The Air Expeditionary Force: a Strategy for an Uncertain Future? Lieutenant Colonel Usaf Michael Nowak,USAF, Michael J., Michael Nowak, Lieutenant , USAF,2012-09-19

Contrary to initial expectations, the end of the Cold War has not resulted in a spontaneous outbreak of international peace and stability. While the nuclear threat has diminished, previously suppressed ethnic and nationalistic rivalries have boiled over and become additive to existing trouble spots in Korea and Southwest Asia. In spite of these challenges, defense spending and military forward presence have declined as the lack of a peer competitor has deprived our national security strategy of a definable threat. The Air Expeditionary Force (AEF) attempts to deal with the uncertainty of the current volatile world by providing regional commanders in chief with effects-based packages of airpower that can quickly respond to US national security requirements. This employment strategy attempts to balance international uncertainty with a decreased forward presence and reduced force structure. Recently the Air Force has also touted the AEF as a tool to manage an operational tempo and deployment rate problem that is causing retention difficulties. In his paper, Colonel Nowak, USAF, argues that while the AEF is a step in the right direction, the focus appears to be too narrow. Current Air Force AEF planning is oriented toward a conventional force-on-force-style aggression like those aggressions we have seen in Iraq and the former republics of Yugoslavia. However, the most probable use of an AEF will be in a noncombat role, supporting humanitarian or peacekeeping operations. In these nontraditional types of AEFs, personnel and leadership skills, as well as the force composition, will be markedly different from a combat-style AEF. The study begins by reviewing the international and domestic context that has caused the Air Force to focus on expeditionary operations. It continues by discussing the historical roots of the AEF and its current employment philosophy. The study concludes by identifying courses of action that should keep the AEF viable in an uncertain international environment.

Star Crossed Kimberly C. Moore,2020-09-01 The astronaut crime that shocked the world Star Crossed transports readers to the moment the news broke that one of America's heroes, an astronaut who had flown aboard the Space Shuttle Discovery& just months before, had been arrested for a very bizarre crime. Lisa Nowak had driven 900 miles from Houston to Orlando to intercept and confront her romantic rival in an airport parking lot—allegedly using diapers on the trip so she wouldn't have to stop. Nowak had been dating astronaut William "Billy" Oefelein when she learned that Oefelein was seeing a new girlfriend—U.S. Air Force Captain Colleen Shipman. The "astronaut love triangle" scandal quickly made headlines. The world watched as Nowak was dismissed from NASA, pleaded guilty to a felony, and received an "other than honorable" military discharge. An award-winning investigative reporter who covered Nowak's criminal case, Kimberly Moore offers behind-the-scenes insights into Nowak's childhood, her rigorous training, and her mission to space. Moore ventures inside the mind of the detective who studied the actions Nowak took that fateful February night. She includes never-before-told details of Nowak's psychiatric diagnosis, taking a serious look at how someone so accomplished could spiral into mental illness to the point of possible attempted murder. This book spotlights the often-overlooked psychological health of astronauts, exploring how they are cared for by NASA doctors and what changes have been made in recent years to support space travelers on long-term missions. Expertly told, Moore's story is a riveting journey inside the high-pressure world of one of America's most elite agencies and the life of one beleaguered astronaut.
