Using Psychology to Cope with Everyday Stress Charles Brooks, Michael

Church, 2019-10-11 This book is about coping with the everyday stress we all face. We want to talk with folks who are functioning fairly well in their lives but who could profit from some guidance in handling those day-to-day issues that cause emotional distress. From a psychological perspective, we offer techniques and suggestions for organizing your thoughts and actions to cope more effectively with your stressors that are a part of living. We focus on three basic emotions that affect everyone: grief, anxiety, and anger. We then look at specific aspects of child-rearing that cause stress and have special sections on autism and drug/alcohol issues. We discuss moderate depression as it relates to everyday problems and how you can move forward with your life. This book is not intended for those with severe psychological problems that require professional psychotherapy, psychiatric medication, or possibly hospitalization. In fact, the book offers a coping vaccination that might help immunize you against more severe psychological dysfunctions.

Virtual Music David Cope, 2004-01-30 Virtual Music is about artificial creativity. Focusing on the author's Experiments in Musical Intelligence computer music composing program, the author and a distinguished group of experts discuss many of the issues surrounding the program, including artificial intelligence, music cognition, and aesthetics. The book is divided into four parts. The first part provides a historical background to Experiments in Musical Intelligence, including examples of historical antecedents, followed by an overview of the program by Douglas Hofstadter. The second part follows the composition of an Experiments in Musical Intelligence work, from the creation of a database to the completion of a new work in the style of Mozart. It includes, in sophisticated lay terms, relatively detailed explanations of how each step in the process contributes to the final composition. The third part consists of perspectives and analyses by Jonathan Berger, Daniel Dennett, Bernard Greenberg, Douglas R. Hofstadter, Steve Larson, and Eleanor Selfridge-Field. The fourth part presents the author's responses to these commentaries, as well as his thoughts on the implications of artificial creativity. The book (and corresponding Web site) includes an appendix providing extended musical examples referred to and discussed in the book, including composers such as Scarlatti, Bach, Mozart, Beethoven, Schubert, Chopin, Puccini, Rachmaninoff, Prokofiev, Debussy, Bartok, and others. It is also accompanied by a CD containing performances of the music in the text.

Coping with Media Violence Holly Cefrey, 2001

Cope's Early Diagnosis of the Acute Abdomen, 2010-01-12 This classic text is much beloved by medical students and physicians-in-training throughout the English-speaking world, as its many editions indicate. It is chock full of the pearls of clinical wisdom that students and practitioners treasure, and many of these lessons apply to medicine in general. The book was well characterized by a reviewer of an earlier edition for *The New England Journal of Medicine*: 'If only one book about surgery could be made available to physicians from all specialties, it should probably be Silen's recent revision of *Cope's Early Diagnosis of the Acute Abdomen*. Since the book first appeared, it has remained the classic treatise on the initial approach to abdominal pain.' Because acute, severe abdominal pain is still a common problem whose misdiagnosis can result in quick death, each generation of beginning physicians is faced with the urgency of learning to make a diagnosis in this high-anxiety situation, and they appreciate the wise, humane, precisely detailed guidance offered by Cope and Silen. For the 22nd Edition, Dr. Silen has again updated the text in a respectful but significant way. He has added a chapter on the increasing disorder of diverticulitis, reexamines the use of analgesics, emphasizes the costs of over-testing, and updates all recommendations regarding trauma, radiologic studies, and therapeutic recommendations.

Coping with Illness Digitally Stephen A. Rains, 2018-08-21 An examination of "digital coping" involving the use of communication technologies, particularly social media, in responding to illness. Communication technologies have become a valuable resource for responding to the profound challenges posed by illness. Medical websites make it possible to find information about specific health conditions, e-mail provides a means to communicate with health care providers, social network sites can be used to solidify existing relationships, online communities provide opportunities for expanding support networks, and blogs offer a forum for articulating illness-related experiences. In this book, Stephen Rains examines this kind of "digital coping" involving the use of communication technologies, particularly social media, in responding to illness. Synthesizing a diverse body of existing empirical research, Rains offers the first book-length exploration of what it means to cope with illness digitally. Rains examines the implications of digital communication technologies on a series of specific challenges raised by illness and discusses the unique affordances of these technologies as coping resources. He considers patients' motivations for forging relationships online and the structure of those networks; the exchange of social support and the outcomes of sharing illness experiences; online health information searches by patients and surrogates; the effects of Internet use on patient-provider communication; and digital coping mechanisms for end-of-life and bereavement, including telehospice, social media memorials, and online grief support. Finally, Rains presents an original model of digital coping that builds on issues discussed to summarize how and with what effects patients use communication technologies to cope with illness.

When Blame Backfires Anne Marie Baylouny, 2020-09-15 The recent influx of Syrian refugees into Jordan and Lebanon has stimulated domestic political action against these countries' governments. This is the dramatic argument at the heart of Anne Marie Baylouny's *When Blame Backfires*. Baylouny examines the effects on Jordan and Lebanon of hosting huge numbers of Syrian refugees. How has the populace reacted to the real and perceived negative effects of the refugees? In thought-provoking analysis, Baylouny shows how the demographic changes that result from mass immigration put stress on existing problems in these two countries, worsening them to the point of affecting daily lives. One might expect that, as a result, refugees and minorities would become the focus of citizen anger. But as *When Blame Backfires* demonstrates, this is not always the case. What Baylouny exposes, instead, is that many of the problems that might be associated with refugees are in fact endemic to the normal routine of citizens' lives. The refugee crisis exacerbated an already dire situation rather than created it, and Jordanians and Lebanese started to protest not only against the presence of refugees but against the incompetence and corruption of their own governments as well. From small-scale protests about goods and public services, citizens progressed to organized and formal national movements calling for economic change and rights to public services not previously provided. This dramatic shift in protest and political discontent was, Baylouny shows, the direct result of the arrival of Syrian refugees.

Ubiquitous Learning Bill Cope, Mary Kalantzis, 2010-10-01 This collection seeks to define the emerging field of ubiquitous learning, an educational paradigm made possible in part by the omnipresence of digital media, supporting new modes of knowledge creation, communication, and access. As new media empower practically anyone to produce and disseminate knowledge, learning can now occur at any time and any place. The essays in

this volume present key concepts, contextual factors, and current practices in this new field. Contributors are Simon J. Appleford, Patrick Berry, Jack Brighton, Bertram C. Bruce, Amber Buck, Nicholas C. Burbules, Orville Vernon Burton, Timothy Cash, Bill Cope, Alan Craig, Lisa Bouillion Diaz, Elizabeth M. Delacruz, Steve Downey, Guy Garnett, Steven E. Gump, Gail E. Creative Technologies for Multidisciplinary Applications Connor, Andy M.,2016-03-29 Given that institutions of higher education have a predisposition to compartmentalize and delineate areas of study, creative technology may seem oxymoronic. On the contrary, the very basis of western thought is found in the idea of transcendent knowledge. The marriage of opposing disciplines therefore acts as a more holistic approach to education. *Creative Technologies for Multidisciplinary Applications* acts as an inspiration to educators and researchers who wish to participate in the future of such multidisciplinary disciplines. Because creative technology encompasses many applications with the realm of art, gaming, the humanities, and digitization, this book features a diverse collection of relevant research for the modern world. It is a pivotal reference publication for educators, students, and researchers in fields related to sociology, technology, and the humanities.

Policing Tim Newburn,Jill Peay,2012-06-22 Bringing together a range of leading social scientists and criminologists, this volume explores a number of key themes raised by the work of Robert Reiner. Arguably the leading policing scholar of his generation, Reiner's work over some 40 years has ranged broadly in this field, taking in the study of police history, culture, organisation, elites and relationships with the media. Always carefully situated within an analysis of the changing socio-political circumstances of policing and crime control, Robert Reiner's scholarship has been path-breaking in its impact. The 13 original essays in this volume are testament to Reiner's influence. Although reflecting the primarily British bent within his work, the essays also draw on contributors from Australia, Europe, South Africa and the United States to explore some of the leading debates of the moment. These include, but are not limited to, the impact of neo-liberalism on crime control and the challenges for modern social democracy; police culture, equality and political economy; new media and the future of policing; youth, policing and democracy, and the challenges and possibilities posed by globalisation in the fields of policing and security.

Nursing the Image Julia Hallam,2012-12-06 Ideas of 'nursing' and 'nurses' carry a powerful social charge. The image of the nurse continues to be a symbol of caring and of duty at the same time as it projects a view of femininity, 'stereotypical' in its gender relations. How has this image come to be constructed? An empirical investigation of representations of nursing practices in Britain focusing on publicity and promotional materials and their relationship to popular fictional narratives reveals a strong correlation

between what are usually described as discrete forms of signification. Recruitment images, provide an important source of information and inspiration for those considering nurse training. Julia Hallam, draws from a wide range of sources including biographies, marketing and recruitment literature, popular fiction and film to explore this question. In doing so she makes an original contribution to the debates surrounding gender and occupational identity. The book will provide a valuable resource for undergraduate and postgraduate students on courses such as the social history of nursing, the understanding of health and illness, women's studies, gender studies and sociology courses.
