Opera in Seventeenth-Century Venice Ellen Rosand,2007-10-09 In this elegantly constructed study of the early decades of public opera, the conflicts and cooperation of poets, composers, managers, designers, and singers—producing the art form that was soon to sweep the world and that has been dominant ever since—are revealed in their first freshness.—Andrew Porter This will be a standard work on the subject of the rise of Venetian opera for decades. Rosand has provided a decisive contribution to the reshaping of the entire subject. . . . She offers a profoundly new view of baroque opera based on a solid documentary and historical-critical foundation. The treatment of the artistic self-consciousness and professional activities of the librettists, impresarios, singers, and composers is exemplary, as is the examination of their reciprocal relations. This work will have a positive effect not only on studies of 17th-century, but on the history of opera in general.—Lorenzo Bianconi

The DCI Fleming Cases Books One to Three Robert McNeil,2022-11-11 Three crime thrillers in one volume: In England's Thames Valley, a police detective takes on murder, corruption, and department politics . . . These novels featuring DCI Fleming of the Major Crime Unit include: *The Fifth Suspect* A body is found on a boat on the River Thames—and newly promoted DCI Alex Fleming, a man with a troubled past, is keen to prove his worth with his first murder case. But a belligerent fellow DCI gives Fleming a hostile reception, and as internal politics come into play, Fleming finds himself up against both a difficult case and his own colleagues. *The Last Man* The assistant chief constable wants DCI Fleming to review the cold case of an activist shot dead five years ago after a strike at the Atomic Weapons Establishment. Fleming soon finds out that MI5 have an interest in the case, and learns that another activist was the main suspect. But as the body count rises and he uncovers an extramarital affair, he suspects the answers may lie in a very different place . . . *A Fatal Move* The normally tranquil village of Darmont is in an uproar over a plan for new housing and a shopping center—but the angry demonstrations are not the only thing disturbing the peace. The assistant to the millionaire property developer behind the controversy has been murdered—and the son of an investor has been kidnapped. Has a protester taken things too far—or is something more complex going on among the rich and powerful?

A Fatal Move Robert McNeil,2022-09-05 “I didn't guess whodunnit at all, so I was gripped from start to finish!” —Amazon Reviewer, five stars Money may make the world go round, but it turns a village upside down, in this tense British crime thriller by the author of *The Last Man*. The normally tranquil village of Darmont is in an uproar over a proposed building project—but the angry demonstrations by the locals are not the only thing disturbing the peace. The assistant to the millionaire property developer behind the controversy has been murdered and the son of a Saudi investor in the plan has been kidnapped. Has a protester taken things too far—or is something more sinister going on behind the scenes among the rich and powerful? As rumors and accusations of blackmail, bribery, and corruption fly, DCI Alex Fleming must dig up the truth in a pursuit that will lead him all the way to London . . .

Innovative Methods for Science Education Olivier Bruneau,Peter Heering,Grapí, Pere,Thomas de Vittori,2012-01-01 This collective book results of several meetings since 2006 between European historians of science and technology. Regularly, the six editors (and most of the authors present in this publication) organized symposia inside international conferences about the role of history of science and technology in science education and teacher training. The principal objectives of this book are: i) to enlighten and to discuss different research problems concerning HST (History of Science and Technology) and ICT (Information and Communication Technology), HST and IBST (Inquiry Based Science Teaching), HST and Science Education. In this way, it is dedicated to scholars, ii) to offer teachers and teacher trainers different ways to explore HST by using digital resources online, using a new teaching method and to become more familiar with the method in HST. As historians, the six editors develop research in the following fields: history of mathematics (O. Bruneau, M. R. Massa-Esteve and T. de Vittori), history of physics, chemistry and technology (P. Grapi, P. Heering, S. Laube). As teacher trainers at the university, they are also involved in research in science education about the role of HST to teach science at primary and secondary schools.

Doing Business 2019 World Bank,2018-11-30 Sixteenth in a series of annual reports comparing business regulation in 190 economies, *Doing Business 2019* measures aspects of regulation affecting areas of everyday business activity.

Doing Business 2018 World Bank,2017-11-14 Fifteen in a series of annual reports comparing business regulation in 190 economies, *Doing Business 2018* measures aspects of regulation affecting 10 areas of everyday business activity: • Starting a business • Dealing with construction permits • Getting electricity • Registering property • Getting credit • Protecting minority investors • Paying taxes • Trading across borders • Enforcing contracts • Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. *Doing Business* also measures features of labor market regulation, which is not included in these two measures. The report updates all indicators as of June 1, 2017, ranks economies on their overall “ease of doing business†?, and analyzes reforms to business regulation †? identifying which economies are strengthening their business environment the most. *Doing Business* illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the *Doing Business* indicators to shape reform agendas and monitor improvements on the ground. In addition, the *Doing Business* data has generated over 2,182 articles in peer-reviewed academic journals since its inception. Data Notes; Distance to Frontier and Ease of Doing Business Ranking; and Summaries of Doing Business Reforms in 2016/17 can be downloaded separately from the *Doing Business* website.

The DCI Fleming Cases Books One to Four Robert McNeil,2023-10-11 Four compelling police procedurals in one volume. In England's Thames Valley, a detective takes on murder, corruption, and department politics . . . This new collection includes the first four novels featuring DCI Fleming of the Major Crime Unit: *The Fifth Suspect* A body is found on a boat on the Thames—and newly promoted DCI Alex Fleming, a man with a troubled past, is keen to prove his worth with his first murder case. But when a belligerent colleague and internal politics come into play, Fleming is up against both a difficult case and his own coworkers. *The Last Man* The assistant chief constable wants DCI Fleming to review a cold case. Fleming soon learns that MI5 have an interest in the case, and that there is a clear suspect. But as the body count rises and he uncovers an extramarital affair, Fleming suspects the answers may lie elsewhere . . . *A Fatal Move* The village of Darmont is in an uproar—but the angry demonstrations are not the only thing disturbing the peace. The assistant to a millionaire property developer has been murdered, and an investor's son is kidnapped. Has a protester taken things too far—or is something more complex going on among the rich and powerful? *No Hiding Place* When Oliver Upton is shot dead, DCI Fleming and his team look for details about the man's life. All they know is that he showed up in Oxford and started working as a taxi driver. How do you investigate a murder when the victim seems to have no past?

Forged in the Shadow of Mars Peter W. Sposato,2022-03-15 In *Forged in the Shadow of Mars*, Peter W. Sposato traces chivalry's powerful influence on the mentalité and behavior of a sizeable segment of the elite in late medieval Florence. He finds that the strenuous knights and men-at-arms of the Florentine chivalric elite—a cultural community comprised of men from both traditional and newly emerged elite lineages—embraced a chivalric ideology that was fundamentally martial and violent. Chivalry helped to shape a common identity among these men based on the profession of arms and the ready use of violence against both their peers and those they perceived to be their social inferiors. This violence, often transgressive in nature, was not only crucial to asserting and defending personal, familial, and corporate honor, but was also inherently praiseworthy. In this way, Sposato highlights the sharp differences between chivalry and the more familiar civic ideology of the popolo grasso, the Florentine mercantile and banking elite

who came to dominate Florence politically and economically during the thirteenth and fourteenth centuries. As a result, in *Forged in the Shadow of Mars*, Sposato challenges the traditional scholarly view of chivalry as foreign to the social and cultural landscape of Florence and contests its reputation as a civilizing force. By reexamining the connection between chivalric literature and actual practice and identity formation among historical knights and men-at-arms, he likewise provides an important corrective to assumptions about the nature of elite violence and identity in medieval Italian cities.

Disruption of Habits During the Pandemic AA: VV:,2022-09-23T00:00:00+02:00 In the year 2020, what we used to think that our habits have been profoundly disrupted. Lockdown still represents an unprecedented experience for all of those who went through it since it radically affected our freedom of movement and social interaction, that used to make up our everyday lives. Some people believe that once the pandemic ends, nothing will be the same. Others think that once the virus becomes weaker or a vaccine is at our disposal and the fear is diminished, everything will go back to normal because the mechanism of habit is in many ways similar to the mechanisms of nature, reiterating the uniformity of its functioning. Who is right then? Both positions, perhaps. When philosophers addressed the issue of customs, namely collective habits, generally emphasized the caution required when it comes to changing them and if we look back on history... Could pandemics affect shared habits in specific territories as ultimately generated in reaction to other natural risks and/or to their threats?

Mobile Microservices Nanxi Chen,2022-04-15 In the 5G era, edge computing and new ecosystems of mobile microservices enable new business models, strategies, and competitive advantage. Focusing on microservices, this book introduces the essential concepts, technologies, and trade-offs in the edge computing architectural stack, providing for widespread adoption and dissemination. The book elucidates the concepts, architectures, well-defined building blocks, and prototypes for mobile microservice platforms and pervasive application development, as well as the implementation and configuration of service middleware and AI-based microservices. A goal-oriented service composition model is then proposed by the author, allowing for an economic assessment of connected, smart mobile services. Based on this model, costs can be minimized through statistical workload aggregation effects or backhaul data transport reduction, and customer experience and safety can be enhanced through reduced response times. This title will be a useful guide for students and IT professionals to get started with microservices and when studying the use of microservices in pervasive applications. It will also appeal to researchers and students studying software architecture and service-oriented computing, and especially those interested in edge computing, pervasive computing, the Internet of Things, and mobile microservices.

Infrastructural Ecologies Hillary Brown,Byron Stigge,2017-06-02 An integrated, holistic model for infrastructure planning and design in developing countries. Many emerging nations, particularly those least developed, lack basic critical infrastructural services—affordable energy, clean drinking water, dependable sanitation, and effective public transportation, along with reliable food systems. Many of these countries cannot afford the complex and resource-intensive systems based on Western, single-sector, industrialized models. In this book, Hillary Brown and Byron Stigge propose an alternate model for planning and designing infrastructural services in the emerging market context. This new model is holistic and integrated, resilient and sustainable, economical and equitable, creating an infrastructural ecology that is more analogous to the functioning of natural ecosystems. Brown and Stigge identify five strategic infrastructure objectives and illustrate each with examples of successful projects from across the developing world. Each chapter also highlights exemplary preindustrial systems, demonstrating the long history of resilient, sustainable infrastructure. The case studies describe the use of single solutions to solve multiple problems, creating hybridized and reciprocal systems; “soft path” models for water management, including water reuse and nutrient recovery; post carbon infrastructures for power, heat, and transportation such as rural microhydro and solar-powered rickshaws; climate adaptation systems, including a multi-purpose tunnel and a “floating city”; and the need for community-based, equitable, and culturally appropriate projects.
