mentioned plants in passing as the natural backdrops for dialogues, letters, and other compositions; spun elaborate allegories out of flowers, trees, and even grass; and recommended appropriate medicinal, dietary, and aesthetic approaches to select species of plants. In this book, Michael Marder illuminates the elaborate vegetal centerpieces and hidden kernels that have powered theoretical discourse for centuries. Choosing twelve botanical specimens that correspond to twelve significant philosophers, he recasts the development of philosophy through the evolution of human and plant relations. A philosophical history for the postmetaphysical age, *The Philosopher's Plant* reclaims the organic heritage of human thought. With the help of vegetal images, examples, and metaphors, the book clears a path through philosophy's tangled roots and dense undergrowth, opening up the discipline to all readers.

**The Morville Year** Katherine Swift, 2012-03-01 One of the most admired gardening writers of her generation, Katherine Swift returns to describe a year in the life of her garden she created over twenty years in the grounds of the Dower House at Morville, Shropshire, meditating on everything from the terrain and its history, to the plants and trees, and the odd habits of the animals and humans who inhabit the garden. Following the turning wheel of the Morville seasons, from the green shoots of spring, through summer and autumn, to the stark beauty of winter, and back to spring again, *The Morville Year* is a journal full of surprises and enchantments that will appeal not only to gardeners, but to all who enjoy the natural world.

Daffodil Helen O'Neill, 2017-01-26 A beautifully illustrated, visually lush and intriguing book about the world's most popular and most powerful flower. The daffodil is the beautiful first flower of spring, the inspiration of poets, a treasure-trove to scientists and a symbol of everything from unrequited love, rebirth, eternal life and misfortune. Over centuries, the daffodil has been so many things to so many people: it was called 'Narcissus' by the Greeks and prized by the Romans as guarantee of passage to the Underworld; it was used by medieval Arabs and ancient Chinese for its medicinal properties and it has inspired poets, lovers, artists and scientists down the ages. But in telling the story of the daffodil, what award-winning, best-selling writer Helen O'Neill is really telling is the story of humanity. It's

a narrative of progress from superstition and myth, taking in politics, greed, religion, science, chance, redemption and love. But, appropriately enough for a flower that is now used on a worldwide basis to raise funds for cancer research, it is, above all, a story of hope. Moving, fascinating, eloquent, and also beautiful. 'O'Neill manages to make a biography of a flower feel like something of a detective novel, love story, historical drama and horticultural research paper rolled into one' Sydney Morning Herald
