The Sikh Next Door Manpreet J Singh, 2021-12-30
The Sikhs have been a people in transition. Unwanted displacements, willing movements and a changing world have led them through demographic, occupational and experiential shifts. While this has led to the evolution of new facets within the community, it has also evoked mixed responses from outside. As new generations of Sikhs engage with the world through sensibilities defined by their contemporary contexts, they find themselves constructed in images dissonant with their lived realities. *The Sikh Next Door: An Identity in Transition* traces these changes while also making an incisive analysis of old stereotypes-some heroic, some menacing and some farcical. It simultaneously brings into focus the real people behind these images, their varying social stances and their collective commitment to a common religious identity. The work attempts to reframe the Sikhs, bending a few existing narratives and offering an impetus for a more nuanced understanding of the community.

Statistics is Easy Manpreet Singh

Katari,Sudarshini Tyagi,Dennis Shasha,2021-04-08
Computational analysis of natural science experiments often confronts noisy data due to natural variability in environment or measurement. Drawing conclusions in the face of such noise entails a statistical analysis. Parametric statistical methods assume that the data is a sample from a population that can be characterized by a specific distribution (e.g., a normal distribution). When the assumption is true, parametric approaches can lead to high confidence predictions. However, in many cases particular distribution assumptions do not hold. In that case, assuming a distribution may yield false conclusions. The companion book *Statistics is Easy!* gave a (nearly) equation-free introduction to nonparametric (i.e., no distribution assumption) statistical methods. The present book applies data preparation, machine learning, and nonparametric statistics to three quite different life science datasets. We provide the code as applied to each dataset in both R and Python 3. We also include exercises for self-study or classroom use.

Before Heaven Manpreet Singh,2017-07-16 A tale of two unfortunates.Tale full of heavenly experienceFull of life experiencesTwo unfortunate persons who have been living in a hole their whole lives decides to travel. This travel tale takes us with them on their journey to see whether they were really able to travel or enjoy. Will fate let them do what they want to do. Will they survive against all odds. What steps nature decides to take to stop then and then what course they take.

This journey is not just a journey of few days it is full of their life experiences. It takes you into a mystical world. This tale tells you about what happened to them and what changes it brings in their life. From Section 6: Last Day It was past midnight when my friend felt uneasiness and woke up. He heard lot of noises from the road. He went to the hotel window to probe about the noise. Lot of people were running from here and there. Sound of raging Beas River could be heard from inside the hotel room. It seemed as that some tragedy like Uttrakhand had struck here. Water from the over flooded river had come on roads and was striking the hotel walls with full force. People were running to save their lives. Kids were crying. Bodies were floating in the water. It seemed that we would be trapped here or the hotel would come down. He rushed from one window to other to take stock of the situation. He saw entire road was washed away by water. People were clinging to the walls of nearby building or whatever they can get for support. Our hotel's wall was cracking from below. Lot of thoughts crossed his mind. Many things we still wanted to do. Many dreams were still unfulfilled. And they would remain the same if we died here today. Whole life flashed through his mind. He remembered that they say when you are near your death whole journey of life flashes through your mind and you regret that the things you could had done but left them to be done later, kept yourself busy full filling the responsibilities. He immediately rushed to wake me up and ran here and there. I felt as somebody was shaking me violently. I waked

up bewildered. I tried to open my eyes with though lot of difficulty. But could not see anything properly without glasses. Fumbled on bedside and reached for glasses and put them on. I saw Gurbaljeet was breathing heavily.
