Manta and devil rays are some of the most intriguing creatures in the ocean. Driven forward by powerful beats of wing-like pectoral fins, these filter feeders search the waters for prey, their horn-like head fins giving rise to ancient mariners' tales of fearsome devilfish dragging boats into the ocean depths. Beloved by scuba divers and marine biologists alike, these impressive animals have never had a comprehensive field guide dedicated to them—until now. *Guide to the Manta and Devil Rays of the World* includes detailed information on the identification, characteristics, threats, and distribution for each species in this family. Illustrated with more than 200 color photos, drawings, and plates, this guide also contains an expansive introduction to the general taxonomy, biology, and behavior of these iconic animals. This book will be an essential resource for fisheries management and international trade enforcement, and for anyone involved in ongoing manta and devil ray research and conservation. The first dedicated field guide for manta and devil rays Exhaustive treatment of every aspect related to their identification and biology Filled with 200+ color drawings, photos, and diagrams

**Feminist and Human Rights Struggles in Peru** Pascha Bueno-Hansen,2015-07-30 In 2001, following a generation of armed conflict and authoritarian rule, the Peruvian state created a Truth and Reconciliation Committee (TRC). Pascha Bueno-Hansen places the TRC, feminist and human rights movements, and related non-governmental organizations within an international and historical context to expose the difficulties in addressing gender-based violence. Her innovative theoretical and methodological framework based on decolonial feminism and a critical engagement with intersectionality facilitates an in-depth examination of the Peruvian transitional justice process based on field studies and archival research. Bueno-Hansen uncovers the colonial mappings and linear temporality underlying transitional justice efforts and illustrates why transitional justice mechanisms must reckon with the societal roots of atrocities, if they are to result in true and lasting social transformation. Original and bold, Feminist and Human Rights Struggles in Peru elucidates the tension between the promise of transitional justice and persistent inequality and impunity.

**The Manta** National Aeronautics and Space Administration (NASA),2018-07-16 The overall goal was to investigate and exploit the advantages of using remotely powered vehicles (RPV's) for in-flight data collection at low Reynold's numbers. The data to be collected is on actual flight loads for any type of rectangular or tapered airfoil section, including vertical and horizontal stabilizers. The data will be on a test specimen using a force-balance system which is located forward of the aircraft to insure an undisturbed air flow over the test section. The collected data of the lift, drag and moment of the test specimen is to be radioed to a ground receiver, thus providing real-time data acquisition. The design of the mission profile and the selection of the instrumentation to satisfy aerodynamic requirements are studied and tested. A half-size demonstrator was constructed and flown to test the flight worthiness of the system. Shark Research Jeffrey C Carrier, Michael R. Heithaus, Colin A. Simpfendorfer, 2018-09-03 Over the last decade, the study of shark biology has benefited from the development, refinement, and rapid expansion of novel techniques and advances in technology. These have given new insight into the fields of shark genetics, feeding, foraging, bioenergetics, imaging, age and growth, movement, migration, habitat preference, and habitat use. This pioneering book, written by experts in shark biology, examines technologies such as autonomous vehicle tracking, underwater video approaches, molecular genetics techniques, and accelerometry, among many others. Each detailed chapter offers new insights and promises for future studies of elasmobranch biology, provides an overview of appropriate uses of each technique, and can be readily extended to other aquatic fish and marine mammals and reptiles. Including chapter authors who were pioneers in developing some of the technologies discussed in the book, this book serves as the first single-source reference with in-depth coverage of techniques appropriate for the laboratory and field study of sharks, skates, and rays. It concludes with a unique section on Citizen Science and its application to studies of shark biology. This is a must-read for any marine biologist or scientist working in the field of shark biology, as well as marine biology students and graduates.
