Middle of Diamond India Shashank Mani, 2023-09-15 Middle of Diamond India proposes a revolutionary idea - that India has long ignored its largest and most talented segment, citizens in the Tier 2 and Tier 3 districts, its Middle. The book reveals the hidden stories of those in its Middle who have been ignored owing to their location and language. By examining India's revolutionary past, its culture, its citizens, its innovators, and its spirit, the book illuminates this Diamond shaped India. Replete with characters, anecdotes, insights, research and accounts of an annual pilgrimage on a special train-Jagriti Yatra, and an enterprise ecosystem established in Deoria district, the book outlines a new vision of India focussed on its rising Middle. It proposes a Banyan Revolution over the coming twenty-five years of Amrit Kaal, using the tool of enterprise or Udyamita that can ignite a national renaissance. The book argues that by recognizing and awakening the entrepreneurial vitality of those in small towns and districts, we can create meaning for millions of citizens and define a new modernity for India.

Playing Dystopia Gerald Farca, 2018-11-30 Video games permeate our everyday existence. They immerse players in fascinating gameworlds and exciting experiences, often inviting them in various ways to reflect on the enacted events. Gerald Farca explores the genre of dystopian video games and the player's aesthetic response to their nightmarish gameworlds. Players, he argues, will gradually come to see similarities between the virtual dystopia and their own ›offline‹ environment, thus learning to stay wary of social and political developments. In his analysis, Farca draws from a variety of research fields, such as literary theory and game studies, combining them into a coherent theory of aesthetic response to dystopian games.

Manas Ka Hans Amṛtalāla Nāgara, 1983 Fictional biography of the sixteenth century poet Tulsidas, who is revered as the greatest of the indian poets.

Proceedings of the Canadian Society of Civil Engineering Annual Conference 2021 Scott Walbridge, Mazdak Nik-Bakht, Kelvin Tsun Wai Ng, Manas Shome, M. Shahria Alam, Ashraf el Damatty, Gordon Lovegrove, 2022-05-29 This book comprises the proceedings of the Annual Conference of the Canadian Society of Civil Engineering 2021. The contents of this volume focus on specialty conferences in construction, environmental, hydrotechnical, materials, structures, transportation engineering, etc. This volume will prove a valuable resource for those in academia and industry.

Vanadium Catalysis Manas Sutradhar, Armando J L Pombeiro, José Armando L da Silva, 2020-11-05 Vanadium is one of the more abundant elements in the Earth's crust and exhibits a wide range of oxidation states in its compounds making it potentially a more sustainable and more economical choice as a catalyst than the noble metals. A wide variety of reactions have been found to be catalysed by homogeneous, supported and heterogeneous vanadium complexes and the number of applications is growing fast. Bringing together the research on the catalytic uses of this element into one essential resource, including theoretical perspectives on proposed mechanisms for vanadium catalysis and an overview of its relevance in biological processes, this book is a useful reference for industrial and academic chemists alike.

India's China War Neville Maxwell,2015-01-01 This is one of those rare books that puts an entirely new light on a chapter of history, and it must be read by anyone concerned with international affairs. Although cool and scholarly it unrolls like a fascinating thriller. It is an important work of revisionist history and a gruesome study of the way in which wars start, superbly documented (largely from official Indian sources but also from secret Indian papers) and beautifully sustained. By showing how India led the world up the garden path it demolishes and throws to the wind a pillar of the 'contain China' doctrine -- the belief that in 1962 India was the victim of unprovoked Chinese aggression. Maxwell's book is magnificent on every count, an historical achievement of the first rank.

2021 International Conference on Emerging Smart Computing and Informatics (ESCI) IEEE Staff,2021-03-05 This conference aims to present a unified platform for advanced and multi disciplinary research towards design of smart computing and informatics The theme is on a broader front focuses on various innovation paradigms in system knowledge, intelligence and sustainability that may be applied to provide realistic solution to varied problems in society, environment and industries The scope is also extended towards deployment of emerging computational and knowledge transfer approaches, optimizing solutions in varied disciplines of science, technology and healthcare
