Using Video to Assess Teaching Performance Carrie Eunyoung Hong, Irene Van Riper,2017-09-15 Recent performance-based teacher assessments have challenged teacher educators to rethink the ways that candidates are prepared in education programs. edTPA (formerly the Teacher Performance Assessment) requires teacher candidates to demonstrate knowledge and skills through authentic teaching artifacts, written commentary, and video clips recorded in real classroom settings. As part of the edTPA requirements, teacher candidates submit video clips of their own teaching to be viewed and assessed by evaluators. This implies that teacher candidates should know how to utilize their own videos for the purpose of improving their instructional skills as well as the learning of their students. These initiatives have urged teacher educators to prepare their candidates for the active use of video-recorded instruction either in university classrooms or in field-based practices. This book provides research-based strategies to support video analysis of authentic teaching in initial teacher education programs. It also presents a review of video recording tools in reference to their features and practicality for different educational settings.
