The Duty of Medical Practitioners and CAM/TCM Practitioners to Inform Competent Adult Patients about Alternatives Xiju Zhao, 2013-12-18 The book pays interest to a small and almost untouched topic: a health practitioner's duty to inform about alternatives. It covers both orthodox medicine practitioners and CAM practitioners. The topic is explored in a comparative way, examining the laws of not only common law jurisdictions, such as the USA, England, Canada, Australia, New Zealand, but also two East Asia jurisdictions ( China and Japan ). It uses the collective wisdom of several common law jurisdictions, but also differentiates them. It places the issue of "disclosure of alternatives" in a clear and wider context, making a cogent distinction between diagnosis/treatment and information disclosure. □

Healing Logics Erika Brady, 2001-04-01 Scholars in folklore and anthropology are more directly involved in various aspects of medicine—such as medical education, clinical pastoral care, and negotiation of transcultural issues—than ever before. Old models of investigation that artificially isolated folk medicine, complementary and alternative medicine, and biomedicine as mutually exclusive have proven too limited in exploring the real-life complexities of health belief systems as they observably exist and are applied by contemporary Americans. Recent research strongly suggests that individuals construct their health belief systems from diverse sources of authority, including community and ethnic tradition, education, spiritual beliefs, personal experience, the influence of popular media, and perception of the goals and means of formal medicine. Healing Logics explores the diversity of these belief systems and how they interact—in competing, conflicting, and sometimes remarkably congruent ways. This book contains

essays by leading scholars in the field and a comprehensive bibliography of folklore and medicine.
