Pacific Economic Monitor – August 2023 Asian Development Bank,2023-08-01 Pacific economies are bouncing back as tourism recovers and infrastructure projects resume, but inflationary pressures and vulnerability to natural hazards remain downside risks. This edition of the Pacific Economic Monitor tracks the rebound of some tourism-dependent economies; explores new opportunities from agriculture, digitalization, and fisheries; and analyzes ways to mitigate fiscal risks and support sustainable economic growth. It highlights how policies can better support women entrepreneurs and how strengthening fiscal reserves can help countries recover more quickly from shocks.

Asian Development Outlook 2022 Update Asian Development Bank,2022-09-01 In this report, ADB has lowered its forecasts for economic growth in developing Asia and the Pacific to 4.3% in 2022 and 4.9% in 2023, amid mounting challenges. Its theme chapter looks at how digital entrepreneurship spurs growth and innovation. The region's economy is expected to grow 4.3% this year, compared with ADB's projection in April of a 5.2% expansion, while the growth forecast for next year is lowered to 4.9% from 5.3%. The downward revisions have been driven by increased monetary tightening by central banks, fallout from the protracted Russian invasion of Ukraine, and recurrent COVID-19 lockdowns in the People's Republic of China. Inflation in developing Asia this year is likely to reach 4.5%, up from ADB's earlier projection of 3.7%. The forecast for 2023 is 4.0%, up from 3.1%. While inflation in the region remains lower than elsewhere, supply disruptions continue to push up food and fuel prices. The report's theme chapter looks at the role of entrepreneurship in achieving inclusive growth, and how governments in the region can create a more enabling environment for digital entrepreneurs

Uzbekistan Quality Job Creation as a Cornerstone for Sustainable Economic Growth Kym Anderson,Edimon Ginting,Kiyoshi Taniguchi,2020-06-01 Uzbekistan has achieved sustained growth through its gradual transition to a market-based economy through cautious economic policy reforms. Despite its gradual approach to development challenges, the country experienced the smallest output decline among former Soviet economies and enjoyed high rates of economic growth from 2004 to 2015, largely driven by the high prices of its major export commodities. However, the drop in the global prices of many key commodities in recent years have severely impacted Uzbekistan's economy. Under these circumstances, the new government introduced major reforms. The pace of reform is unprecedented. The government has formulated its long-term economic strategy in its Vision 2030, which aims to double the country's gross domestic product by 2030 through a program of economic diversification. This book analyzes how Uzbekistan can boost sustainable economic growth to create more and better jobs. It considers how the country can consolidate achievements from recent policy reforms and maintain reform efforts to accelerate sustainable growth. Policy recommendations cover fostering macroeconomic stability, increasing investment in physical infrastructure, enhancing human capital, improving firms' access to finance, and lowering barriers to international trade and foreign investment inflows.

Mongolia's Economic Prospects Matthias Helble,Hal Hill,Declan Magee,2020-06-01 This publication examines

Mongolia's recent economic development and outlines reforms that would help the country take advantage of its many opportunities. Mongolia is rich in natural resources and, although landlocked, is well-placed to boost trade with its two giant neighbors. The country needs to diversify its economy beyond mining, enhance economic stability, and increase employment. To maximize Mongolia's potential the government can improve macroeconomic management, enhance the skill base, and provide hard and soft infrastructure to promote trade and efficient logistics. Governance and institutional reforms are also crucial. The government will need to continue to drive reforms so that they are well implemented and deliver the intended change.

Asian Development Outlook 2021 Update Asian Development Bank, 2021-09-01 Renewed COVID-19 outbreaks and uneven vaccination progress are prolonging the fight against the disease in developing Asia. This is contributing to a divergence in growth paths in the region that is partly being determined by the progress on tackling COVID-19. Asian Development Outlook 2021 Update raises regional growth forecasts for East Asia and Central Asia, and revises them down for South Asia, Southeast Asia, and the Pacific. The main risks to the region's economic prospects still center on the pandemic, particularly the emergence of new variants, lagging vaccine rollouts, and waning vaccine effectiveness. As economies recover from the pandemic, the threats of climate change will take center stage again. Sustainable food production and agricultural systems that are resilient to climate change will be crucial for developing Asia. To transform agriculture in the region, its economies must tackle challenges from changing consumer demand, changing demographics, and a changing and more fragile environment.

Pacific Economic Monitor – December 2022 Asian Development Bank, 2022-12-01 This issue explores how Pacific developing member countries can strengthen their post-pandemic social protection systems to help address long-standing development concerns and boost resilience to further shocks. It assesses individual countries' economies and outlines ways they could improve their social protection systems, despite depleted resources. Exploring megatrends facing the subregion, including population ageing and migration, it shows how investing in universal social protection policies can have a long-term impact on reducing poverty, vulnerability, and social exclusion.

Asian Development Outlook 2022 Asian Development Bank, 2022-04-01 Developing Asia faces greater uncertainty from the Russian invasion of Ukraine even as the region continues to contend with COVID-19 outbreaks. The war has sent shockwaves across financial and commodity markets. The highly transmissible Omicron variant has fueled a sharp rise in cases in the region, though its less severe health impact, coupled with increased immunity, has allowed economies to remain relatively open. As such, growth in the region is forecast to remain strong, supported by recovering domestic demand. The Russian invasion of Ukraine, aggressive monetary policy tightening in the US, and renewed COVID-19 outbreaks pose near-term risks to the outlook, alongside medium-term risks such as rising inequality due to school closures. Fiscal resources are needed to aid recovery and support sustainable development. But deficits and debt expanded substantially during the pandemic. Mobilizing taxes and optimizing tax incentives needs to be combined with improved spending efficiency to help developing Asia achieve its development objectives.

Repatriation, Exchange, and Colonial Legacies in the Gulf of Papua Lara Lamb, Christopher Lee, 2023-01-01 This book explores the people of the Kikori River Delta, in the Gulf of Papua, as established historical agents of intercultural exchange. One hundred years after they were made, Frank Hurley's colonial-era photographic reproductions are returned to the descendants of the Kerewo and Urama peoples, whom he photographed. The book illuminates how the movement, use, and exchange of objects can produce distinctive and unrecognised forms of value. To understand this exchange, a nuanced history of the conditions of the exchange is necessary, which also allows a reconsideration of the colonial legacies that continue to affect the social and political worlds of people in the twenty-first century.

Climate-Related Financial Disclosures 2021 Asian Development Bank, 2022-09-01 ADB became a Task Force for Climate-Related Financial Disclosures (TCFD) supporter in November 2021 and this report represents ADB's first climate-related financial disclosures under the TCFD framework. This publication provides an overview of ADB's progress in implementing recommendations in the four thematic areas identified by the TCFD framework: governance, strategy, risk management, and metrics and targets. It also presents proposed future actions to integrate climate-related risks and opportunities into the core of ADB's business strategy and decisions.

Practicable Artificial Photosynthesis - The Only Option Available Today for Humankind To Make Energy, Environment, Economy & Life Sustainable on Earth Ibram Ganesh, 2023-04-05 The "Practicable Artificial Photosynthesis (PAP)" technology described in this book facilitates one to harvest sunlight to meet all the energy needs of the society without any back-up from fossil fuels to meet all the energy needs of the society by using carbon dioxide and water as energy storing materials. The PAP process can completely eradicate the poverty and unemployment across the globe, and it can solve the problems of CO2 associated global warming and the related social cost of carbon problems completely. Four new technologies invented and discovered by the author of this book as a part of developing this comprehensive PAP process including a brand-new technology "Semiconductor and Liquid Assisted Photothermal Effect (SLAPE)" to generate electricity from sunlight with highest efficiency at lowest expenditure have also been presented and described in this book for the first time. Ultra-low cost EPDM rubber based membranes needed for alkaline electrolyzers and fuel cells also introduced in this book.

Capital Account Liberation Ying Yirong, Jeffrey Yi-Lin Forrest, 2015-05-13 Along with the development of economic globalization, many countries have begun to relax their controls on their capital accounts. However, the recent financial crises in Latin American countries as well as the exchange rate crises in Southeast Asian countries have shown that there is major risk associated with capital account liberalization. Diagnosis and Fault-Tolerant Control Mogens Blanke, Michel Kinnaert, Jan Lunze, Marcel Staroswiecki, 2006-09-24 This book presents model-based analysis and design methods for fault diagnosis and fault-tolerant control. Architectural and structural models are used to analyse the propagation of the fault through the process, test fault detectability and reveal redundancies that can be used to ensure fault tolerance. Case studies demonstrate

the methods presented. The second edition includes new material on reconfigurable control, diagnosis of nonlinear systems, and remote diagnosis, plus new examples and updated bibliography.
