Waste Valorization for Bioenergy and Bioproducts Hwai Chyuan Ong, Islam Md Rizwanul Fattah, Indra Mahlia, 2024-01-14 Waste Valorisation for Bioenergy and Bioproducts: Biofuel, Biogas, and Value-Added Products presents a comprehensive review of the state-of-the-art of waste valorization from solid, liquid, and gaseous waste streams. The book thoroughly examines the conversion of waste-to-energy from the following waste streams: • Commercial, institutional, and residential food wastes, particularly those currently disposed of in landfills. • Biosolids, organic-rich aqueous streams, and sludges from municipal wastewater treatment processes. • Manure slurries from concentrated livestock operations. • Organic wastes from industrial operations, including, but not limited to, food and beverage manufacturing, biodiesel production, and integrated biorefineries, as well as other industries such as pulp and paper, forest products, and pharmaceuticals. • Biogas derived from any of the above feedstock streams such as landfill gas. Each chapter critically examines the challenges and opportunities in the production of waste-to-energy processes, along with addressing the acceptability and marketability of transforming wastes into value-added products. The final chapters analyze the techno-economic viability and the sustainability dimensions of valorizing biological wastes. Waste Valorisation for Bioenergy and Bioproducts: Biofuel, Biogas, and Other Value-Added Products from Different Waste Streams is a one-stop resource for graduate students, researchers, and practicing engineers involved in waste-to-energy and waste management, and will be of interest to environmental, chemical, and process engineers involved in bioenergy and renewable energy. Presents the state-of-the-art of waste valorization strategies and emerging technologies that have the potential to revolutionize waste-to-energy. Examines the challenges and opportunities in scaling up production and improving acceptability and marketability of waste-to-energy technologies and conversion to value-added products. Evaluates a range of parameters, including the techno-economic viability and sustainability dimensions for the valorization of liquid, solid, and gaseous waste streams, providing a comparison of the medium to long term performance of relevant Waste-to-Energy technologies.

Environmental Management Technologies Pankaj Chowdhary, Vineet Kumar, Sunil Kumar, Vishvas Hare, 2022-11-29 Environmental Management Technologies: Challenges and Opportunities details the environmental problems posed by the various types of toxic organic and inorganic pollutants discharged from both natural and anthropogenic activities and their toxicological effects in environments, humans, animals, and plants. This book also highlights the recent advanced and innovative methods for the effective degradation and bioremediation of organic pollutants, heavy metals, dyes, etc. from the environment for sustainable development. Features of the book: • Provides state-of-the-art information on pollutants, their sources, and deleterious impacts on the environment • Elucidates the recent updates on Emerging Pollutants (EPs) in pharmaceutical waste and personal care products • Discusses the various physico-chemical, biological, and combination treatment systems for sustainable development • Details recent research findings in the area of environmental waste management and their future challenges and opportunities

Machine Learning and Big Data Analytics Paradigms: Analysis, Applications and Challenges Aboul Ella

Hassanien, Ashraf Darwish, 2020-12-14 This book is intended to present the state of the art in research on machine learning and big data analytics. The accepted chapters covered many themes including artificial intelligence and data mining applications, machine learning and applications, deep learning technology for big data analytics, and modeling, simulation, and security with big data. It is a valuable resource for researchers in the area of big data analytics and its applications.

The Tears of Olive Trees AbdulKarim Makadma, 2015-08-03 The Tears of Olive Trees is a multi-generational non-fiction memoir of a Palestinian family's heroic struggle against poverty, violence and oppression. In the 1948 Nakba, the Zionists stole the AlShaikh family's home and lands and exiled them to a refugee camp in Gaza. Rather than to return evil for evil, this incredible, heroic family struggled in peace against all odds to give their children a better life. The Tears of Olive Trees dares to tell the truth about what really happened to the Palestinian people through the experiences of a man who lived through the events of the past fifty years first as a refugee and later as a physician and humanitarian who immigrated to the West.

40 Years Between Egypt & Usa Mahmoud Zaher, 2011-03 The idea to write this book comes from my trips between the Mediterranean Sea and Atlantic Ocean, between North Africa, Europe, and the United States (about four trips per year that started on August 1969 and continues until now).

Crop Sustainability and Intellectual Property Rights Soumya Mukherjee, Piyali Mukherjee, Tariq Aftab, 2023-08-18 This new book merges the concepts of traditional agriculture, crop sustainability, and intellectual property rights associated with plant protection and agricultural products. It discusses various strategies associated with crop tolerance to adverse environmental conditions and also highlights the role of agricultural intellectual property rights, along with the implications for plant patents, protection of farmers' rights, and geographical indication in plant products, to provide a broader outlook toward strategies for sustainable agriculture and global food security associated with IPR. The chapters provide an overview of sustainable crop cultivation in traditional agriculture as well as with new biotechnological approaches. The volume explores several stress resilience strategies and issues for crops, considering how to mitigate the effect of increased carbon dioxide concentration, heavy metal pollution, over-salinized soils, and cold spells. It also discusses how to make desert farming more efficient; how to increase abiotic stress tolerance of crops with grafting, seed soaking/priming, soil amendment, and more. The chapters on agricultural intellectual property rights address IPR in conjunction with food security, the rights of farmers, legal applications and protection of plant patents, protection of traditional knowledge, international legal issues, and plant variety protection rights in agriculture and more.

Contesting Antiquity in Egypt Donald Malcolm Reid, 2019-09-03 The history of the struggles for control over Egypt's antiquities, and their repercussions, during a period of intense national ferment. The sensational discovery in 1922 of Tutankhamun's tomb, close on the heels of Britain's declaration of Egyptian independence, accelerated the growth in Egypt of both Egyptology as a formal discipline and of 'pharaonism'—popular interest in ancient Egypt—as an inspiration in the struggle for full independence. Emphasizing the three decades from 1922 until Nasser's revolution in 1952, this compelling follow-up to *Whose Pharaohs?* looks at the ways in which Egypt

developed its own archaeologies—Islamic, Coptic, and Greco-Roman, as well as the more dominant ancient Egyptian. Each of these four archaeologies had given birth to, and grown up around, a major antiquities museum in Egypt. Later, Cairo, Alexandria, and Ain Shams universities joined in shaping these fields. Contesting Antiquity in Egypt brings all four disciplines, as well as the closely related history of tourism, together in a single engaging framework. Throughout this semi-colonial era, the British fought a prolonged rearguard action to retain control of the country while the French continued to dominate the Antiquities Service, as they had since 1858. Traditional accounts highlight the role of European and American archaeologists in discovering and interpreting Egypt's long past. Donald Reid redresses the balance by also paying close attention to the lives and careers of often-neglected Egyptian specialists. He draws attention not only to the contests between westerners and Egyptians over the control of antiquities, but also to passionate debates among Egyptians themselves over pharaonism in relation to Islam and Arabism during a critical period of nascent nationalism. Drawing on rich archival and published sources, extensive interviews, and material objects ranging from statues and murals to photographs and postage stamps, this comprehensive study by one of the leading scholars in the field will make fascinating reading for scholars and students of Middle East history, archaeology, politics, and museum and heritage studies, as well as for the interested lay reader.

Biology and Biotechnology of Environmental Stress Tolerance in Plants Aryadeep Roychoudhury, 2023-07-21 Abiotic stresses such as drought, high salt, cold, heat, UV radiation, heavy metal pollution, etc., are increasingly responsible for restricting plant growth and agricultural production and are becoming more alarming due to threats from global climate change. To combat these threats, this new 3-volume set provides a comprehensive understanding of the mechanisms that mediate biosynthesis, accumulation, and degradation of plant metabolites to improve crop production and enhance abiotic stress tolerance in plants. Volume 1: Secondary Metabolites in Environmental Stress Tolerance focuses exclusively on the diverse secondary metabolites that play a major role in the adaptation of plants to the environment and in overcoming stress conditions as well as their implications in enhancing tolerance mechanisms. The book presents information on the protective roles rendered by a wide array of antioxidative secondary metabolites and their regulation during diverse environmental stress. Volume 2: Trace Elements in Environmental Stress Tolerance throws light on the different inorganic trace elements, including metal nanoparticles, that help to deal with various environmental stresses. While these elements at high level create considerable phytotoxicity and halt metabolic and enzymatic activity, they also promote growth and development in limited quantity, so that they have significant potential in revamping plant morphology and physiology under stressed conditions. Hence, optimum concentration management of these elements can help to mitigate world hunger and contribute toward sustainable agriculture and food security under challenging environments. Volume 3: Sustainable Approaches for Enhancing Environmental Stress Tolerance focuses on agronomic and biochemical approaches as well as biotechnological and high-throughput technologies, including the prospects of genetic engineering, epigenetics and the latest CRISPR/Cas technology in generating stress-tolerant plants. The volume provides a clear roadmap for the implementation of techniques for improving abiotic stress tolerance in plants for better sustenance.

Schistosomiasis Adel Af Mahmoud, 2001-03-15 This volume brings together updated fundamental knowledge of the schistosomes, their biology and epidemiology, the mechanism of disease and a full description of the pathological sequelae and clinical syndromes in humans. It concludes with chapters on diagnosis and treatment prospects of vaccine development and the most significant controversies regarding immunology and epidemiology.

The papers cover the latest research on machine learning, deep learning, biomedical engineering, control and chaotic systems, text mining, summarization and language identification, machine learning in image processing, renewable energy, cyber security, and intelligence swarms and optimization.

Quality and Production of Forage Vincenzo Tufarelli, 2019-10-29 The book *Quality and Production of Forage* is intended to keep readers updated on the developments occurring in this field. As it is apparent that livestock animals are important throughout the world because of the meat, milk and egg they produce, knowledge about the forages available to animals must also be considered for increased production, quality and efficiency. This book provides information that readers will find considerably invaluable about forage feeds, such as grass, legumes, and straw. The book is composed of ten papers, focusing on a wide range of research activities and topics that feature the following concepts of forage: the effect of conservation method on forage protein value; Microbial the composition and mycotoxin content in forage; genetic diversity of forages; timely sowing to maximize yield for both grain and biomass; ensiling treatments on forage quality; the qualitative characteristics of different accessions of new forage species; forage policy influencing feed costs; feeding forage on animal health; high-protein tropical forages as alternative sources for poultry; impact of forages in poultry diet and significance of forages in sustainable poultry production systems. This book will be an invaluable reference for students and professionals in agricultural science and grassland and animal husbandry researches.
