Eye of the Wolf Ray McComber,2013-07 Sergei Zhukov was graduated from St. Petersburg University in Leningrad, Russia, and wanted to be a physicist. However, World War II was just starting, and the Germans were on the Russian doorstep. During a college project, he had developed a long-range bear-hunting rifle, and the Russian Army was interested in him and his ability to develop an even longer-range sniper rifle. He did so, and the Army High Command commissioned him to go out and follow the German SS Panzer divisions that were invading Russia and shoot as

many of their high-ranking officers as possible. He was very successful. In three years, he was in many engagements, some lasting only one day and others lasting many months. He and his spotter and two wolf dogs lived off the land any way they could to survive. The German SS sent out hunters after him on many occasions. The German SS had also put an extremely large, ever-growing bounty on him. His response was to send back the bounty posters to the SS division commanders attached to the well-chewed SS hunters, with a message: The Eye of the Wolf is upon you. He became an enigma to the German SS and a folk hero to the Russians. His missions started at the Poland/Russia border and went on to Moscow. He was then sent to the Crimea, then Stalingrad. He then went back north to Leningrad, and each time, he engaged the German SS panzer divisions.

Revisiting the Manufacturing USA Institutes National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Innovation Policy Forum, 2019-06-29 The Manufacturing USA initiative seeks to reinforce U.S.-based advanced manufacturing through partnerships among industry, academia, and government. Started in 2012 and established with bipartisan support by the Revitalize American Manufacturing and Innovation Act of 2014, the initiative envisages a nationwide network of research centers for manufacturing innovation. Some 14 manufacturing innovation institutes have been established to facilitate the movement of early-stage research into proven capabilities ready for adoption by U.S. manufacturers. To better understand the role and experiences of the Manufacturing USA institutes, a committee of the National Academies of Sciences, Engineering, and Medicine convened a workshop on May 23, 2017 drawing together institute directors and manufacturing policy experts along with leaders from industry, academia, and government. Given the continued prominence of enhancing domestic manufacturing and international competitiveness

in public policy discussions, the National Academies convened a second workshop on November 14, 2018, to monitor the progress of the Manufacturing USA institutes. This publication summarizes the presentations and discussions from this second workshop.
