   Podcasting Now! Andrew J. Dagys,2006 Podcasting is a combination of MP3 files, Internet radio, RSS (Really Simple Syndication), and iPods. MP3 files are typically individual tracks from music or comedy CDs, Internet radio is done with streaming audio in real time, and RSS lets your computer automatically keep track of new information posted on websites. Podcasting combines these technologies to create radio/music/talk programs that you can download and play on your computer or on an iPod or other portable player. Not only can you listen to podcasts, you can create and distribute your own podcasts without a lot of difficulty. Many of the techniques already used to publicize a website or a blog can be used to promote a podcast. In fact, one

6

popular use for podcasting is as an audio blog. Podcasters can also include images and other data, so podcasting can be used for business as well as entertainment. It's possible to build training curriculum, product briefings, marketing presentations, and even new employee orientations with podcasts: the potential for this field is barely scratched.

Moving Sounds Phylis Johnson,Ian Punnett,2019 Moving Sounds: A Cultural History of the Car Radio' explores the unique animating symbiosis that develops whenever previously unrelated technologies become intertwined and form a mutually invigorating relationship. When?car? and?radio? became permanently inculcated, it changed how both cars and radio were designed and experienced. 'Moving Sounds' is the first book-length study exploring the relationship between the car and the radio. While much scholarship has been devoted to the general history of radio, radio?s unique relationship with the open road has been largely overlooked. The nascent interconnectivity between the early car and radio developers, and what they did to help each other, is another aspect of cultural history that is explored in Moving Sounds.
