Spatial Temporal Patterns for Action-Oriented Perception in Roving Robots Paolo Arena, Luca Patanè, 2008-12-19 The basic principles guiding sensing, perception and action in bio systems seem to rely on highly organised spatial-temporal dynamics. In fact, all biological senses, (visual, hearing, tactile, etc.) process signals coming from different parts distributed in space and also show a complex time evolution. As an example, mammalian retina performs a parallel representation of the visual world embodied into layers, each of which represents a particular detail of the scene. These results clearly state that visual perception starts at the level of the retina, and is not related uniquely to the higher brain centres. Although vision remains the most useful sense guiding usual actions, the other senses, first of all hearing but also touch, become essential particularly in cluttered conditions, where visual percepts are somehow obscured by environment conditions. Efficient use of hearing can be learnt from acoustic perception in animals/insects, like crickets, that use this ancient sense more than all the others, to perform a vital function, like mating.

Proceedings of the 3rd International Symposium on Autonomous Minirobots for Research and Edutainment (AMiRE 2005) Kazuyuki Murase, Kosuke Sekiyama, Naoyuki Kubota, Tomohide Naniwa, Joaquin Sitte, 2006-01-16 This volume contains a collection of papers presented at the 3rd International Symposium on Autonomous Minirobots for Research and Edutainment (AMiRE 2005) that is held at Awara-Spa, Fukui, Japan, September 20-22, 2005. This is a biennial symposium, which started as AMiRE 2001 at the Heinz Nixdorf Institute of the University of Paderborn, Germany, in 2001, and was followed by AMiRE 2003 at Queensland University of Technology, Brisbane, Australia, in 2003. After these successful symposia, AMiRE 2005 is held under the sponsorship of the Faculty of Engineering, University of Fukui and under the co-sponsorship of the IEEE Robotics and Automation Society. It is funded by the Fukui Convention Bureau and the University of Fukui. Each full-length paper submitted to the symposium was independently reviewed by 3 referees from the world's front-line researchers, and 55 papers were accepted for oral presentation. We acknowledge generous support for those who gave excellent reviews in order to maintain the high standards of the symposium despite a very tight schedule.

UFOs Robert Powell, 2024-04-02 Whether you suspect the origin of UFOs is one of the thousands of exoplanets that have been discovered or whether you believe it come from here on earth or are a myth, this book will fill you in not only on the phenomenon itself but on how we as individual human beings and as a society have reacted to the phenomenon.

Public Apology Dave Bry, 2013-03-19 Dave Bry is sorry. Very sorry. He's sorry to Wendy Metzger for singing the last verse of Stairway to Heaven into her ear while slow dancing in junior high school. He's sorry to Judy and Michael Gailhouse for letting their children watch The Amityville Horror when he babysat them. And he's sorry--especially, truly--that he didn't hear his cancer-ridden father call out for help one fateful afternoon. Things are different now. Dave's become a dad, too, and he's discovered a new compassion for the complicated man who raised him. And maybe if his 17-year-old self could meet his current self, he'd think twice before throwing beer cans on Jon Bon Jovi's lawn. Dave's apologies are at turns hysterically funny and profoundly moving, ultimately adding up to a deeply human, poignant and likable portrait of a man trying to come to grips with his past.

Gardening at Ginger James Raimes, 2006-05-24 Seven years ago, James Raimes and his wife bought a country home on nine acres in upstate New York. In the tradition of their family, who once owned a cottage named Fred, this larger property became Ginger. Inspired by the natural beauty of the land and a desire to learn how to be a gardener, Raimes found himself obsessed with such questions as why gardeners keep moving plants around, what the names of the lawn grasses are, and how one can impose order in a garden and at the same time make it look natural. What, in fact, defines a garden? Gardening at Ginger is full of successes and failures, aches and pains, frustrations and delights. But more than that, it's the story of a great discovery: as we try to shape a landscape to reflect who we are, we find that who we are has been reshaped in the process.

Visual Homing in Dynamic Indoor Environments Matthew David Szenher, Barbara Webb, 2008 Our dissertation concerns robotic navigation in dynamic indoor environments using image-based visual homing. Image-based visual homing infers the direction to a goal location S from the navigator's current location C using the similarity between panoramic images IS and IC captured at those locations. There are several ways to compute this similarity. One of the contributions of our dissertation is to identify a robust image similarity measure - mutual image information - to use in dynamic indoor environments. We crafted novel methods to speed the computation of mutual image information with both parallel and serial processors and demonstrated that these time-savers had little negative effect on homing success. Image-based visual homing requires a homing agent to move so as to optimise the mutual image information signal. As the mutual information signal is corrupted by sensor noise we turned to the stochastic optimisation literature for appropriate optimisation algorithms. We tested a number of these algorithms in both simulated and real dynamic laboratory environments and found that gradient descent (with gradients computed by one-sided differences) works best.
