Beyond Physicalism Edward F. Kelly,Adam Crabtree,Paul Marshall,2015-02-19 The rise of modern science has brought with it increasing acceptance among intellectual elites of a worldview that conflicts sharply both with everyday human experience and with beliefs widely shared among the world's great cultural traditions. Most contemporary scientists and philosophers believe that reality is at bottom purely physical, and that human beings are nothing more than extremely complicated biological machines. On such views our everyday experiences of conscious decision-making, free will, and the self are illusory by-products of the grinding of our neural machinery. It follows that mind and personality are necessarily extinguished at death, and that there exists no deeper transpersonal or spiritual reality of any sort. Beyond Physicalism is the product of an unusual fellowship of scientists and humanities scholars who dispute these views. In their previous publication, Irreducible Mind, they argued that physicalism cannot accommodate various well-evidenced empirical phenomena including paranormal or psi phenomena, postmortem survival, and mystical experiences. In this new theory-oriented companion volume they go further by attempting to understand how the world must be constituted in order that these "rogue" phenomena can occur. Drawing upon empirical science, metaphysical philosophy, and the mystical traditions, the authors work toward an improved "big picture" of the general character of reality, one which strongly overlaps territory traditionally occupied by the world's institutional religions, and which attempts to reconcile science and spirituality by finding a middle path between the polarized fundamentalisms, religious and scientific, that have dominated recent public discourse. Contributions by: Harald Atmanspacher, Loriliai Biernacki, Bernard Carr, Wolfgang Fach, Michael Grosso, Michael Murphy, David E. Presti, Gregory Shaw, Henry P. Stapp, Eric M. Weiss, and Ian Whicher

Leap Tess Vigeland,2015-08-25 Until recently, Tess Vigeland was a longtime host with Public Radio's Marketplace; it was a rewarding, high-status job, and Tess was very good at it—but she'd begun to feel restless. Without any definite, clear sense of what she wanted to do next (but an absolute certainty that what she'd been doing was no longer truly satisfying), she walked away from her dream job and into a vast unknown. Suddenly she was no longer “Marketplace’s Tess Vigeland,” she was just Tess Vigeland. For the multitude of Americans who change jobs mid-career (by choice or circumstance), the growing legions of freelance workers, and the entrepreneurially-minded who see self-employment as an increasingly more appealing and viable option, Tess Vigeland has created a personal and well-researched account of leaping without a net. With her signature humor, she writes honestly about the fear, uncertainty, and risk involved in leaving the traditional workforce—but also the excitement, resources, and possibilities that are on the other side. Part memoir and part field guide, this book offers a funny, thoughtful, and provocative look at how to find happiness, satisfaction, and success when pursuing a career less ordinary.

The Lost Ways II Claude Davis, Sr.,2016-06-17 In *The Lost Ways II* you'll find the long forgotten secrets that helped our ancestors survive famines, wars, economic crises, diseases, droughts, and anything else life threw at them.
