Bibliography 1935-69 O. Kennard, D.G. Watson, 2013-06-29 This classified bibliography of organic and organometallic crystal structures covers the period 1935-1969 and provides references to over 4,000 compounds whose structures were analysed by X-ray or neutron-diffraction methods. Volume 1 deals with general organic structures and Volume 2 with complexes, organometals and organo metalloids. The bibliography is the first of a new series of publications Molecular Structures and Dimensions prepared at the Crystallographic Data Centre, University Chemical Laboratory, Cambridge. The Centre has been supported since 1965 by the Office for Scientific and Technical Information as part of the British contribution to international data activities. The main objective of the Centre is to assemble a computer-based File containing both bibliographic information and numerical data abstracted from the literature and relevant to molecular and crystal structures, as obtained by diffraction methods. The File is designed to permit the checking of published numerical values, particularly interatomic distances and bond angles and to present published results in a variety of new ways. Contents of the File will be made available through the series Molecular Structures and Dimensions and also by the provision of data on magnetic tapes or discs. At present the numerical data relating to molecular dimensions are being checked and will be published, at a later date, as further volumes in this series and also as magnetic tapes. The File is being extended to cover electron diffraction in the gas phase.

A Survey of Hinduism Klaus K. Klostermaier,1994-08-30 This revision reflects recent developments and events in India. In particular, a new Part has been added entitled The Meeting of East and West in India which contains a new chapter on Mahatma Gandhi. There is also a new chapter on the position of women in Hinduism. In addition to the added chapters, the entire book has been rewritten with many new illustrations and maps. This book provides a comprehensive survey of the Hindu tradition, dealing with the history of Hinduism, the sacred writings of the Hindus, the Hindu worldview, and the specifics of the major branches of Hinduism—Vaisnavism, Saivism, and Saktism. It also focuses on the geographical ties of Hinduism with the land of India, the social order created by Hinduism, and the various systems of Hindu thought. Klostermaier describes the new development of Hinduism in the 19th and 20th centuries, including present-day political Hinduism and the efforts to turn Hinduism into a modern-world religion. A unique feature of this book is its treatment of Hinduism in a topical fashion, rather than by chronological description of the development of Hinduism or by summary of the literature. The complexities of Hindu life and thought are thus made real to the reader. Hindus will recognize it as their own tradition.

Handbook of Liquid Crystals—Volume II Shri Singh,

Structure Reports J. Trotter,2013-06-29 In the past the aim of Structure Reports has been to present critical reports on all work of crystallographic structural interest, whether it is derived directly from X-ray, electron, or neutron diffraction, or even indirectly from other experiments. The reports were intended to be critical and not mere abstracts, except in some cases when a brief indication of the content of a paper of related interest was included in the form of an abstract. In selecting topics for reporting, the criterion 'of structural interest' was freely interpreted in terms of what was topically interesting. However, the amount of literature covering matters of structural interest became so large that this policy could no longer be followed, and from Volume 28 onwards, critical reports are given only on actual structure determinations. Only in this way was it possible to keep yearly volumes to a fairly uniform and usable size. Starting with Volume 30, Structure Reports is produced in a new format by photo-offset printing from typed manuscript with unjustified lines. At the time when the decision for this change was taken, the cost of setting the manuscript in type was becoming so high as to render the cost of individual subscription prohibitive. At that time automatic typing methods giving justified lines, etc.
