**Godfather of the Kremlin** Paul Klebnikov,2000 Chronicles the life of the head of one of Moscow's gangster families, who financed the reelection of Boris Yeltsin and became one of his key advisors.

**French and Russian in Imperial Russia** Derek Offord,2015-06-29 This is the second of two companion volumes which examine language use and language attitudes in eighteenth- and nineteenth-century Russia, focusing on the transitional period from the Enlightenment to the age of Pushkin. Set against the background of the rapid transformation of Russia into a major European power, the two volumes of French and Russian in Imperial Russia consider the functions of multilingualism and the use of French as a prestige language among the elite, as well as the benefits of Franco-Russian

bilingualism and the anxieties to which it gave rise. This second volume, *Language Attitudes and Identity*, explores the impact of French on Russian language attitudes, especially among the literary community. It examines the ways in which perceptions of Russian francophonie helped to shape social, political and cultural identity as Russia began to seek space of its own in the European cultural landscape. In the process, it investigates approaches to translation, journalistic debate about language, literary representation of devotees of French social practice and fashion, and manifestations of linguistic purism and patriotism. A comprehensive and original contribution to the multidisciplinary study of language, the two volumes address, from a historical viewpoint, subjects of relevance to sociolinguists (especially bilingualism and multilingualism), social and cultural historians (social and national identity, linguistic and cultural borrowing), Slavists (the relationship of Russian and western culture) and students of the European Enlightenment, Neo-Classicism, Romanticism and cultural nationalism.

*Green Swans* John Elkington, 2020-04-07 Even leading capitalists admit that capitalism is broken. *Green Swans* is a manifesto for system change designed to serve people, planet, and prosperity. In his twentieth book, John Elkington—dubbed the “Godfather of Sustainability”—explores new forms of capitalism fit for the twenty-first century. If Nassim Nicholas Taleb’s “Black Swans” are problems that can take us exponentially toward breakdown, then “Green Swans” are solutions that take us exponentially toward breakthrough. The success—and survival—of humanity now depends on how we rein in the first and accelerate the second. *Green Swans* draws on Elkington’s firsthand experience in some of the world’s best-known boardrooms and C-suites. Using case studies, real-world

examples, and profiles on emergent technologies, Elkington shows how the weirdest “Ugly Ducklings” of today’s world may turn into tomorrow’s world-saving Green Swans. This book is a must-read for business leaders in corporations great and small who want to help their businesses survive the coming shift in global priorities over the next decade and expand their horizons from responsibility, through resilience, and onto regeneration.

**Gingercat**, 2021-07 A little cat finds a home deep in a lonely city - she smells food through an open doorway, laps from one of three bowls, cleans herself on one of three chairs, then settles on one of three beds. When Daddy, Mummy, and their little boy find her fast asleep in their home, they are faced with a decision - what name shall their new cat be given? A gentle, happy story based on a classic fairy tale, *Gingercat* is suitable for a younger audience, early readers, and as a loving bedtime story.

The Physics of Wall Street James Owen Weatherall, 2013 A Harvard scholar argues that mathematical models can provide solutions to current economic challenges, explaining that the economic meltdown of 2008 was based on a misunderstanding of scientific models rather than on the models themselves.

Organized Crime & Money Laundering William B. Z. Vukson, 2003 With the globalization of finance and the speed of electronic transactions, the world's leading nations are leading the battle against the money laundering activities of organized crime. Two of the world's leading organized crime journalists, Antonio Nicaso and Lee Lamothe, are major contributors to the book, which investigates the Japanese underworld, counterfeiting, Russian organized crime and the global influence of the Mafia. The highlight of this new book, however, is an interview with Giulio Andreotti, the disgraced

former Prime Minister of Italy, whose arrest and conviction so controversially brought the issue of organized crime to the attention of the world.

Safe Haven Mark Spitznagel, 2023-10-10 What is a safe haven? What role should they play in an investment portfolio? Do we use them only to seek shelter until the passing of financial storms? Or are they something more? Contrary to everything we know from modern financial theory, can higher returns actually come as a result of lowering risk? In *Safe Haven*, hedge fund manager Mark Spitznagel—one of the top practitioners of safe haven investing and portfolio risk mitigation in the world—answers these questions and more. Investors who heed the message in this book will never look at risk mitigation the same way again.

*Design Ecologies* Lisa Tilder, Beth Blotstein, 2012-03-20 Contemporary architects are under increasing pressure to offer a sustainable future. But with all the focus on green building there has been little investigation into the meaningful connections between architectural design, ecological systems, and environmentalism. A new generation of architects, landscape architects, designers, and engineers aims to recalibrate what humans do in the world according to how the world works as a biophysical system. Design in this sense is a larger concept having to do as much with politics and ethics as with aesthetics and technology. This recasting of the green movement for the twenty-first century transforms design into a positive agent balancing societal values with environmental needs. *Design Ecologies* is a ground-breaking collection of never-before-published essays and case studies by today's most innovative designers and critics. Their design strategies—social, material, and biological—run the gamut from the intuitive to the

highly technological. One essay likens window-unit air conditioners in New York City to weeds in order to spearhead the development of potential design solutions. Latz + Partner's Landscape Park integrates vegetation and industry in an urban park built amongst the monumental ruins of a former steelworks in Duisburg Nord, Germany. The engineering firm Arup presents its thirty-three-square-mile masterplan for Dongtan Eco City, an energy-independent city that China hopes will house half a million people by 2050. An essay by designer Bruce Mau leads off a stellar list of emerging designers, including Jane Amidon, Blaine Brownell, David Gissen, Gross.Max, Robert Sumrell and Kazys Varnelis, Stephen Kieran and James Timberlake, R&Sie(n), Studio 804, and WORKac.

**A History of Belize** Robert Leslie, 1997 A History of Belize, Nation in the Making traces the history of our country. It focusses [sic] on how we became what we are today. it travels through time and gives us the opportunity to study the complex society which we have inherited. History is never complete for we create history each day. The people, places and events presented in this book show us how important history is to a nation. We cannot move constructively into the future unless we understand the past and benefit from that knowledge. This book helps us to do just that."--p. 4 of cover

**Why Most Things Fail** Paul Ormerod, 2007-12-18 With the same originality and astuteness that marked his widely praised Butterfly Economics, Paul Ormerod now examines the "Iron Law of Failure" as it applies to business and government--and explains what can be done about it. "Failure is all around us," asserts Ormerod. For every General Electric--still going strong after more than one hundred years--there are dozens of businesses like Central Leather, which was one of the world's largest companies in 1912

but was liquidated in 1952. Ormerod debunks conventional economic theory—that the world economy ticks along in perfect equilibrium according to the best-laid plans of business and government—and delves into the reasons for the failure of brands, entire companies, and public policies. Inspired by recent advances in evolutionary theory and biology, Ormerod illuminates the ways in which companies and policy-setting sectors of government behave much like living organisms: unless they evolve, they die. But he also makes clear how desirable social and economic outcomes may be achieved when individuals, companies and governments adapt in response to the actual behavior and requirements of their customers and constituents. *Why Most Things Fail* is a fascinating and provocative study of a truth all too seldom acknowledged.

**Think Twice** Michael J. Mauboussin, 2012-11-06 No matter your field, industry, or specialty, as a leader you make a series of crucial decisions every single day. And the harsh truth is that the majority of decisions—no matter how good the intentions behind them—are mismanaged, resulting in a huge toll on organizations, the people they employ, and even the people they serve. So why is it so hard to make sound decisions? In *Think Twice*, now in paperback, Michael Mauboussin argues that we often fall victim to simplified mental routines that prevent us from coping with the complex realities inherent in important judgment calls. Yet these cognitive errors are preventable. In this engaging book, Mauboussin shows us how to recognize and avoid common mental missteps. These include misunderstanding cause-and-effect linkages, not considering enough alternative possibilities in making a decision, and relying too much on experts. Through vivid stories,

the author presents memorable rules for avoiding each error and explains how to recognize when you should “think twice”—questioning your reasoning and adopting decision-making strategies that are far more effective, even if they seem counterintuitive. Armed with this awareness, you'll soon begin making sounder judgment calls that benefit (rather than hurt) your organization.
