Climb Beyond: The Future of Indoor Climbing

Matthias Heise, 2014 As indoor climbing gets increasingly popular, ClimbBeyond proposes a new way to make it even more fun. With the innovative product, climbers can create an unlimited amount of boulder routes. How? All a climbing gym needs is a camera, a laser projector and a tablet. The routes are projected onto walls so you can help beginners with lead climbing and challenge your friends with new route ideas for indoor climbing. This opportunity plan assesses the market size and customer segments within the indoor climbing market that are essential to the introduction of the proposed new product.

German Foreign Policy in the Gulf Helmut

Hubel, Lars Berger, Matthias Heise, 2005-02-15 German foreign policy towards the Arab Gulf can only be understood within the context of the European Union and the policies of its major EU partners. For analytical purposes, German and European policies towards Iran, Iraq and the GCC countries have to be investigated separately. Regarding Iran, the European consensus on the need to engage the Iranian leaderships has enabled Germany to pursue its interests in maintaining political cooperation and economic ties. Yet, the policy of critical dialogue had only very modest results, and it remains doubtful whether the recent British-French-German initiative concerning international safeguards on Iran's nuclear program will be successful. Concerning Iraq, Germany under the Red-Green government has abandoned its traditional role as an intra-European mediator

between the independent French Middle East policy and the British position of close cooperation with the US. While a common position with France on the question of the legitimacy of military action against the Iraqi regime reflects intensive German-French cooperation on a broad range of European problems, it also marks the first time that the Federal Republic openly disagreed with the US on a matter of war and peace. With regard to the relations with the GCC countries, the strong US military presence will continue to put limits on the level of Germany's and the EU's influence. German and European policy-makers will have to take into account that the political elites of the Arab Gulf states will look toward Washington rather than Paris or Berlin for the foreseeable future. On the other hand, Germany's current energy policy, emphasizing the importance of renewable sources and suppliers from outside the Middle East, could further shift the focus of Germany's economic interests in the region toward expanding trade in a way that increases market shares for Germany's export-oriented economy, while not threatening the survival of domestic industries through competitive imports. Because of the significant impact the Gulf's oil resources have on the stability of the global energy market, Germany's economic well-being will ensure its continuing interest in the region.

Climb Beyond. The future of indoor climbing - an opportunity assessment plan Matthias

Heise, 2013-10-31 Seminar paper from the year 2012 in the subject Business economics - Company formation, Business Plans, grade: 1, Vienna

University of Economics and Business (WU Executive Academy), language: English, abstract: "Climb Beyond" is a summary for full featured service in the indoor climbing market with the goal to make this sport more attractive and enjoyable to everyone. The key product is a device that can observe any climbing route and track a climber on it. This tracking information can be reprojected by a laser beam onto the climbing wall enabling any inexperienced climber to get immediate help while being stuck on the wall. The information can also be used for later analyzing and teaching. Once installed, this product will enable visitors to get a much better climbing experience and advance further more easily. This document is an opportunity assessment plan trying to reveal the chances of the product to be successful in the indoor climbing market.

Climb Beyond. Market Research for the Introduction of a New Product into the Indoor

Climbing Sport Matthias Heise, 2013-11-05 Master's Thesis from the year 2012 in the subject Sport - Sport Economics, Sport Management, grade: 2, Vienna University of Economics and Business (WU Executive Academy), course: Entrepreneurship & Innovation, language: English, abstract: For about two decades indoor climbing became a trend in adrenalin sports. In many Western countries climbing halls of huge size have been build. Most urbanized citizens at least tried it once. But even though the climbing community is huge, only a few starters remain active or advance in skills and techniques. The business background of this research is a new product that is able to track the movement of any professional climber and re-project the shape of the body to help an inexperienced climber to make his next best move while being stuck on the wall. This will help less skilled users to advance and enjoy climbing even more. The applications for this product are numerous but the market is highly uncertain. Therefore this study tries to reveal why most users do not advance and it identities common problems and barriers that most climbers have to face. How do they get over them or why do they stumble. After having a deeper insight into the indoor climbing market, the possible market size and user acceptance for the new product can be estimated more accurately. This thesis is seen as an opportunity assessment reducing uncertainty before bringing the product into the market.

Indonesia's Search for Democracy Matthias Heise, 2013 Since 1998, the transformation of Indonesia has led to far-reaching political and

economic change: The democratization process introduced an amended constitution, multi-party and factional organization as well as participative procedures and administrative decentralization. A new understanding of the Indonesian civil society has evolved, the relationship between security forces (military and police) has been redefined, and focal topics have shifted to dealing with separatist movements, solving interethnic conflicts, and promoting good governance. Ongoing violations of human and minority rights, rather low anti-corruption performance and restrictions inhibiting the freedom of the press call for governmental action. This book investigates the opportunities and challenges of Indonesian reform initiatives in the many policy fields from various perspectives. The authors examine the obstacles faced by the government and the resulting challenges to implementing specific policies.

Europe and Asia: Perceptions From Afar Natalia Chaban, 2015-03-26 Is the EU able and prepared to deal with emerging Asia? Is an increasingly affluent Asia willing to engage with economically challenged Europe? This engaging volume presents the latest empirically informed comparative insight into how key Asian players imagine and perceive the EU before and after the Lisbon Treaty – as well before and after the outbreak of the Euro debt crisis. The result is a comprehensive overview of how these two continents engage and interact.

The Development of Business Clusters in Indonesia Aknolt Kristian Pakpahan, 2015-03-26 This

unique and thoroughly researched book examines small and medium-sized enterprises (SMEs) in Indonesia, focusing on Indonesian government policy for developing industrial clusters. Aknolt Kristian Pakpahan elaborates on such challenges as a lack of political coordination as well as cultural factors for the long-term growth of business clusters. He uses case studies of the footwear and ceramic industries to expand on the theoretical research, resulting in a fascinating and useful text for researchers of industrial development.

Soft Power Hendrik W. Ohnesorge, 2019-11-22 This book explores the phenomenon of soft power in international relations. In the context of current discourses on power and global power shifts, it puts forward a comprehensive taxonomy of soft power and outlines a methodological roadmap for its empirical study. To that end, the book classifies soft power into distinct components - resources, instruments, reception, and outcomes - and identifies relevant indicators for each of these categories. Moreover, the book integrates previously neglected aspects into the concept of soft power, including the significance of (political) personalities. A broad range of historical examples is drawn upon to illustrate the effects of soft power in international relations in an innovative and analytically differentiated way. A central methodological contribution of this book consists in highlighting the value of comparative-historical analysis (CHA) as a promising approach for empirical analyses of the soft power of different actors on the

international stage. By introducing a comprehensive taxonomy of soft power, the book offers an innovative and substantiated perspective on a pivotal phenomenon in today's international relations. As the forces of attraction in world politics continue to gain in importance, it provides a valuable asset for a broad readership. This book was the winner of the 2021 ifa (German Institute for Foreign Cultural Relations) Research Award on Foreign Cultural Policy. "In this important and thoughtful book, Hendrik Ohnesorge explains and advances our knowledge of the ways that soft power, public diplomacy, and charismatic personal diplomacy are shaping the international relations of our global information age." Joseph S. Nye, Jr., Harvard University and author of *The Future of Power*

Qatar Mehran Kamrava, 2015-06-15 The Persian Gulf state of Qatar has fewer than 2 million inhabitants, virtually no potable water, and has been an independent nation only since 1971. Yet its enormous oil and gas wealth has permitted the ruling al Thani family to exert a disproportionately large influence on regional and even international politics. Qatar is, as Mehran Kamrava explains in this knowledgeable and incisive account of the emirate, a tiny giant: although severely lacking in most measures of state power, it is highly influential in diplomatic, cultural, and economic spheres. Kamrava presents Qatar as an experimental country, building a new society while exerting what he calls subtle power. It is both the headquarters of the global media network Al Jazeera and the site

of the U.S. Central Command's Forward Headquarters and the Combined Air Operations Center. Qatar has been a major player during the European financial crisis, it has become a showplace for renowned architects, several U.S. universities have established campuses there, and it will host the FIFA World Cup in 2022. Qatar's effective use of its subtle power, Kamrava argues, challenges how we understand the role of small states in the global system. Given the Gulf state's outsized influence on regional and international affairs, this book is a critical and timely account of contemporary Qatari politics and society.

The Development of Higher Education in the United Arab Emirates Daniel Kirk, 2010-03-10 The UAE sits astride an uncomfortable dilemma in terms of national development and international profile. It seeks to be a regional and global power, both economically and politically, and to achieve this it needs to diversify and become less reliant on a workforce that is made up predominantly of expatriates, many of whom are employed because they have a level of education unavailable among the general citizenry. Alongside a rapid growth in public services and private commerce, education is a stated national priority, with the Ministry of Education setting out in its vision that education should achieve "enduring development for the community." The UAE higher education sector is growing at an astonishing rate. However, the apparent dilemma results from the call for a rapid growth in educational provision, alongside the desire to produce a functioning and accessible education system in a relatively short time-frame.

The UAE is a 'consumer' of educational practice, a nation that has a history of buying in the educational models and expertise it requires, as opposed to the lengthier, but possibly better suited, process of building an indigenous education system from the ground up. Developing a truly indigenous and new system to fit the needs of neophyte states – although laborious, expensive and problematic – does allow a nation to mold specifically the needs of the country with the educational systems developed. However, the UAE, through the model of 'borrowing' systems and expertise, was able to 'kick-start' the development of education in the country, greatly decreasing the time needed to establish formal educational structures. Such a situation may open up questions as to the suitability and efficacy of a predominantly imported educational provision for the indigenous population. The UAE, as a relatively new and emerging economy, has the funds and support of the national leadership to actively pursue and seek educational systems and practices that will advance development and competitiveness. To exam how globalized structures influence education in the UAE and beyond, there needs to be an understanding and awareness of the context in which the education sector functions today. As global economic forces and the labor needs of societies change, then accountability, control and governance of education becomes a contested area of public policy. However, what can be seen is that education is gaining in prominence in the public policy arena, with governments and politicians realizing that in order to be globally

competitive, education must produce a skilled and efficient national workforce, placing education firmly in the realm of human capital theory and policy.

The New Public Diplomacy J. Melissen, 2005-11-22
After 9/11, which triggered a global debate on public diplomacy, 'PD' has become an issue in most countries. This book joins the debate. Experts from different countries and from a variety of fields analyze the theory and practice of public diplomacy. They also evaluate how public diplomacy can be successfully used to support foreign policy.

Muslim Democracy Edward Schneier, 2015-10-23

Muslim Democracy explores the relationship between politics and religion in forty-seven Muslim-majority countries, focusing especially on those with democratic experience, such as Indonesia and Turkey, and drawing comparisons with their regional, non-Islamic counterparts. Unlike most studies of political Islam, this is a politically-focused book, more concerned with governing realities than ideology. By changing the terms of the debate from theology to politics, and including the full complement of Islamic countries, Schneier shows that the boundaries between church and state in the Islamic world are more variable and diverse than is commonly assumed. Through case studies and statistical comparisons between Muslim majority countries and their regional counterparts, Muslim Democracy shows that countries with different religions but similar histories are not markedly different in their levels of democratization. What many Islamists and western observers call Islamic law, moreover, is more apolitical than a religious construct, with religion more the tool than the engine of politics. Women who drive in Saudi Arabia, as the author says, are not warned they will go to hell, but that they will go to jail. With the political salience of religion rising in many countries, this book is essential reading for students of comparative politics, religion, and democratization interested in exploring the shifting boundaries between faith and politics.
