**Innovation and Growth** Martin Andersson, Börje Johansson, Charlie Karlsson, Hans Lööf, 2012-09-20 Provides an overview and assessment of established research on firms' strategic choices of R&D efforts and their firm-level returns, and explains the consequences for economy-wide technological change and growth.

**Diverse Development Paths and Structural Transformation in the Escape from Poverty** Martin Andersson, Tobias Axelsson, 2016 This text discusses possibilities for, and obstacles to, economic development in lower income countries in Asia, Latin America, and Sub-Saharan Africa. It examines how lower income countries might 'catch up' and advantages and disadvantages of the lateness of poor countries in the development process.

*Development and Structural Change in Asia-Pacific* Martin Andersson, Christer Gunnarsson, 2003-09-02 The authors consider how the Asia-Pacific economies have developed since the financial crises and highlight two inter-related themes: the effect of global forces on the national Asian economies and the different development paths of these economies as they jointly enter this new phase. Questions raised by the book include: \* is globalization a threat to development and prosperity in the Asia-Pacific or did globalization rather facilitate and accelerate the pace of industrialization among late industrializers in the region? \* is there a single Asia-Pacific development model or did the crisis show this to be false? \* did the financial crisis reveal structural weaknesses in an Asia-Pacific state-led model or was state leadership already in demise? *Development and Structural Change in Asia-Pacific* provides a useful and relevant account of how the global economy has led to structural changes within Asian economies

**Geographies of Growth** Charlie Karlsson, Martin Andersson, Lina Bjerke, 2017-06-30 Today we can observe an increasing spatial divide as some large urban regions and many more medium-sized and small regions face growing problems such as decreasing labour demand, increasing unemployment and an ageing population. In view of these trends, this book offers a better understanding of the general characteristics and specific drivers of the geographies of growth. It shows how these may vary in different spatial contexts, how hurdles and barriers to growth in different types of regions can be dealt with, how and to what extent resources in different areas can develop, and how the potential of these resources to stimulate growth can be realized.

**Handbook of Research Methods and Applications in Economic Geography** Charlie Karlsson, Martin Andersson, Therese Norman, 2015-02-27 The main purpose of this Handbook is to provide overviews and assessments of the state-of-the-art regarding research methods, approaches and applications central to economic geography. The chapters are written by distinguished researchers from a variety

*Handbook of Innovation and Regulation* Pontus Braunerhjelm, Martin Andersson, Knut Blind, Johan E. Eklund, 2023-12-11 This comprehensive Handbook presents thoughtful analysis on how regulations can impact innovation within a number of regulatory fields and markets, and provides a greater understanding of regulatory complexity and the challenging task it presents for future research.

*Congress on Research, Development and Innovation in Renewable Energies* Mayken Espinoza-Andaluz, Martin Andersson, Tingshuai Li, Jordy Santana Villamar, Ángel Encalada Dávila, Ester Melo Vargas, 2022-06-02 The 2021 Congress on Research, Development and Innovation in Renewable Energies (CIDiER 2021) aims to promote international collaboration that fosters ideas and dialogue on developing a solution to climate change through research and development that leads to clean energy innovation via renewable energies. These selected papers cover both theoretical and applied research that will strengthen the implementation of renewable energy projects between universities, research centers, and private companies.

*The Ghost in the Corner and Other Stories* Lord Dunsany, 2017-05 The Anglo-Irish fantasist Lord Dunsany (1878-1957) was immensely prolific. Author of more than a dozen novels, hundreds of stories, essays, and poems, and more than fifty plays, he infused every single work with his unique

blend of fantasy, weirdness, and subtle humor. S. T. Joshi and Martin Andersson, two of the leading authorities on Dunsany's work, have spent years in unearthing uncollected works by Dunsany, and the present volume is the result of their labors. Here we find stories set in Dunsany's native Ireland, evoking the real or imagined ghosts, leprechauns, and spirits that haunt that ancient land. Other tales are set in locales around the world, reflecting Dunsany's far-flung travels through the Middle East and Asia. The core of the book is a presentation of an untitled short story collection that Dunsany assembled in 1956 but that was never published. Here we find some of the lost jewels of Dunsany's output: The Dwarf HoIobolos and the Sword Hogbiter, a splendid sword-and-sorcery tale that evokes such early masterpieces as The Sword of Welleran; The Dance at Weirdmoor Castle, a delicate tale of ghosts; The Stolen Power, in which the horrors of the atomic age are pungently expressed; and A Goat in Trousers, a story of metempsychosis treading the borderline of humor and horror. Also included in this volume are several previously unpublished tales, found among the manuscripts at Dunsany Castle in County Meath, Ireland. No reader can fully appreciate the prodigal fertility of Lord Dunsany's imagination without appreciating the diverse and unfailingly entertaining stories in this volume.

The Biml Book Andy Leonard, Scott Currie, Jacob Alley, Martin Andersson, Peter Avenant, Bill Fellows, Simon Peck, Reeves Smith, Raymond Sondak, Benjamin Weissman, Cathrine Wilhelmsen, 2017-10-30 Learn Business Intelligence Markup Language (Biml) for automating much of the repetitive, manual labor involved in data integration. We teach you how to build frameworks and use advanced Biml features to get more out of SQL Server Integration Services (SSIS), Transact-SQL (T-SQL), and SQL Server Analysis Services (SSAS) than you ever thought possible. The first part of the book starts with the basics—getting your development environment configured, Biml syntax, and scripting essentials. Whether a beginner or a seasoned Biml expert, the next part of the book guides you through the process of using Biml to build a framework that captures both your design patterns and execution management. Design patterns are reusable code blocks that standardize the approach you use to perform certain types of data integration, logging, and other key data functions. Design patterns solve common problems encountered when developing data integration solutions. Because you do not have to build the code from scratch each time, design patterns improve your efficiency as a Biml developer. In addition to leveraging design patterns in your framework, you will learn how to build a robust metadata store and how to package your framework into Biml bundles for deployment within your enterprise. In the last part of the book, we teach you more advanced Biml features and capabilities, such as SSAS development, T-SQL recipes, documentation autogeneration, and Biml troubleshooting. The Biml Book: Provides practical and applicable examples Teaches you how to use Biml to reduce development time while improving quality Takes you through solutions to common data integration and BI challenges What You'll Learn Master the basics of Business Intelligence Markup Language (Biml) Study patterns for automating SSIS package generation Build a Biml Framework Import and transform database schemas Automate generation of scripts and projects Who This Book Is For BI developers wishing to quickly locate previously tested solutions, Microsoft BI specialists, those seeking more information about solution automation and code generation, and practitioners of Data Integration Lifecycle Management (DILM) in the DevOps enterprise

*Diverse Development Paths and Structural Transformation in the Escape from Poverty* Martin Andersson, Tobias Axelsson, 2016-04-21 This volume analyzes the experiences of developing countries in Asia, Latin America, and Sub-Saharan Africa, and examines how they might catch up. Based on growth performance across the developing world over the last five decades, it offers a thorough account of the possibilities to engage in such processes in an increasingly globalized world. Together, the chapters highlight the diversity and variation of development pathways and provide valuable lessons and implications for how to approach this difficult question. The book shows the importance of acknowledging that the process of development is dynamic and that the possibilities for catch up are situation dependent. At the same time it makes clear that without structural change, and in particular agricultural transformation, sustained catch up is unlikely to happen. The volume demonstrates how analysis of current growth

processes in developing countries can be enriched by paying closer attention to the multifaceted nature of both economic backwardness and successful pathways to escape it.

**Software Development and Innovation - Exploring the Software Shift in Innovation in Swedish Firms** Martin Andersson,Anna Kusetogullari,Joakim Wernberg,2020 Several scholars as well as industry professionals have claimed that there is a software-biased shift in the nature and direction of innovation in that software development is a core part of innovation activities in firms across a wide array of industries. Empirical firm-level evidence of such a shift is still scant. We employ new and unique firm-level survey data on the frequency and nature of software development among firms in Sweden, matched with the Community Innovation Survey (CIS). We find robust evidence supporting a software-bias in innovation in that software development is associated with a higher likelihood of introducing innovations as well as higher innovation sales among firms in both manufacturing and services industries. Furthermore, this positive relationship is stronger for firms employing in-house software developers than for those that only use external developers, suggesting that there is a hierarchy but possibly also a complementarity between internal and external software development. We also find support for complementarity between software-based technology and human capital; the estimated marginal effect of software development on innovation is particularly strong for firms that combine in-house software development with a highly educated workforce in STEM as well as in other disciplines.

**Knowledge and Networks in a Dynamic Economy** Martin J. Beckmann,Borje Johansson,Folke Snickars,Roland Thord,2012-12-06 Ake E.Andersson has always been intellectually on the move. He has selected his own track through the academic system and has formed a school of thought which has brought him international recognition. The cornerstones of his scientific interest are welfare analysis, regional economic dynamics and human capital theory. For his excellent achievements on dynamic analysis in the field of regional economics and regional planning he received the Japanese Honda Prize in 1995. This book provides a sample of the broad ranging research of Ake E.Andersson. Here some of his friends and colleagues have contributed to give various examples from the growing research field Knowledge and Networks in a Dynamic Economy in which he has been a great inspiration and in which he has contributed as part of his prodigious output.

**Pioneering Entrepreneurship Research** Pontus Braunerhjelm,Martin Andersson,Johan Eklund,2022-03-02 Pioneering Entrepreneurship Research lists the seminal and pioneering research efforts conducted by a limited group of scholars from different disciplines that challenged traditional thought on small business and entrepreneurship - these pioneers and their specific contributions transformed our thinking about entrepreneurs. This monograph also discusses the drivers that motivated their entrepreneurial endeavors, their influence at the firm/micro-level and their role in fostering economic development and growth. It explores how their breakthrough contributions increasingly gained acceptance in several disciplines, thereby toppling previous views with profound implications for theory, empirics, methodology and policy. Research on entrepreneurship has witnessed a

tremendous renaissance and continues to rapidly evolve. This monograph identifies scholars who have played a particularly important role in pushing the research frontier through their seminal work in the entrepreneurship field. Following an introduction, the authors discuss the definition of entrepreneurship and the academic domain of entrepreneurship research. Next is a chronological account of the early pioneers and the origin of entrepreneurship research. The monograph provides a more detailed description of contemporary pioneers, defined as those that contributed to shaping and defining the research field in the latter decades. It then groups pioneers into specific research categories aiming to give a comprehensive picture of how the advances made has served to deepen our understanding of how the economy works. This is followed by a discussion of avenues for future entrepreneurship research and a conclusion with references.

**Characterising Needs in Health Care Priority Setting** Erik Gustavsson, 2018-01-10 The focus of this thesis is needs in the context of health care priority setting. The notion of needs has a strong standing in health care policy; however, how the idea should be understood more specifically and how it should guide decisions about priority setting remain contentious issues. The aim of this thesis is to explore how needs should be characterised in health care priority setting. This matter is approached by, first, exploring and developing the conceptual structure of health care needs, and second, discussing and suggesting solutions to normative questions that arise when needs are characterised as a distributive principle. In the first article, the conceptual structure of needs in general and health care needs in particular is explored, and it is argued that a specific characterisation of health care needs is required. In the second article, the notion of health care needs is explored in relation to preferences for health care within the context of shared decision-making. The paper further discusses a number of queries that arise in the intersection between what the patient needs and what the patient wants. The third article discusses how a principle of need should handle questions about interpersonal aggregation. The paper characterises a principle of need which strikes a reasonable balance between giving priority to the worst off and the distribution of benefits with regard to interpersonal aggregation. The fourth article discusses how a principle of need should account for the fact that patients often are badly off due to several conditions rather than one single condition. It is argued that how badly off patients are should be understood as a function of how badly off these patients are when all of their conditions (for which they need health care) are considered. The frame story provides the terminological, theoretical, contextual, and methodological background for the discussion undertaken in this thesis. The conclusions of the articles are brought together and the discussion extended in the concluding discussion by sketching a number of conditions of adequacy for the concept and principle of need relevant for health care priority setting. Den här avhandlingen fokuserar på behov och behovsprinciper inom hälso- och sjukvården. Behov har länge haft en stark ställning inom hälso- och sjukvården men det är omdiskuterat hur begreppet ska förstås mer specifikt och framförallt hur det ska vara vägledande för prioriteringar inom hälso- och sjukvården. Syftet med den här avhandlingen är att karakterisera behov för sådana prioriteringar. Avhandlingen tar sig an detta syfte utifrån två ansatser. För det första, genom att undersöka och utveckla den begreppsliga strukturen hos vårdbehov och, för det andra, genom att diskutera samt ge förslag på lösningar på ett antal normativa frågor som uppstår när vårdbehov skall karakteriseras som en fördelningsprincip. I den första artikeln undersöks begreppen behov och vårdbehov utifrån den allmänfilosofiska diskussionen om behov. I artikeln karakteriseras begreppet vårdbehov på ett sätt som gör det lämpligt för prioriteringar inom hälsooch sjukvården. I den andra artikeln utforskas begreppet vårdbehov i relation till önskemål om vård inom ramen för delat beslutsfattande. I artikeln diskuteras också ett antal frågeställningar som aktualiseras i relation till den spänning som kan uppstå mellan patientens behov å ena sidan och patientens önskemål å andra sidan. I den tredje artikeln behandlas frågan om hur en behovsprincip bör hantera frågor som rör sammanvägning av olika personers behov. I artikeln karakteriseras och försvaras en behovsprincip som balanserar prioritet till de sämst ställda och hur hälsovinster bör fördelas. I den fjärde artikeln förs en diskussion om hur en behovsprincip bör göra reda för det faktum att patienter ofta lider av samsjuklighet snarare än av ett enskilt tillstånd. I artikeln drivs tesen att

hur dåligt ställt en patient har det bör förstås som en funktion av hur dåligt ställt patienten har det när alla patientens tillstånd (för vilka patienten behöver vård) har tagits i beaktande, snarare än hur dåligt ställt patienten har det med avseende på det specifika tillstånd för vilket patienten skall behandlas. I kappan ges den terminologiska, kontextuella, teoretiska och metodologiska bakgrunden för diskussionen i avhandlingen. I en avslutande diskussion förs slutsatserna från artiklarna samman och diskussionen utvidgas genom att skissera ett antal adekvansvillkor för begreppet vårdbehov och behovsprinciper i vården.

**exports and productivity-comparable evidence for 14 countries** Leonhard Pertl, Žrt Kostevc, Sašo Polanec, Jože Pavli, Damijan, Leonhard Pertl, Jože Pavli, Damijan, Žrt Kostevc, Sašo Polanec, 2007 Abstract: The authors use comparable micro level panel data for 14 countries and a set of identically specified empirical models to investigate the relationship between exports and productivity. The overall results are in line with the big picture that is by now familiar from the literature: Exporters are more productive than non-exporters when observed and unobserved heterogeneity are controlled for, and these exporter productivity premia tend to increase with the share of exports in total sales; there is strong evidence in favour of self-selection of more productive firms into export markets, but nearly no evidence in favour of the learning-by-exporting hypothesis. The authors document that the exporter premia differ considerably across countries in identically specified empirical models. In a meta-analysis of their results the authors find that countries that are more open and have more effective government report higher productivity premia. However, the level of development per se does not appear to be an explanation for the observed cross-country differences.
