Einsatz und Manipulation von Online-Bewertungen Elmar Fladerer,2018-07-19 Diese -mit sehr gut benotete - Masterarbeit beantwortet die Frage: „Welche Faktoren machen Online-Bewertungen vertrauenswürdig?“ Dazu werden über 100 deutschsprachige Onlineportale mit Bewertungsfunktionen aufgezeigt und eine Kategorisierung der im deutschsprachigen Raum bekannten Bewertungsportale nach Recht, Thematik, Erreichbarkeit und nach charakteristischen Merkmalen versucht. Anhand von Fallbeispiele werden die Geschäftsfelder und mögliche Abhängigkeiten der Bewertungs-Portale aufgezeigt. Am Beispiel Amazon werden unterschiedliche Maßnahmen aufgezeigt, die Amazon selbst einsetzt um Manipulationen von Rezensionen zu verhindern. Die einzelnen Analyseverfahren des kostenfreien Webtools »ReviewMeta«, welches eine detaillierte Überprüfung von Amazon-Rezensionen ermöglicht, werden aufgezeigt. Dies führt einerseits zu Hinweisen auf Methoden wie Online-Bewertungen manipuliert werden, andererseits auch wie diese erkannt werden können. Neben der Beantwortung weiterer Fragestellungen wird ein Leitfaden abgebildet, der das Rechercheverhalten zur Qualitätsbeurteilung von Online-Produkten, optimieren kann.

Die Verarbeitung von Körpersubstanzen zu autologen Gewebeprodukten nach § 950 BGB Michael Jordan,2018-06-19 Menschliche Luftröhren oder Herzklappen aus dem Labor sind nicht mehr bloße Zukunftsmusik. Forschergruppen ist es bereits gelungen, diese komplexen Gewebe im Rahmen des sogenannten Tissue Engineering aus menschlichen Körperzellen herzustellen und Menschen erfolgreich zu implantieren. Allgemein wird die Herstellung aus patienteneigenen Zellen angestrebt, da es nach der Implantation des Gewebes zu keiner Abstoßungsreaktion des Körpers kommt. Die Herstellung von menschlichen Geweben kann zu einem gesetzlichen Eigentumserwerb des Herstellers nach § 950 BGB führen. Bei der Verwendung von patienteneigenen Zellen kommt es jedoch zu einem Konflikt zwischen dem entstandenen Eigentum des Herstellers und dem Persönlichkeitsrecht des Patienten. Die Arbeit untersucht zunächst, wann die Voraussetzungen eines solchen Eigentumserwerbs erfüllt sind. Anschließend wird erörtert, wie sich das Eigentum zum allgemeinen Persönlichkeitsrecht verhält und welche Ansprüche zwischen den Beteiligten bestehen.

The Block Theory of Finite Group Algebras Markus Linckelmann,2018-05-24 A comprehensive treatment of block theory, emphasising cornerstones of the area which have not appeared in any book before.

The Block Theory of Finite Group Algebras: Markus Linckelmann,2018-05-24 This is a comprehensive introduction to the modular representation theory of finite groups, with an emphasis on block theory. The two volumes take into account classical results and concepts as well as some of the modern developments in the area. Volume 1 introduces the broader context, starting with general properties of finite group algebras over commutative rings, moving on to some basics in character theory and the structure theory of algebras over complete discrete valuation rings. In Volume 2, blocks of finite group algebras over complete p-local rings take centre stage, and many key results which have not appeared in a book before are treated in detail. In order to illustrate the wide range of techniques in block theory, the book concludes with chapters classifying the source algebras of blocks with cyclic and Klein four defect groups, and relating these classifications to the open conjectures that drive block theory.

The Syntax of Argument Structure Artemis Alexiadou,Elisabeth Sophia Maria Verhoeven,2021-11-08 Bridging theoretical modelling and advanced empirical techniques is a central aim of current linguistic research. The progress in empirical methods contributes to the precise estimation of the properties of linguistic data and promises new ways for justifying theoretical models and testing their implications. The contributions to the present collective volume take up this challenge and focus on the relevance of empirical results achieved through up-to-date methodology for the theoretical analysis and modelling of argument structure. They tackle issues of argument structure from different perspectives addressing questions related to diverse verb types (unaccusatives, unergatives, (di)transitives, psych verbs), morpho-syntactic operations (prefixation, simple vs. particle verbs), case distinctions (dative vs. accusative, case vs. prepositions), argument and voice alternations (dative vs. benefactive alternation, active vs. passive), word order alternations and the impact of animacy, agentivity, and eventivity on argument structure. The volume will be of interest to theoretical linguists, psycholinguists, and corpus linguists interested in the syntax of argument structure and its modelling using precise empirical methods.

The Red Mirror Gulnaz Sharafutdinova,2020-10-01 What explains Putin's enduring popularity in Russia? In The Red Mirror, Gulnaz Sharafutdinova uses social identity theory to explain Putin's leadership. The main source of Putin's political influence, she finds, lies in how he articulates the shared collective perspective that unites many Russian citizens. Under his tenure, the Kremlin's media machine has tapped into powerful group emotions of shame and humiliation--derived from the Soviet transition in the 1990s--and has politicized national identity to transform these emotions into pride and patriotism. Culminating with the annexation of Crimea in 2014, this strategy of national identity politics is still the essence of Putin's leadership in Russia. But victimhood-based consolidation is also leading the country down the path of political confrontation and economic stagnation. To enable a cultural, social, and political revival in Russia, Sharafutdinova argues, political elites must instead focus on more constructively conceived ideas about the country's future. Integrating methods from history, political science, and social psychology, The Red Mirror offers the clearest picture yet of how the nation's majoritarian identity politics are playing out.

Trends in Nonlinear Analysis Markus Kirkilionis,Susanne Krömker,Rolf Rannacher,Friedrich Tomi,2013-04-17 Applied

mathematics is a central connecting link between scientific observations and their theoretical interpretation. Nonlinear analysis has surely contributed major developments which nowadays shape the face of applied mathematics. At the beginning of the millennium, all sciences are expanding at increased speed. Technological, ecological, economical and medical problem solving is a central issue of every modern society. Mathematical models help to expose fundamental structures hidden in these problems and serve as unifying tools to deepen our understanding. What are the new challenges applied mathematics has to face with the increased diversity of scientific problems? In which direction should the classical tools of nonlinear analysis be developed further? How do new available technologies influence the development of the field? How can problems be solved which have been beyond reach in former times? It is the aim of this book to explore new developments in the field by way of discussion of selected topics from nonlinear analysis.

Compact Projective Planes Helmut Salzmann,Dieter Betten,Theo Grundhöfer,Hermann Hähl,Rainer Löwen,Markus Stroppel,2011-06-24 The aim of the series is to present new and important developments in pure and applied mathematics. Well established in the community over two decades, it offers a large library of mathematics including several important classics. The volumes supply thorough and detailed expositions of the methods and ideas essential to the topics in question. In addition, they convey their relationships to other parts of mathematics. The series is addressed to advanced readers wishing to thoroughly study the topic. Editorial Board Lev Birbrair, Universidade Federal do Ceará, Fortaleza, Brasil Walter D. A Companion to Qualitative Research Uwe Flick,Ernst von Kardoff,Ines Steinke,2004-05-25 A Companion to Qualitative Research draws on the work of an array of leading scholars from Europe, Britain and North America to present a summary of every aspect of the qualitative research process from nuts-and-bolts methods and research styles, to examinations of methodological theory and epistemology. It is one of the few surveys of qualitative research to adopt a genuinely international voice.

Algebraic Biology Katsuhisa Horimoto,Georg Regensburger,Markus Rosenkranz,Hiroshi Yoshida,2008-07-30 This volume contains the proceedings of the Third International Conference on Algebraic Biology (AB 2008). Jointly organized by the National Institute of Advanced Industrial Science and Technology (AIST), Tokyo, and the Research Institute for Symbolic Computation (RISC), Hagenberg, Austria, it was held from July 31 to August 2, 2008 in the Castle of Hagenberg. Algebraic biology is an interdisciplinary forum for research on all aspects of applying symbolic computation in biology. The ?rst conference on algebraic biology (AB 2005) was held November 28-30, 2005 in Tokyo, the second during July 2-4, 2007 in Hagenberg. The AB conference series is intended as a bridge between life sciences and symbolic computation: On the one hand, new insights inbiologyarefoundbypowerfulsymbolicmethods;ontheotherhand,biological problems suggestnew algebraicstructures andalgorithms.While this pro?le has been established in the previous proceedings, the papers in the present volume demonstrate the continuous growth of algebraic biology. We received 27 submissions from 14 countries (Australia, Austria, Canada, China, Colombia, France, Germany, Italy, Japan, Norway, Russia, Switzerland, UK, USA), and 14 papers were accepted for publication. Each submission was assigned to at least three ProgramCommittee members, who carefully reviewed the papers, in many cases with the help of external referees. The reviews were discussedby the ProgramCommittee for oneweekvia the EasyChairconference management system.

Rice,2009-09-08 The Advances in Chemical Physics series provides the chemical physics and physical chemistry fields with a forum for critical, authoritative evaluations of advances in every area of the discipline. Filled with cutting-edge research reported in a cohesive manner not found elsewhere in the literature, each volume of the Advances in Chemical Physics series serves as the perfect supplement to any advanced graduate class devoted to the study of chemical physics.

Computer Algebra in Scientific Computing Vladimir P. Gerdt,Wolfram Koepf,Ernst W. Mayr,Evgenii V. Vorozhtsov,2013-08-15 This book constitutes the proceedings of the 14th International Workshop on Computer Algebra in Scientific Computing, CASC 2013, held in Berlin, Germany, in September 2013. The 33 full papers presented were carefully reviewed and selected for inclusion in this book. The papers address issues such as polynomial algebra; the solution of tropical linear systems and tropical polynomial systems; the theory of matrices; the use of computer algebra for the investigation of various mathematical and applied topics related to ordinary differential equations (ODEs); applications of symbolic computations for solving partial differential equations (PDEs) in mathematical physics; problems arising at the application of computer algebra methods for finding infinitesimal symmetries; applications of symbolic and symbolic-numeric algorithms in mechanics and physics; automatic differentiation; the application of the CAS Mathematica for the simulation of quantum error correction in quantum computing; the application of the CAS GAP for the enumeration of Schur rings over the group A5; constructive computation of zero separation bounds for arithmetic expressions; the parallel implementation of fast Fourier transforms with the aid of the Spiral library generation system; the use of object-oriented languages such as Java or Scala for implementation of categories as type classes; a survey of industrial applications of approximate computer algebra.
