One Murder More Kris Calvin,2015-06-01 Silver Falchion Awards 2016 Winner: Best First Novel, Best Political Thriller, Best Female Detective/Sleuth In Kris Calvin's debut mystery One Murder More, a beautiful legislative aide is found stabbed to death in California's Capitol building. Maren Kane, a lobbyist for a fledgling Sacramento-based toy company, is in the midst of a legislative fight that could make or break her career. She doesn't have time for a coffee break let alone involvement in a murder investigation. But when police arrest Maren's colleague for the crime, she's certain they have the wrong man. The cops suspect a crime of passion—love gone wrong. Maren knows that in the capital, money and power drive all things tragic and scandalous. Sex and love are little more than window-dressing. But will she be able to prove her theory—and free her friend—before she becomes the next victim?

All That Fall Kris Calvin, 2021-04-13 Emma Lawson must race against the clock to rescue a kidnapped child and stop a killer whose master plan only begins with murder. The body shot and killed in the early morning hours by the Sacramento River would have been an easy case for Detective Alibi Morning Sun to solve if only his prime suspect weren't already in jail. Across town, California's youngest lead government ethics investigator Emma Lawson is enjoying a day off to help her best friend, Kate, open a new business when amidst a hail of gunfire, Kate's teen son, Luke, goes missing. Over a harrowing forty-eight hours, as Alibi gathers new evidence to determine the identity of the riverside killer and Emma desperately searches for 15-year old Luke, the two investigations collide. At the heart of both is a kidnapped three-year old girl and a diabolical plot with stakes Emma could never have imagined. Will Emma and Alibi be in time to bring the girl and teen to safety and to stop a calculating killer whose plan threatens all that Emma holds dear?

Restructuring Translation Education Feng Yue, Youlan Tao, Huashu Wang, Qiliang Cui, Bin Xu, 2019-01-14 This book offers data-based insights into the problems of translation education and their causes in the context of localization and globalization in the era of big data. By examining language services around the globe, illustrating applications of big-data technology and their future development, and describing crowdsourcing and online collaborative translations, speech-to-speech translation and cloud-based translation, it makes readers aware of the important changes taking place in the professional translation market and consequently recognize the insufficiency of translation education and the need for it to be restructured accordingly. Furthermore, the book includes data-based analyses of translation education problems, such as teaching philosophy, curriculum design and faculty development of both undergraduate and postgraduate education in China. More importantly, it proposes solutions that have already been successful in experiments in a number of universities in China for other institutions of higher education to imitate in restructuring translation education. The discussion is of interest for current and future translation policy makers, translation educators, translators and learners.

Learning to Rank for Information Retrieval Tie-Yan Liu, 2011-04-29 Due to the fast growth of the Web and the difficulties in finding desired information, efficient and effective information retrieval systems have become more important than ever, and the search engine has become an essential tool for many people. The ranker, a central component in every search engine, is responsible for the matching between processed queries and indexed documents. Because of its central role, great attention has been paid to the research and development of ranking technologies. In addition, ranking is also pivotal for many other information retrieval applications, such as collaborative filtering, definition ranking, question answering, multimedia retrieval, text summarization, and online advertisement. Leveraging machine learning technologies in the ranking process has led to innovative and more effective ranking models, and eventually to a completely new research area called "learning to rank". Liu first gives a comprehensive review of the major approaches to learning to rank. For each approach he presents the basic framework, with example algorithms, and he discusses its advantages and disadvantages. He continues with some recent advances in learning to rank that cannot be simply categorized into the three major approaches – these include relational ranking, query-dependent ranking, transfer ranking, and semisupervised ranking. His presentation is completed by several examples that apply these technologies to solve real information retrieval problems, and by theoretical discussions on guarantees for ranking performance. This book is written for researchers and graduate students in both information retrieval and machine learning. They will find here the only comprehensive description of the state of the art in a field that has driven the recent advances in search engine development.
