As her relationship with Dr. Jack Stapleton begins to unravel, Dr. Laurie Montgomery starts investigating the inexplicable deaths of young, healthy people after successful routine surgery. She discovers that the deaths might be intentional—the work of a remarkably clever serial killer with a shocking motive. And then Laurie is hit with more devastating news: she might be carrying the genetic marker for breast cancer. As the need for answers becomes more urgent, Laurie is pulled into the nightmare as a potential victim herself. With time winding down, she and Jack must put aside the tensions between them in a race to connect the dots—and save Laurie’s life...

Jamaica's Blue Marker Juanita Havill,1995-09-25 Jamaica was friends with everyone in school - except for Russell. No wonder: Russell was a mean brat. When they had art class, Russell borrowed her markers and spoiled her picture. At recess, he threw sand and chased little kids. Jamaica certainly wasn't sorry to learn that Russell was going to move away. She didn't even want to make a card for him, the way the others in her class were doing. But then something happened to change her mind . . .

Permanent Marker Aimee Ross,2018-03-13 Aimee Ross was living a perfectly normal life raising three kids, married to her high school sweetheart, and teaching at her high school alma mater. Life was perfect--right until it wasn't. Unhappy in her marriage, Aimee asked for a divorce. Three days later, she suffered a heart attack at age forty-one. Five months after that, she survived a near-fatal car crash caused by an intoxicated driver. Her physical recovery took months and left her body marked by scars. The emotional recovery, though, would take longer, as Aimee sought to forgive the man who almost killed her--and to forgive herself for tearing apart her family. Aimee Ross writes with candor, wit, and humor as she finds the power in her story and chronicles her transformation into the woman she was always meant to be. Permanent Marker takes readers on a journey of healing, proving that from darkness can come new light, new love, and a renewed purpose for life.

Markers Sidney Zion,1990 Real-life individuals appear in the story of Jesse Frank and Mike O'Rourke--one a prodigal son and criminal lawyer, the other a brilliant journalist--who find their heretofore close relationship tested by the demands of the powerful societies they inhabit.

Molecular Marker Techniques Nitish Kumar,2023-06-29 This edited book covers the applications of molecular markers in the genetic improvement of crop plants. Recent advances in molecular marker techniques such as the development of high-throughput genotyping platforms, marker-assisted selection, and non-coding RNA-based markers have been discussed. Essential information is provided on functional markers, genotype-by-sequencing, and association mapping methodologies that can facilitate accelerated crop breeding programs for increased yield, high nutritional quality, and tolerance to a variety of abiotic and biotic stresses. This volume presents basic information on molecular marker techniques from marker location up to gene cloning. The book includes a description of technical approaches in genome analysis such as comparison of marker systems, positional cloning, and array techniques. This book is of interest to teachers, researchers, and plant breeders. The book also serves as additional reading material for undergraduate and graduate students of agriculture, horticulture, and forestry.

Molecular Marker Systems in Plant Breeding and Crop Improvement Horst Lörz,Gerhard Wenzel,2005 Successful release of new and better crop varieties increasingly requires genomics and molecular biology. This volume presents basic information on plant molecular marker techniques from marker location up to gene cloning. The text includes a description of technical approaches in genome analysis such as comparison of marker systems, positional cloning, and array techniques in 19 crop plants. A special section focuses on converting this knowledge into general and specific breeding strategies, particularly in relation to biotic stress. Theory and practice of marker assisted selection for QTL, gene pyramiding and the future of MAS are summarized and discussed for maize, wheat, and soybean. Furthermore, approaches in silviculture on the examples of Fagus, Populus, Eucalyptus, Picea and Abies are presented. The volume ends with a comprehensive review of the patents relevant for using molecular markers and marker assisted selection.

Marker Rendering for Fashion, Accessories, and Home Fashion Bina Abling,2014-12-24 With the growing trend of licensing apparel, accessories, and home fashions under a single logo, today's students must expand their portfolios to include concepts with broader applications. Marker Rendering for Fashion, Accessories, and Home Fashions provides detailed instructions for marker rendering methods relevant to a variety of products. Allowing designers to express their ideas immediately, the marker is an essential tool for the design professional. The author's step-by-step instructions provide a sound introduction to the skills that students need, and teaches methods of overlapping media applications for an assortment

of colors, patterns, and materials. The lessons are taught as a progression of skills, building slowly from basic to complex rendering methods used in the design industry today.

Genetic Diversity Assessment and Marker-Assisted Selection in Crops Francesco Mercati,Francesco Sunseri,2021-05-31 The exploitation of biodiversity is essential to select resilient genotypes for sustainable cropping systems as one of the main challenges for plant breeding. Mapping traits of agronomic interest in specific genomic regions appears as another pivotal effort for the future development of novel cultivars. For this purpose, there is evidence that MAGIC and other exotic populations will play a major role in the coming years in allowing for impressive gains in plant breeding for developing new generations of improved cultivars. This Special Issue focused on the application of advanced technologies devoted to crop improvement and exploit the available biodiversity in crops. In detail, next-generation sequencing (NGS) technologies supported the development of high-density genotyping arrays for different plants included in this issue.

Comanche Marker Trees of Texas Steve Houser,Linda Pelon,Jimmy W. Arterberry,2016-09-23 In this unprecedented effort to gather and share knowledge of the Native American practice of creating, designating, and making use of marker trees, an arborist, an anthropologist, and a Comanche tribal officer have merged their wisdom, research, and years of personal experience to create Comanche Marker Trees of Texas. A genuine marker tree is a rare find—only six of these natural and cultural treasures have been officially documented in Texas and recognized by the Comanche Nation. The latter third of the book highlights the characteristics of these six marker trees and gives an up-to-date history of each, displaying beautiful photographs of these long-standing, misshapen, controversial symbols that have withstood the tests of time and human activity. Thoroughly researched and richly illustrated with maps, drawings, and photographs of trees, this book offers a close look at the unique cultural significance of these living witnesses to our history and provides detailed guidelines on how to recognize, research, and report potential marker tree candidates.

Chris Marker Catherine Lupton,2004-02-05 Chris Marker is one of the most extraordinary and influential filmmakers of our time. In landmark films such as Letter from Siberia, La Jetée, Sans Soleil, and Level Five, he has overturned cinematic conventions by confounding the distinction between documentary and fiction, writing and visual recording, and the still and moving image. Yet these works are only the tip of the iceberg; Marker's career has also encompassed writing, photography, television, and digital multimedia. Chris Marker is the first systematic examination of Marker's complete oeuvre. Here, Catherine Lupton traces the development and transformation of the artist's work from the late 1940s, when he began to work as a poet, novelist, and critic for the French journal Esprit, through the 1990s and the release of his most recent works, including Level Five and the CD-ROM Immemory. Lupton explicates Marker's work as a circular trajectory, with each project recycling and referring back to earlier works as well as to a host of adopted texts, always proceeding by oblique association and lateral digression. This trajectory, which Lupton outlines with great care and precision, is critical to understanding Marker's abiding obsession: the forms and operations of human memory. With this theme as her architecture, Lupton presents the most comprehensive and incisive analysis of Marker to date. Incorporating historical events and cultural contexts that have informed each phase of Marker's career, Lupton gives readers access to an artist who stands outside of the mainstream and thus defies easy explanation. There is no better guide than Lupton's to this modern master's prolific and multidimensional career.
