*How They Started* David Lester,2007-06-01 Lots of us have ideas we think would make great businesses. Most of us never do anything with those ideas.

But for those that do, a world of opportunity awaits them. This book is about 30 people who acted on their idea, made the first steps to start their business and subsequently went on to turn it into a global brand. From Innocent to Cobra to Dreams to Dysone, we reveal how some of the UK's biggest businesses got off the ground, and those very first steps taken by their founders.

Grand Thieves & Tomb Raiders Rebecca Levene, Magnus Anderson, 2012-11-08  
Gaming: it's the greatest British invasion of them all. Lara Croft is an international icon and the British-born Grand Theft Auto and its spin-offs have sold more than 100 million copies worldwide. The UK's games industry is now bigger than either its cinema or its music. Yet the medium's birth in Thatcher's Britain was almost accidental. While politicians championed computers like the BBC Micro and the ZX Spectrum as engines of learning, it was left to a grassroots culture of amateur programmers to unlock their true potential. And from bedrooms and classrooms across the country, a brilliant profusion of innovative and idiosyncratic games soon emerged – propelling their young creators to fame, riches and, eventually, a place on the world stage. This is the story of those teenage coders – tracing their journey from the first home computers to the age of the smartphone. A mix of oddball characters, programming miracles and moral panics, Grand Thieves & Tomb Raiders reveals how the unique history of British computing led to some of the greatest games of all time.

**The Information Superhighway and Private Households** Walter Brenner, Lutz

Kolbe, 2012-12-06 Wolfgang Glatthaar International Business Machines (IBM), Gennany The rapid developments in information technology (IT) will continue through the coming years. New application areas will be added. Whereas the use of information technology in the past decade has been concentrated primarily on business and public administration, in future the suppliers of information technology will develop an increasing number of applications for the private household (see fig. 1). Traditional perspective: New perspective: 'IT-solutions for the IT-solutions for the company' private household ~ . . . .  
 . . . \ . . . . . \ . . . . . \ . . . . .  
 . . . \ . . . . . \ . . . . . \ \ \ \ \ Fig. 1.

New perspective on information technology This development has already generated considerable market dynamics. Latest forecasts for the USA suggest that by 1996 at the latest the private household will present greater sales potential for home computers than business and public administration. VI

Preface Up to now the use of information technology in the private household has not been regarded as highly significant by either business or science, even though PCs have become widespread in the private sphere. In the ESPRIT framework there have been individual projects dealing with home networks, and in a number of Asian and European countries, as well as America, experiments with interactive television are taking place. Internet and commercial online services are experiencing rapid growth. This application area for information technology in the private household, which is generating increasing business attention, must also be the subject of appropriate research activities.

**Wired TV** Denise Mann, 2014-02-11 This collection looks at the post-network television industry's heady experiments with new forms of interactive storytelling—or wired TV—that took place from 2005 to 2010 as the networks responded to the introduction of broadband into the majority of homes and the proliferation of popular, participatory Web 2.0 companies like Facebook, YouTube, and Twitter. Contributors address a wide range of issues, from the networks' sporadic efforts to engage fans using transmedia storytelling to the production inefficiencies that continue to dog network television to the impact of multimedia convergence and multinational, corporate conglomeration on entrepreneurial creativity. With essays from such top scholars as Henry Jenkins, John T. Caldwell, and Jonathan Gray and from new and exciting voices emerging in this field, *Wired TV* elucidates the myriad new digital threats and the equal number of digital opportunities that have become part and

parcel of today's post-network era. Readers will quickly recognize the familiar television franchises on which the contributors focus— including Lost, The Office, Entourage, Battlestar Gallactica, The L Word, and Heroes—in order to reveal their impact on an industry in transition. While it is not easy for vast bureaucracies to change course, executives from key network divisions engaged in an unprecedented period of innovation and collaboration with four important groups: members of the Hollywood creative community who wanted to expand television's storytelling worlds and marketing capabilities by incorporating social media; members of the Silicon Valley tech community who were keen to rethink television distribution for the digital era; members of the Madison Avenue advertising community who were eager to rethink ad-supported content; and fans who were enthusiastic and willing to use social media story extensions to proselytize on behalf of a favorite network series. In the aftermath of the lengthy Writers Guild of America strike of 2007/2008, the networks clamped down on such collaborations and began to reclaim control over their operations, locking themselves back into an aging system of interconnected bureaucracies, entrenched hierarchies, and traditional partners from the past. What's next for the future of the television industry? Stay tuned—or at least online. Contributors: Vincent Brook, Will Brooker, John T. Caldwell, M. J. Clarke, Jonathan Gray, Henry Jenkins, Derek Johnson, Robert V. Kozinets, Denise Mann, Katynka Z. Martínez, and Julie Levin Russo

Terrible Old Games You've Probably Never Heard Of Stuart Ashen, 2015-12-03 In Terrible Old Games You've Probably Never Heard Of, Stuart Ashen has created a collection of hilarious and damning reviews of some of the most bizarre, frustrating, pointless and downright terrible video games ever made. And he would know. . . he's played them all. Dripping with wry humour and featuring the best, worst graphics from the games themselves, this book encapsulates the atrocities produced in the days of tight budgets and low quality controls. These are the most appalling games that ever leaked from the industry's tear ducts and have long since been (rightly) relegated to the dusty shelves of history. Welcome to a world of games you never knew existed. You will probably wish you still didn't.

Robin Hood in Outlaw/ed Spaces Lesley Coote, Valerie B. Johnson, 2016-11-10 Following in the tradition of recent work by cultural geographers and historians of maps, this collection examines the apparently familiar figure of Robin Hood as he can be located within spaces that are geographical, cultural, and temporal. The volume is divided into two sections: the first features an interrogation of the literary and other textually transmitted spaces to uncover the critical grounds in which the Robin Hood 'legend' has traditionally operated. The essays in Part Two take up issues related to performative and experiential space, demonstrating the reciprocal

relationship between page, stage, and lived experience. Throughout the volume, the contributors contend with, among other things, modern theories of gender, literary detective work, and the ways in which the settings that once advanced court performances now include digital gaming and the enactment of 'real' lives.

For the past decade, Larry has painstakingly trawled through countless old magazines, routinely harassed developers, and blackmailed journalists to uncover these amazing tidbits and anecdotes that would have fallen by the wayside of history. Now he has compiled them into a fun, full-colour book with sections on botched game launches, pointless peripherals, unreleased video game movies, weird guest fighters and much, much more. Along the way, he has invited a few famous gaming guests, including Stuart Ashen and Did You

Know Gaming?, to provide their favourite quips for your personal perusal. So whatever your level of knowledge about video games, you're guaranteed to learn a ton of entertaining new information.
